There must be an awful lot of home computers tucked home computers, gathersway in dark corners, gathersway in dark corners, gathersway in dark corners, gathersway in dark corners is decided to was a Spectrum uses it owns a Spectrum uses it owns a Spectrum uses it owns a Spectrum on the investment of the serious side of home computing. Some of home computing stopped using these people stopped using these people stopped using these people stopped using their computers stogether, white others indeed the grow-white others indeed the grow-white others in the grow-white others in the spectrum front at the mement — trum front at the inherited the sinclair ability to foul up along with the Sinclair name; the standard the design so they along the house the sinclair shown by house of the flair shown by independent designers and in

goodies encased in The Music Machine. There's a dedicated, RAM-based word processor on its way from RAM ELECTRONICS, and CHETTH have more plans for musical hardware. Other firms are getting involved too.

This is fast becoming the age of MiDI — an interfacing standard that gets musical instruments and computers chattering away happily to each other. Soon, even the most musically illiterate will be able to have fun producing professional-sounding music on inexpensive systems based around the Spectrum.

Other areas of contents of contents and contents and contents areas of contents.

tems based around the Spectrum.

Other areas of entertainment centred on the Spectrum are about to open up. Mei. Croucher's cunning device that allows computer generated trainment are develoption.

New areas of computer entertainment are developing. Of course, the healthy games market continues to produce new and innovative product, as well. Look at Lightforce and Fat Worm. Blows a Sparky...

With the arrival of new addons, some of those dusty spectrums tucked away in dark corners might well be fetched down, plugged it and used once more. And while the machine's on, people may decide to see what's happened to computer games since the days of Maziacs. And be amazed at what they see. Who knows? There could be another computer boom just around the corner. Let's see what happens this Christmas....

Grane Kidd

OVER FROM AMTIX!

Someone's just told Lee Paddon that part of the CRASH initiation ceremony involves him buying a round of Old Flatulence Bitter for everyone on the team! Poor refellow's more used to the balmy climes of the AMTIX! office, where he's been beavering away for the past few months. Following in the footsteps of Robin Candy, Tony Flanagan has departed for pastures new,

and Unca Lee has moved from

the zone of the Amsters to join CRASH. Lee's been wasting his youth for a good few years now, pounding joysticks and pounding joysticks and keyboards (amongst other things) at YOUR COMPUTER in London before heading towards the sleepy market town of Lud-low. And the Paddon family are just about to buy a house next door to Ben Stone — becoming a real family affair, this magazine . . .

THE MONTHLY SOFTWARE STAR **FOR YOUR US GOLD**

Caevied Ba Chail Gava

THE GAME THAT ROCKED AMERICA...

COMMODORE. SPECTRUM & **AMSTRAD** versions NOW **AVAILABLE**

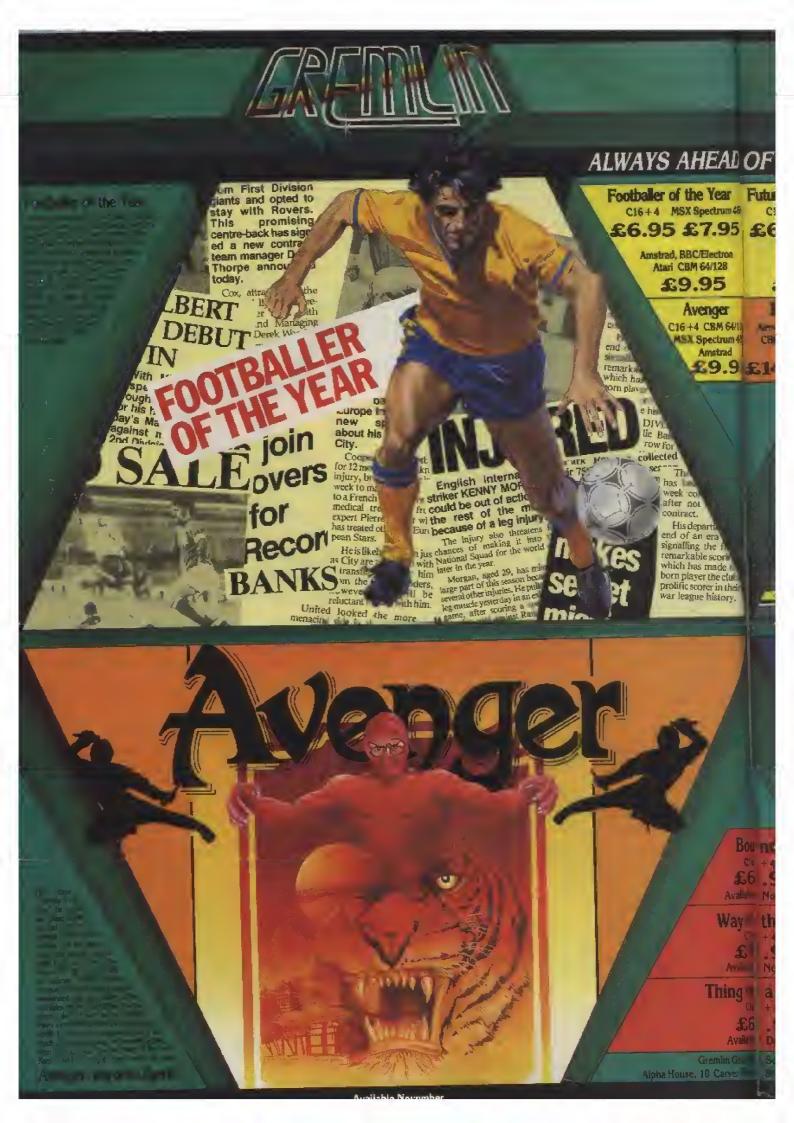

Things are happening on stage at the Camden Palace -audience crowds in, covered in L.M.T Shirts and Hats. . .

FROM THE OWERS

A great deal of travelling was done on Thursday 18th September — lots of NewsField staff members put on their suits, clambered into a fleet of vehicles and zoomed off to London, setting out before dawn. And several hundred CRASH, ZZAP! and AMTIXI readers headed towards a rendezvous in London on the same day

ing a party in the famous Camden Palace disco to launch a new magazine to advertisers. Readers of Newspie.o's computer magazines were invited to join in the fun at the LMLaunch Party, A tiny bit of 'Us and Them' was

involved: while Gaz Top (of Get Fresh fame) hosted the disco and

ground floor of the Palace, the people who control huge advertising budgets and industry figures such as Ian Stewart from скемин оварысь. Tim Chaney from us GOLD, Paula Byrne from RAINBIRD and Ted Heathcote from GARsovie games looked on from the

the day off to attend was rewarded with a Limited Edition Limitaunch party T Shirt, and guite a few people went away with a lot more.

During the party, Gaz Top gave
away several hundred pounds worth of camera equipment, computer games and dozens and dozens of cheeky red Limbats...

NEW FOR OLD

Whilst strategy freaks twiddle their Whits strategy treaks twiddle their thumbs waiting for the next Kevin. Toms biggle President, they can take a nostalgic trip down memory lane with a repackaged version of the slightly aged classic Football Manager. This new version comes in a double cassette package, has had the names of the players undated, but otherwise is the updated, but otherwise is the same game you knew and loved back in 1982. Oh yes, there's a competition to win a trip to the 1987 Cup Final inside. A company spokesman seemed a bit vague about the price 'shop around and you might get it for less than a fiver is about as definite as he'd get. Another hoary old chestnut get-

ting a quick lick of paint is Gyron. This didn't sell awfully well when it was released as a full price game over a year ego, but now it has been rereleased on FIREBIRD'S been rereleased on FIREBIRD'S Silver range at £1.99. The game features the previously unreleased Arena maze, - played as the tiebreaker in a competition run with the game when it was initially released. The winner of this competition managed if in 18 minutes, can you solve the maze faster? If you are a Gyron fan, you'll want to have a lock at this new maze. Alternatively, if the game has never appealed to you before, at this price, it might well be worth a look

FROST BYTE IN SPRING?

Mikro-gen has a suitably seasonal theme to the first of its winter releases. Frost Byte is set in the frosty planet Cosmia.

The battle for freedom, enlightenment, and all those nice things is being lost by the Kreezers who have been captured by the goulish monsters who inhabit the planet's craters. The player controls a Kreezer — that looks and behaves rather like a Slinky spring.

The hero has managed to escape the evil clutches of his captors and must now escape from the crater, freeing five fellow Kreezers on the way, and then leading the Front Liberation eux Kreezer (FLAK) to

victory.
It's an arcade adventure with shoot—ern—up overtones and looks rather pretty—it's in line for a full review next month.

OOPS! SORRY HEWSONS!

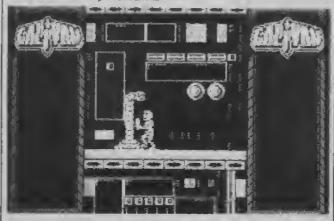

Last month we managed to make a blunder of epic proportions, for some reason, an advertisement for newson's Commodore game, AlleyKat sneaked its way into CRASH. This has confused quite a new people (not least newson) themselves, who have no plans for a Spectrum version at

the moment.)
Everso scrry, folks, Promise It won't happen again

GALLIVANTING ALONG

Also arriving just too late for the reviewing team to get stuck into was Galvan from MAGINE another coin-op conversion. quick look at the game reveals it to be a huge arcade shoot 'em up where the lead character, Galvan, is faced by a whole host of meanies. Some nifty footwork is

needed to move around the screen, as well as combat skills. Galvan starts off with just his bare hands, but gradually acquires more powerful weapons. At the end of each level, a huge Demon appears which has to be blasted apart piece by piece.

ESCAPE! From Ocean

Just as the magazine was going to bed, a cassette tied round a half brick came crashing through the windows of CRASM Towers. When we feverishly untiled the package, it was found to be The Great Escape making its escape from **OCEAN**

From those whiz programming Liverpudlians, penton besigns, it's all about getting out of a POW camp. You control a prisoner walking around a large 3D scrolling landscape. Whilst working out Ing landscape, whilst working out you're escape route, you've got to keep the old chin up by collecting red cross parcels, and keep your nose clean by attending roll call. Having worked out the system of guards the aim is to collect and hide escape equipment. Getting cattolit means a quick troo march.

caught means a quick frog march to solitary confinement for a spell of morale-sapping thumb twiddling, so be careful....

Also on the late gate-crashers' list is lice. Temple from BUBBLE BUS. From the hitherto little known Tom Prosser, it is an arcade adventure all about zipping about, picking up some things and zapping others in

a huge cave systems.
The hero, Nick Razor, stumbles.

into the 800 screen ice Temple in search of his stolen motor and realises that he has entered a huge alien thermionic reactor that threatens to turn everything into an icy waste. Find that car, Nicky babe and disable the reactor before we all freeze our socks offl

COMPILATION CORNER

Already the first rush to compile older hits in time for Christmas is happening. Both pureculand viscin have just released compilations, which must put them ahead of the crowd of software houses that will soon be going for the Chrissie Stocking market.

Virgin has Now Games 3 --- no prizes for guessing that this is a sequel to the company's two previous efforts. The line up for this one is Nick Faldo Plays the Open from the angus mind games label, Codename Mat if and View to a Kill

from DOMARK, Everyone's a Wally from Mikro-GEN. VIRGIN are also releasing a new version of their own hit game Sorcery on the tape, featuring Improved graphics and extra rooms.

Durett has a very strong line-up for its compilation modestly enti-tled Big 4. The four titles are all DUNELL games of varying vintages that were all rated very highly by CRASH in their time. The big four in question are Combat Lynx, Crit-Mass, Turbo Esprit and

SPECTRUM PLUS TWO *HICCOUGHS?*

Despite indications given at the PCW Show that the new Spec-trum would be available from the end of September, there's still no sign of the Spectrum Plvis - in the Ludlow shops, any

According to other High Street retailers we contacted (on October 8th). Plus Twos are not available for them to order from their head offices, and there is no retail price available yet. This could mean that the machines are still at least three weeks away from chainstore

branches.
During this waiting period, the older Spectrum Plus and 128K models have been discounted by several retailers. Comet are queting 289.99 for the 128, whilst Dixons/Currya is offering deals on the two models. which include cassette recorders and joysticks for £109.99 and £129.99 respectively.

As we went to press, a spokes-person at Amstrad said that shipments of the Plus Two had started

Amstrac Distribution claimed to have shipped some machines to independent retailers, and claimed that Dixons have taken a shipment, so the Plus Two should be available by the time you read

Early Plus Twos apparently had problems when it came to working with a domestic colour TV — but Amstrad claim there have been no technical problems with the machine and that the only difficul-ties they had at the PCW show were caused by the TVs being

Amstrad wouldn't comment on the question of incompatibilities with existing peripherals. — It appears that it is impossible to plug interface 1 directly into the machine because the distance between the PCB and the bottom of the case is greater than on pre-vious models. Also, most add-ons are likely to interfere with the R\$232 port. The height between the top of the case and the PCB has also been increased

BACK WITH A ENGEANC

What has that incompetent sonuvabitch Laszlo been ranting on about??? I vanish in search of the hottest story of my life and he's writing my obituary. A shock to the system of my many readers, I'm sure, so let me tell you what happened . . .

I was wandering round the departure lounge of LA international Airport, waiting for them to announce the flight for Mexico. Normally I wouldn't have bothered with the bookstore, but one of the airport security guards had started to eye me in a suspicious fashion and it seemed like a good idea to blend into the scenery ... which isn't easy when you're wearing a green and lilac Hawaian shirt and orange and blue shorts!

Well, what should I find nestling on the racks but the early, interna-tional edition of CRASH, which contained the libellous remarks contained the libelious remains you read in the last Issue. Deciding to forego the luxury of the finest chilfi known to mankind, I slipped into the queue for the London bound plane. I'd tried to avoid it, but it looked like I was needed at the PCW Show!

The plane touched down at four in the morning, having been struck by lightning several times as it crossed the pend. Even for a seasoned traveller it was a hairy ride, and one or two people got hyster-ical, but I just charged another Bloody Mary or three to the CRASH account and weathered it. After all, if you're going to go down you might as well do it with a drink your hand!

I spent the rest of the morning in a daze. I seem to remember a misunderstanding involving a taxl driver whose parentage I brought into question. Anyhow, the point is that I didn't roll up at the HEWSON

lunch till the early afternoon, too late for Andrew's little speech. Actually, for once I'm glad I mis-sed this latter-day Churchill, I have my doubts about the HEWSON sanityl I mean, they'd bedecked their suite in full Christmas style, tree included. It caused a certain feeling of paranoia as I began to won-der just how long I'd been in that taxi

The point of it all is that anybody who orders a game directly from the big H gets a free Crimbly gift. Quite what gift, they weren't say-ing. I'd settle for nothing less than signed photo of the gorgeous Julia Coombs:

As I wandered out of the Hewson suite, in search of further fun of a more seasonal nature, I was set upon. Now of course I expect to be set upon at PCW, but not quite so early into the affair. And who was my assailant? Why, none other than Mr Flat Top himself, Andy Wright. Apparently he took exception to something I wrote and wanted to stifle the freedom of the press. This he planned to do

by unscrewing my nipples!
I dived for cover in the ARGUS binge, narrowly avoiding the grasp of the bearded bouncer who bore a strange resemblance to the Archbishop of Canterbury's Spe-cial Envoy, Terry Waite. That could only mean it was **Dave Carlos**. Unluckily, the stocky one failed to prevent my pursuer diving into the

meleo after me.

What followed isn't a pleasant story. Into a room full of earnest young software types, all doing business and showing their latest games to serious journalists, burst Minson, shouting obscenities at the blond bombshell. Peter Holme of ASP was even moved to call Andy a 'software yob', Steady there, Peter. This was mild by comparison with what was to fol-

Mindful that discretion is the better part of Valerie, I took refuge behind the skirt of a woman. Only there was something funny about

there was sometime formy about this particular skirt, it was tight. Taut, even. And it was black. Pneumatic. RUBBER!!!

"Hi, Jane," I smiled, trying to act as cool as any man who has just had his nipples twisted can be. The smile that shone back was the best thing I'd seen touchdown.

touchdown.

"Hello, darling, would you like to furniture polish my bottom?" asked la dolce Smith. "It has to be done every half hour or I end up with fingermarks all over my behind." Maybe it was going to be a good PCW after all. . . .

Finally reaching Olympia itself I met up with my long standing colleague, Leslie B Bunder. Let me say here and now, that L B is a well respected journalist and I'm proud

Hunter S is no longer missing . . . anything other then a Bloody Mary, anyway. He's back — as this PCW Show anap avec champagne reveals

to know him.

His reputation on the Washington Post was second to ... though he never gained quite the same name for his stirling service on the Christmas Post here in London. L B had taken his place on the BEYOND stand, waiting for that one big story. It's not every day you see this sort of devotion to duty. Meanwhile, I decided to

Drunker by the minute, thanks to some classic Baxter hospitality. I wandered in a daze, bumping into a bearded chap who claimed to be Graeme Kidd. Could this really be the same man who once sported number one crop and DMs?

a number one crop and DMS?

Obviously his position as a responsible publishing executive has done strange things to him.

What else? Mandy Keyho of PIRANHA invited me for a midnight dip, though as the suggested pool was the phraphs infested tapk. was the piranha intested tank on their stand I made an excuse and left, just in time to bump into мікво-GEN's Mike Meek, sporting a new suit every bit as flash as the com-pany's new logo. Obviously Mike's been taking my style hints after all!

On seeing my poor, bloodshot eyes, hunky Tom Watson of poin and FIREBIRD gave me a pair of shades so dark that they were opaque. Then he led me out into the middle of the main road and left me there! Seeking sanctuary slipped upstairs, to a small side chamber where I found Peter Probert of MICRONET cast adnft, without even a phone line to his name. Taking pity on him I sat and sipped a little wine and we got happily horizontal together

And on it went. On and On. On and on and on and . . ! was on a beach, the surf washing around my feet. It had all been a night-

mare!

And then I woke up, lying in the gutter outside Olympia, and Jane Smith was pouring a bucket of water over my boots. "Come on," she told me, "we've got to get a she told me, "we've got to get a key cut." And so we did . . but that was quite definitely another story!!!

Yours in fear, loathing and trac-

Hunter S Minson

92650 Speeding through the spieroid beit. Six deceptively harmless alien ships attack in waves An orbital alien installation gets its come-uppance, with the control centre disintegrating at bottom centre. You're the white apage craft 16 CRASH November 1986

L·I·G·H·T·F·O·R·C·E

ightforce is the Punishment Arm of the Galactic Fighter Command. If a law is bro-ken then Lightforce is on hand to ensure the penalty is paid. And

nebody escapes.

Lightforce is also the first game from the Faster Than Light label. This is an off-shoot of GARGOYLE GAMES, the people responsible for the acclaimed scrolling graphic adventure quests Tir Na Nog, Dun Darach and Heavy on the Magick. The new label allows programmers Greg Foltis and Roy Carter to depart from a game style which they have made their own, and to take on mainstream arcade entertake on mainstream arcade enter-

take on mainstream arcade enter-tainment.

The Terran-settled Regulus sys-tem, set in an unobtrusive corner of the galaxy, is in trouble. Inoffen-sive and ignored by most races, it becomes the unusual target for marauding aliens. These aliens are very tough cookies and in no time at all have taken over the peaceful Terran system, culling many of its Inhabitants and enslaving the rest. Vengeance is obviously called for. The GEM council's reaction to this invasion of one of its colonies

this invasion of one of its colonies this invasion of one of its colonies is predictably swift and violent. They order all Lightforce fighters in the Regulas sector to attack. Unfortunately, your fighter turns out to be the only craft in the vicinity and, though daunted by the prospect of taking on umpteen aliens on your tod, you prepare to engage the enemy. Yours is not to reason why...

CRITICISM

" My first sight of this game at the PCW show turned me into gibbering wide-eyed heap on the floor Lightforce has been in the office for quite a while now end so far it hasn't been left alone for ionger than ten minutes — almost a new office record. almost a new office record.
The graphics are THE BEST
that I have seen on a Spectrum shoot 'em up, if not in
any game. The characters
are large, colourful and
very fast, and the
background scrolling is excellent. Sound is a touch disappointing, as there are no tunes, but the effects more than make up for that. is extremely Gameplay compelling but very hard, which can be a little dis-heartening. I'd recommend this to everyone who likes a good shoot 'em up as you won't find one better for a long, long time."

The game is split into five sections. Emerging from the light-drive tunnel, you find yourself in the thick of an asteroid belt. Blasting a path through the debris you see below vast alien installations of weapons systems, armament pods and energy domes circling every planet. The odds are ridiculous. In a neno-second the aliens have registered the arrival of an intruder and despatch ships to intercept. Cool, calm and collected, and chanting the motto 'Lightforce is for REVENGE', you the lasers end start blasting.

Before descending to the planet surface the massive orbital sta-tions must be annihilated, and then there are further alien control stations to be destroyed in the jungle below. After the jungle sec-tion play progresses to the ice planet, then the desert planet, and

CRITICISM

"GARGOYLE'S first release the new Faster Than Light label is a definite winner. The game is extremely playable and features lots of colour that is well implemented in the large and detailed graphics. Sound is weak, but there are some nice spot effects. are some nice spot effects. Lightforce is easy to get into and contains ell that the average shoot em upper would like, with a play area which scrolls smoothly and contains lots of things to blow up. However, as with other games of this genre roument find our realf forced. you may find yourself bored after a time end £8.00 is quite a lot to pay.

CRITICISM

" After thrilling to the PCW Show preview, I eagerly awaited the errival of Lightforce. Usually any game I wait for with such anticipation Is bound to disappoint me, but this game really is the exception to the rule! Something has to be said about the graphics, but how can I do them justice? Colour is absolutely amazingly superbly stunningly (help, where's my Thesaurus?) brilliant, and the game is undoubtedly one of the best shoot 'em-ups on the Spectrum. Maybe I have some sort of sadistic craving to destroy aliens in a fast-moving, scrolling landscape, but if that's the way it is, and if I can play and play Light-force, then I'm happy. Okay? This game certainly

finally the alien factories. For every four control stations destroyed a bonus is added to your score. The screen action scrolls down-

wards and the aliens swoop in from every conceivable angle, each type of alien craft attacking in separate waves. The Lightforce righter has sensitive controls and can move upwards, from side to side and downwards if you want to beat a hasty retreat.

ing allens.

GLIDER RIDER

Producer: Quicksilva Retail Price: £8.95 Author: Binary Design

olning the 'Silent but Deadly' squadron is not a good idea if you're looking for a quiet life. Any dirty jobs going, and you

This one looks particularly nasty. A bunch of arms dealers called the Abraxas Corporation, with few scruples and 'no ques-tions asked, John', are causing a bit of a problem. So the World Council, in its infinite wisdom, has decided that the Abraxas Corporation has got to go, and the lads at the good old SBD squadron are the ones to do it. I mean, boys, we'd do it ourselves, but what with the island being made of plastic and therefore invisible to radar, we thought we'd give you the honour."

When our brave chaps get to the island, they discover that some joker from the armoury section has been taking a little practical mic-key. Instead of a rather fast jet and couple of nice thermonuclear

a couple of files thermonuclear jobs, you've ended up with a convertible hang glider and a handful of grenades, Terrific.

Fortunately Abrexas has designed its plastic island with lots of nice hills scattered all over it. So the technique is to zip around the island with the hang glider cun-ningly disguised as a motor bike. Then scoot down a handy hill, and launch into the air by quickly reversing the direction of move-

The object of the mission is to bomb everything in sight on the island. Unfortunately, things can only be bombed from the air, and only be bombed from the air, and as soon as you take to the ether, the local laser opens up — thus draining energy. Our hero starts his quest with 100 energy points; at zero, he's a goner; and he can become shark food if any careless

flying is done over the sea. The trick is to head-butt a radio mast — this makes the local laser base go a bit loco — then take to the skies quickly before the laser gets itself sorted out and bomb the reactor which tends to be very close to the laser base.

There are ten of these reactors scattered around the island, all of which have to be taken care of in half an hour, otherwise the rescue sub takes off, leaving our hero stranded. Stockpiles of grenades have been left lying around the place to which he can help himself whenever he likes. Well, they are arms manufacturers, so you would expect to be able to put your hands on a bit of ordnance when needed.

The screen display is in the now customary 3D perspective with the action flipping from screen to screen as necessary. The graphics depict the main base complex, including the factory, and the wooded surroundings of the base which contain the reactors you are out to destroy along with plenty of hills to launch the hang gilder. On the ground, four direction controls move the motorbike in the corres-ponding four directions. When in the air, left and right turn the hang glider, and forward and back cause it to climb and dive, On touching the ground the hang glider reverts to its motorbike

CRITICISM

" Good news first. Glider Rider has nicely drawn graphics (and a great tune if you own a 128).
After that, I'm afraid, it's a bit of a disappointment. Once the technique of hitting a nearby radio mast, finding a convenient stope and taking off is mastered,

BOMBS:8 ENERGY:21

the game is rather dull, Whether you can actually take off when you try seems entirely random.
It's a nice idea, a lot of trouble
has gone into the graphics and
the animation of the character is good, but I just can't rate it that highly, because it's practically unplayable."

 "For those depraved non-128K/Plus 2 owners out there, Glider Rider is a fun sort of game, and worth checking out, as the concept, playability and addictive-ness are all very good. When play-ing the soundless 48K version, I was reasonably happy with it, but it's the sound of the expanded ver-sion that really makes it top notch — on the 48K it's merely good. "

 "t'm not overly impressed with this offer from Quicksitva since it isn't half as playable as it could have been. Secause the playing area is nice, large and easy to get lost in and the blurb on the inlay sets the scene very well, on your first go it's very easy to get right into the sprit of the game. The graphics are very good — the play-ing area excellently drawn and so is your character. There's very little flicker and next to no colour clash as well. Unfortunately, sound on the 48K machine is limited only to the odd soot effect — it's brillient on the 128K version. On the whole I found it very hard to get anywhere in Glider Rider and I suspect it will need a lot more practice to complete it than I have time for.

COMMENTS

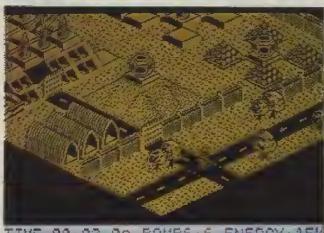

Control keys: re-definable Joystick: Kempston, Sinclair or Keyboard play: responsive Use of colour: good Graphics: excellent Sound: poor on the 48K, but superb tunes and FX on the 128K Skill levels: 1 Screens: 100 General rating: a bit of a let down for faithful 48%-ers but still a well above average and original game.

Since the difference between the 48K and 128K are rather obvious in Glider Rider, we thought we should indicate the ratings separately. The additional sound has most effect on ratings like playability and addictivity. Here's one critical com-ment for the 128K version:

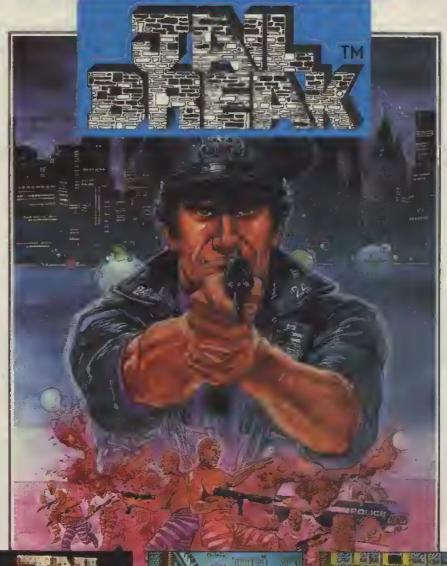

"What can! do, except go 'rave, rave rave' over the indescribably superb music in this game? There is just no competition for this (as I write) in the aural stakes, as far as any Spectrum games go.
Mikie, Ping Pong, Knight Tyme, all their
lunes are put to shame by the stunning
soundtrack and FX of Gilder Rider.

On yer bike! Scool round the enemy industrial complex, find a tearby hill and go into glider mode.

THINGY AND THE DOODAHS

Producer: Americana Retail Price: £2.99 Author: Michael Smith

ur hero's parents are obviously rather scatter-brained people as they've christened their sen Thingy. In fact absent-mindedness runs in the family because Thingy refers to everyday objects around him as doodahs and thingummybobs. Is it any wonder that a lad so dim has managed to loose his precious Spectrum?

Thingy has to scamper round trying to get £60 together so that he can buy a new one before his parents find out that it's missing. (Budget game, budget Spectrum!) The Thingy household is chaotic and Thingy can find a bit of the money which he so desperately needs just by hunting through his brother's bedroom and other

rooms in the building.
However, some of the money belongs to the Doodahs and they are understandably reluctant to part with it just so Thingy can buy himself a new computer. They manifest themselves in various hideous forms and set out to ter-

rorlse Thingy wherever he goes.
There are different sorts of
Doodahs. The most deadly are the
vicious Whatsisnames. Others victious whatsisnames. Others reside under the splendid titles of Thingummybobs, Whatchamacallits and the fiendish So-and-sos. These perishing little objects never give up trying to protect their cash, Contact with the nastles costs Thingy one of his ten lives, At the side of the main screen a

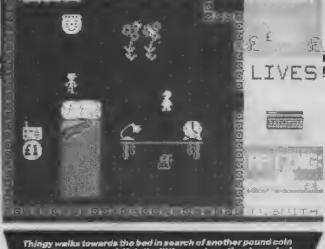

panel shows Thingy's progress in the game. At the top is a box show-ing how much money he has man-aged to collect and below the cashometer a pink box reveals

Thingy's lives.
Will Thingy be able to replace his
Spectrum in time? Or will be suffer the tortures of withdrawal symptoms first? Only you can ans-

CRITICISM

 "What a strange name for a typical budget game! graphics are very small and contain very little animation. Colour is used lavishly but clashes aren't too much of a problem as the characters are all fitted in their own little space. I don't think the game is very playable as it lacks constant speed of trevel — the screen locks up when there's a lot on it — and you're limited to four directions. This is definitely the worst game that AMERICANA have brought out so far, it is totally unoriginal and, at three pounds, overpriced."

 "The loading screen is lantastic: In over two years of games

reviewing I have never seen such a colourful, pretty and interesting screen, and the way it loads up even knocks Fighting Warrior into a cocked hat. Unfortunately, the game itself falls short, playing in a garrie liver rais short, playing irra similar way to JSW and the like. The graphics are of an average standard for this type of game, the characters are all nicely animaled. characters are all nicely animated, but are small and badly detailed. The sound is not good—there are a few well placed spot effects and a dire tune which you can turn off if it annoys you. Thingy and the Doddahs is not an unplayable game and it represents quite good the street is the trepresents quite good. value for just three pounds but it didn't really appeal to me, it is unoriginal and rather out of date."

Ah, poor Thingy has broken his Spectrum; what a wally as it says on the inlay! Honestly, if this is the sort of game he plays on it, then I'd leave it broken, and buy another computer because this is the sort of low quality cheapy game that gives us Spectrum owners a bad name among the other computer users of this world. The loading screen is very good, in the way that the picture draws from the bottom corner up. The graphics, though are very primitive, and the game itself is unplayable to a very great degree. Though low in price, as far as I'm concerned, Thingy can keep his Doodahs, because I don't want them, that's for sure.

STORM

Producer: Mastertronic Retail Price: £1.99 Author: Simon Freeman

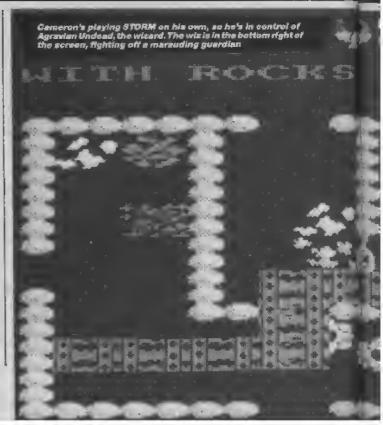

torm the warrior is your actual everyday superhezo. Bold, fearless, heroic righter of wrongs, and he even remembers to put his Y-fronts Inside his trousers! But, while he was off doing daring deeds, some bloke by the unlikely title of Una Cum has made off with his old lady and

locked her in his lair Storm is a bit put out by all this, and pausing only to enlist the aid of the equality oddly named Agra-vian the Undead, he legs it over to Una's place to free his beloved.

free Corrine, three snake brooches have to be collected. The action is viewed from above, and each location is a mini-maze. As the hero (or heroes if the game is being played in two-player mode) leaves the current location, the next room flips into view. A scrol-ling message below the status area describes the location and lets the player(s) know if a character's strength is getting dangerously low.

As soon as a room is entered the baddles come swarming at the rescue party and contact with them, like magic use, gradually saps a character's strength rating as shown on a counter at the top of the screen, Individual baddles can be zapped with magic, while scarce scrolls, masks and amulets which have to be collected zap all the baddies in a location. If possible, the generators that pro-duced the evil minions should be destroyed to stem the flood of nasties. Various items can be collected

KAITEMPLE

Producer: Firebird Retail Price: £1.99 Author: lan Wright

igh up in the Himalayas there is a mystical Kai temple. This holy shrine is guarded by some martial arts warriors: fearsome Ninjas and the Divas. Their sole job is to protect the treasures and religious artefacts within the temple, and very dedicated to their ocation they are too. It is into this

the Kai temple, unless you happen to be a martial arts supremo. The Ninjas can only be despatched by an accurately timed combat kick. When one of these kicks hits home, the Ninja dissolves into a crumpled mass on the floor. Divas can only be killed by lobbing a dag-

ger into their torsos.

Each screen consists of three platforms patrolled by a number of guards. Your character can leap between the platforms to avoid flying arrows and daggers and must chase around the screen dealing death. Each screen has a time limit indicated by a counter the guards aren't eliminated quickly enough, the game ends. Contact with a Ninja or Diva result in the loss of one of your three

As you progress in the game, more and more nasties have to be dealt with and time limits get shorter. Every time three screens are cleared a bit of bell ringing Is needed before the game moves to

the next level. Pounding on the fire key makes a strength bar grow and then your man leaps onto a ses-saw, propelling a ball into the air. If the bell is rung by the flying ball it's onto the next screen, otherwise it's back to the last section of the tem-

Tibetan air is very thin, and white the Ninjas and Divas are perfectly acclimatised you aren't. Now and again your oxygen starved brain plays tricks, making the task a lot harder — the whole screen turns upside down!

Points are scored for each Ninja and Diva destroyed and for every level completed. There is a high score to beat each game, but the main problem is simply staying alive .

CRITICISM

- "Oh dear, this game is awful. The collision detection is poor, and the graphics are very bad. The noises made during the game don't exactly make you sit up with pleasure, and as far as playability and addictivity are concerned, Kai Temple must be one of the most boring games 've played recently. The whole thing is totally unexciting, and well worth steering clear of."
- Kai Temple is an extremely boring game. The graphics are far too. small for a game that has hardly anything happening in it. I couldn't find anything in Kai Temple to show that the programmer had any abil-

dungeon, including foodstuffs to boost flagging energy meters, extra scrolls and amulets, and armour. Two player mode gives twice the fire power. but then strength replenishing objects have to be shared out between the two characters,

Cabbalas are very useful, and change the layout of walls in a location, opening up a previously inac-cessible part of the room, or possibly blocking the exit.

CRITICISM

- "As budget titles go, Storm is a passable effort. If it hadn't been for the rather blocky characters and the poor playability, it would have done better. The way screens can be cleared that marks safe cluss a good. and made safe gives a good sense of progress, and the play-ing area is pretty vast. With just a little bit more work this game could have been much better . . as it is, Storm isn't very compel-
- "Boring, boring, boring, As you can tell I absolutely loved this game. I have never much liked

playing this sort of birds-eye-view. run-around-the-screens shoot'em ups and this game does nothing but justify my convictions. The graphics are slow and jerky and the characters are, how can I put it, mind numbingly boring. The control method is awkward, and takes a lot of getting used to before you can get out of tricky situations quickly. The crity nice thing I can say, is that the colour is not bad at all."

 "There seems to be a trend towards the mystical 'collect the treasure and dodge the dragons' type games at the moment, which is all well and jolly good fun. Storm isn't the best. The graphics on the whole are ugly, the characters are chunky but colourful and fast moving and the playing area is a bit drab. The sound also leaves a lot to be desired: what there is of it isn't really worth listening to. The two player mode is probably the best option the game has, but it takes a little practice not to get in each other's way. My main moan is that controlling your man is very difficult, so it is hard to nip out of trouble or go through doors. I can't really recommend this game as it

contains very experiencing.

NIGHTMARE RALLY

Producer: Ocean Retail Price: £7.95 Author: Giga Games

he engines roar and the crowd cheers. The rally is on, But it isn't until you've manoeuvred around the first obstacles that you realise that this is no ordinary rally, but rather the stuff of dreams — bad dreams.

The idea is to drive through each stage of the rally as rapidly as pos-sible white scoring points. Oriving over some objects on the course, such as bushes and shrubs, reduces speed and eventually leads to a blowout making the car harder to handle. Other objects conceal bonus points. Hills are high-scorers too, especially if you manage to fly over them!

Each stage consists of a statem course of marker flags and 100 points are awarded for each flag correctly negotiated. Fuel dumps may look as though they pose an awkward problem, but driving at them full tilt sends you soaring over the top to safety and adds

points to the score.
This Escort is far removed from the XR3s beloved of Yuppies - it handles in a rather surreal manner ... Driving very fast at a standing stone does not result in the disaster you'd expect. Instead of bits of broken rally car all over the place you take to the air and can glide over anything in your path. Very over anything in your path. Very handy, if you hit a tree or other largish object the car suffers no damage but time is wasted in backing away from the obstacle and driv-

ing round it.
Driving through a pi symbol causes one of three things to happen. Turbo powers might be added to the engine, increasing top speed and acceleration, or Superturbo could cut in, improving performance with the bonus of immunity to collisions. Alternatively, the car might pass through a hyperspace gate and arrive at a random destination in another stage or at the start of the current course. Another magical object to look out for is a pulsating iris which

has a very peculiar effect.

At the beginning of each stage, the target time and target score the target time and target score are flashed on screen, along with the braking and skid factors that apply. Failing to meet time and score targets costs one of the four lives available. Hitting objects or failing to negotiate the flags suc-cessfully makes the little life icon on the dashboard change colour. When the icon is red, the next col-

lision costs a life.
The weather itself is a nightmare - fog, ice, snow, rain and sun all have to be coped with in this gruelling test of rallying skills. Not one for Sunday drivers!

CRITICISM

 " At first play, Nightmare Rally seemed to be a very bad game. After a white, though, I found it surprisingly playable. The graphics aren't really stunning, but the trees look pretty when they get close, and the car ani-mation is excellent when you fly off the top of a big mound of earth, It's not the best game I've ever played on the Spectrum, and I doubt very much whether it would rank in my Top 30, but it is a fair game. The main criticism is really the price, as is so often the case with ocean games. Although many games nowa-days are priced around that mark, I feel that games of this quality would be far better value

\$00000 00086000

Cameron's certainly a wacky driver! Not the sort of fellow to accept a lift from unless you fancy a quick spin in his motor. . . .

at a budget price. But then again, all games under the sun would be better at a budget price. He hum. "

 "I must admit to being a fan of Rally sport and so when Night-mare Rally appeared I couldn't wait to see if OCEAN had captured all the thrills and spills of the motor sport without the queueing and waiting at special stages. They waiting at special stages. They seem to have got all the right ingre-dients in Nightmare Rally — superb graphics, excellent animation and addictive playability. The Escort is finely detailed, even down to the alloy wheels. Presentation is smart and there is lots of colour and smooth scrolling to add to the appealing layout. Everything is geared towards enjoyment there's none of this co-driver stuff on boring motorways. The prog-ram actually encourages you to now down cones, fly over trees and somersault over hills — all of these get you extra points and are great fun. Anyone who has fancied him or herself as Jimmy McRea or Louise Walker will love Nightmare Rally — although I must admit I didn't get scared once! "

 Nightmare Rally is one of those games which doesn't appear to offer very much until you really begin to play, and then you'll find it has a lot going for it - superb animation, jolly graphics and an ebundance of playability. The con-trols are simple enough to get to grips with in automatic mode, and when you think you can handle a real car, with real gears, you can then embark on manual control, which responds quite well. One feature which really caught my attention was the neat little pause mode, which freezes the screen and then rotates it very smoothly. This game has a lot to offer both fans of racing car games and arcade players, it is one of the better products to emerge from the OCEAN stable recently.

OLE, TORO

Producer: Americana Retail Price: £2.99 Author:

n most civilized countries, buil fighting has now been banned, although it remains apopular tourist attraction in many parts of Spain. This gory sport has now been brought to your Spac-trum courtesy of AMERICANA.

You take on the role of bullfighter who, armed with all manner of very sharp and deadly weapons, competes for superiority with an ill-fated bull. The bullfighter, if suc-cessful, is awarded hero status whereas the buil merely gets an extended stay of execution. The fight runs over five rounds with the bull getting increasingly tired and angry and the crowd becoming more and more frenzied.

The first section consists of a series of six passes, either 'Veronica' or 'de pecho', where the bull is tricked into charging the cloak instead of the builflighter. Points are awarded for each pass successfully made and an overall average of five must be achieved to progress to the next round. If the bullfighter makes a mistake during this section then the bull gets to have its revenge and impales the fighter on its sharp and pointy horns.

Then it's on to the Picador. Mounted on a dummy horse, your builtighter 'calls' the bull and when it's in range tries to stab it with a very long sword. This must be achieved twice to ensure that the bull is sufficiently weakened to pose little threat in the subsequent rounds. However, if you miss the bull, then it charges your 'horse'

and tramples you under.
By the time stage three comes around, the bull is considerably weaker than it was initially, whereas the bullfighter is running high on all the encouragment from the crowd, in this round the builfighter must perform an energetic Banderilla leap and at the same time stab the bull with his deadly Banderillas. The Banderillas must be stuck into the bull three times before moving on to round four.

This consists of another six sets of non-violent, but very frustrating, passes for the bull. These are different from the first set of passes earlier in the game and serve only to exhaust the bull even further.

Once these passes have been completed then it's on to the last stage, the Matador. Your builtighter stands alone in the vast and sitent arena armed only with knives. He calls the bull by shaking his brightly coloured cloak at him. Enraged, the bull makes one final charge at the bullfighter. At precisely the right moment he Impales the bull with all his pright. One misthe bull with all his might. One mis-take and the bull will split him from neck to gizzard.

CRITICISM

" It's not often that a game as tacky as this gets played so much. I've been playing it for hours now trying to get past the last level and I wont give up until I do. Graphically there isn't really much I can say about this one—
nice arena and a couple of very
well animated characters. The
sound is run-of-the-mill, with
two good tunes but no effects during play.. The game is fairly simple, as there are only a few things to do, so really it all boils down to a matter of timing. I enjoyed it, but can see that Ole. Toro will lose its appeal once it has been completed."

 "AMERICANA has again come up with another nice little game that contains nothing much new, but will keep you going for quite a while. It's based on a very gruesome and inhumane sport, and the writers have brought this to the fore, with the builtigh-ter getting thrown all over the place if the buil hits him — fortuplace if the bull hits him—fortu-nately they have left out the blood. All the characters are well animated—even the crowd jump up and down when you get past each level—but the sound FX are mainly white noise with a beepy Spenish tume at the beginning of each game. All the features are well done, but the game you are left with is very basic and not worth the asking price."

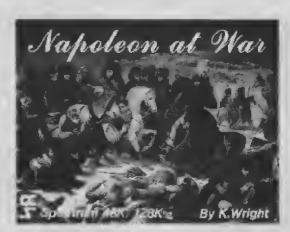

"West Bank was a brilliantly playable game, I thought, but Ole, Toro certainly hasn't the same

BOMBSCARE

Producer: Firebird Retail Price: £1.99 Author: Jeffery Bond

the planet Neptune, many years into the future, a fierce battle of wits is being fought. Neptune has now been colonised and a rather largish space station built to house its immigrants.

However, nasty aliens are determined to put a spanner in the For some reason best WORKS. known to themselves they have planted a huge bomb somewhere on the station as an act of gratuitous interstellar terrorism. bomb is so massively big that if it explodes it will not only destroy the space station but will also turn the planet Neptune into mere wisps of hydrogen and ozone as its particles are spread across the cos-

This is all a bit worrying. The inhabitants of the space station have been evacuated to a nearby asteroid and now it's just a waiting game. Gone are the days when highly skilled human bomb disposal experts were sent to risk their lives. Nowadays everything's automated. Arnold (which is a very nice name for a robot) is a mechanical disposal droid which is specially programmed to disassemble dangerous bombs. This droid has been sent into the space station on Neptune to locate and defuse the bomb before it's too late. However, it's still up to you to control Arnold and guide him through the corridors and rooms of the station in the quest for the bomb.

Those interfering allens have set a timer on the bomb. You have around 999 seconds in which to locate the bomb and render it harmless. Not content with just sitting back and waiting for the big bang, the aliens have also sent in their own saboteurs who will do their utmost to get in the way of your efforts. These irritating creatures will sap your droid's energy if they get too close. They can be destroyed by Arnold but will re-materialise after a short time to renew their attacks.

Amold has been equipped with a nifty laser which makes short work of any marauding nasty. However, the droid has only a limited amount of power so indiscriminate blasting will wear the laser out quite quickly. The droid also has a certain amount of energy which it uses to move around the space station, Each time one the of the nasties gets too close to Arnold, some of this energy is lost. This is represented by a blue wavy line at the edge of the screen. Once all four lives have gone the game is over and you can enjoy the planet's destruction from the safety of the control

CRITICISM

" FIREBIRD has started to pro-"Firetein has started to produce some very good budget software lately, some of which would probably sell very well with an £8.00 price tag. Bombscare is one of these. Graphically this doesn't offer anything new or particularly stunning — Filmation is getting a little overused and worn round the edges now there is a lot of nice detail and your character moves around the various screens smoothly. Sound is disappointing as there are few effects and no tunes. The game plays quickly but con-trolling your 'dustbin' is a little

tricky so you use up a lot of energy crashing into nasties that you can't avoid. Not a bad game, but it lacks a little in playability and addictiveness."

Will software houses never tire of making Filmation-style 3D games? I can tire of reviewing them, that's for sure. Bombscare isn't particularly bad, but the game just has that 'seen it all before' feel to it. The graphics, yes, are very pretty, it's very similar to all its predecessors. Playability-wise, Bombscare is just about up to standard, and it's fairly addictive, with some very nice effects, like the planet explosions. Good value formoney, but I didn't go ape over it, and I don't think most other people will either.

Surprise, surprise! Another budget, monochrome, arcade adventure. I tound Bombscare vary easy to get into and good fun to play for the first few goes, but it doesn't contain anything that will make you play it again. The graphics are, as all monochrome games should be, very pretty and detailed, but, alas, there is no sound worth mentioning. There are a couple of nice touches at the end of the game; when you die a little broom comes on the screen and sweeps your remains up (a la Marbie Madness) and the planet blows up into little bits (a la Dan Dare). The rotational movement of Arnold is extremely well done and easy to use, and helps speed up the game, Most people should be satisfied with Bombscare for a mere £1.99, but I've seen it all

TT RACER

Producer: Digital Integration Retail Price: £9.95 Author: Rod Swift

Recer has finally arrived.

Plettal INTEGRATION'S latest simulation puts you in the saddle of a Grand Prix bike. Riding in one of the four solo Grand Prix classes, the ultimate aim is to gain enough points to win the TT Championship. Sixteen riders compete in each race, and up to eight of them can be controlled by humans if the appropriate number of Spectrums are connected using

the interface 1 network.

Twelve circuits are included and four skill levels determine the strength of the opposition and how forgiving the game is when riding errors are made. It is possible to race on a specified track or you can embark on full a Grand Prix season, when the program automatically determines which tracks are used for the class of bike being ridden and sets the appropriate number of laps for each race. Rider information can be saved to tape, so a championship can be raced over several sessions. Practice allows you to get used to a circuit, improving your lap time to determine your teating possition on the girl.

bucks as the bike accelerates, and tilts as the bike goes round corners. The bike can be leaned to the left and right for cornering, while a dab of the clutch when the engine revs are at the right level changes gear up or down.

After every lap, the pitboard at the top of the screen is updated. This gives position, time from the driver ahead of you, and the one behind, laps, your best lap time and the course record. At the end of a lap, you can drive into the pits, and tyres may be changed, fuel added, or the gear ratios tinkered with

The bikes controlled by the computer do their best to avoid a collision, and crashestend to happen when you mess up comering. The effect of a mistake largely depends on the skill level that has been set—at the lowest level fatal crashes are rare. A minor error causes the border to flash and the bike to slow down a bit. If you come off, the engine must be stopped, the bike picked up, and started up again. A fatal crash ends the race for you.....

CRITICISM

 "Well, I thought this game was excellent. But then I'm a fan of flight simulators. And that's what this game reminds you of

On the starting grid, behind the handlebars of your bike. Tension mounts as the start lights count down . . .

The track is viewed over the handlebars, which are shown in the bottom part of the screen. The clutch and brake levers move when used, and the racing dashboard contains a rev counter, temperature gauge and gear number indicator. The road racing dash includes mirrors, a speedometer, fuel gauge and tyre wear indicator—riders coming up from behind appear in your handlebar mirrors.

The main screen gives a view of the track, track side markers and riders in front. This view dips or — It has the sort of complexity and detail normally associated with a flight sim. The adaptation of the tracks is very nice, with every slight wrinkle and turn nicely shown. My main criticism is that it's not tough enough. Evon on the European level, if you hurtle into a corner, you'll just end up on the side of the track. It is usually faster to do this than brake and take the corner properly. But apart from this it was great. All the avid biker could want from a simulation."

in fifth gear, zooming along the track in pursuit of another rider's machine. The three colour mode is an here, so there's attribute clash on the horizon where the track meets the sky

● "Despite my initial shock at the slightly weird screen display and the controls, I was fairly impressed at first although I don't think I could play' IT Racer for more than a few goes. The graphics resemble those in a flight simulator, which makes the game hard to get used to and rather off-putting to begin with. The other bikes and the scenery are not at all detailed and there is a lot of colour clash — which you can turn off at the expense of the colour on the road. The sound is dire: there are no tunes and the effects used are poor. Generally, if you are really into simulators you may get on with this, but if not there are a few other motorbike racing games around, all of which I reckon are more playable and compelling."

• "This is much more than an arcade motorbike game — as you might expect from flight simulator experts nertal integration, this is a very accurate and thoroughly researched piece of programming. A fair bit of effort is required before you get to grips with the game — the mark of any competent simulation — and you may be put off at first. It's well worth persevering, however, and the scope for 'real' championships between friends with Interface 1's adds a whole new dimension to the TT Racer. Not a game for the casual arcadester, though ..."

STREET HAWK

Producer: Ocean Retail Price: £7.95 Author: Paul Owens

fter an intensive eighteen month research program, Jesse Mach's super bike is finally ready to take to the mean

Jesse is hell-bent on avenging the death of his best friend, and goes on a one man crusade to deal death to villains wherever they may be. And they're on the street it's positively swarming with baddies, all driving XR3's for some reason. Did they buy XR3's because they were baddies in the first place, or did the go-faster stripes, natty grey trim and hide-ous insurance grouping warp their minds? Well, Jesse doesn't go in for all this psychological analysis stuff, a laser blast in the XR3 fuel tank is his answer.

Zooming along, Jesse has to weave his way through the traffic, dodging the bullets fired by the bad guys and doing his best to eliminate carloads of criminals while taking care not to kill innocent citizens. This is no ordinary

age received and the temperature of the bike's engine, which rises with each super leap into the air. Fuel also has a habit of being used ... On the positive side, points are

awarded for each baddle blown up and for each civilian overtaken.

After a bit of cruising the mean streets, Jesse arrives on the scene of a crime - another bunch of life's social misfits is robbing a liquor store. Does he get off the old bike and chew over a few of the finer points of behavioural therapy with the criminals, persuading them to abandon this life of crime? Does he heck! Out with the old riffe with laser sights, and it's time for a spot of Missile Command style baddle killing as they run to their getaway van.
All the villains at the robbery

scene must be shot before the second mission can begin. Then it's back to the road chase sequence, only this time a high bonus is awarded for killing off an underworld Big Cheese who motors along in a black sedan. Once the Sedan has been disposed of,

Riding along the mean streets with an XR3 full of baddles just ahead and the copear to the left

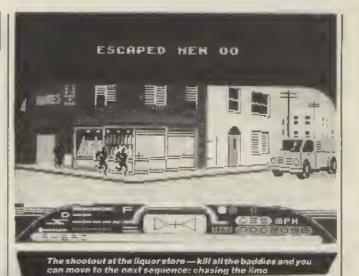

- apart from the faser cannon, it can leap into the air, and a well timed sproing can often avoid a collision. A crash or blast from a villain's gun isn't immediately fatal the bike can take a fair bit of damage before packing up on Jesse — but reckless driving leads to the end of the game, if too many civilians are wiped out, the police give chase and the turbo facility comes in handy for making a quick getaway: a prod on the turbo key give a burst of speed.

While driving along, a weather eye has to be kept on the status area where gauges indicate the condition of the lasers, the dam-

for a refit so the major confrontation with the Master Criminal can begin with the bike in tip-top con-dition. In the final street sequence the Top Man has to be blown out of his Porsche whereupon ultimate vengeance becomes Jesse's

CRITICISM

"Well, was it worth the wait? Not really. This might have been a good game eighteen months. ago, but it is just another vertically scrolling race game with a

few knobs on. The graphics are pretty, and there are some neat effects like jumping and the shadows on everything. There's nothing very originat or demanding about this game and somehow it doesn't seem to have been finished off - for instance, when the bike finally packs up as a result of too much 'collision damage' the game grinds to a halt after you lose control. No doubt the licensing deal will ensure it sells well.

" A year and a half wait for this trite game . . . come on ocean are you more concerned with your licensing deals than with the quality of your games? I was expecting ny of your garnes? I was expecting great things from this game until I saw how bad Knight Rider was, well thankfully this is a little more playable than KR but it still isn't state of the art. The graphics are very strange indeed — judging from the shape of your bike it was made in the nineteen twenties. The rest of the traffic is fairly well done but some of it is a little suspect. The streets scroll well and are excellently detailed. Soundwise Street Hawk doesn't really offer anything new: there are a few mediocre spot effects but no tunes. Street Hawk isn't bad game, but it is very easy to complete and not very compelling."

After having seen the version issued for those not-so-lucky people who really desperately needed a copy of Streethawk (copies were sold through a mail order catalogue, yonks ago) i expected semething a little different from the game that I loaded into my Spectrum. Though totally unlike its predecessor in everything except the central character, I found the final version of Streethawk a lot better than its incarnation. Despite not being in the top grade category, I enjoyed playing it, and despite the bad feeling that was obviously created by the long delay between advertising and game release,

think this game should go down well amongst the games buying public. Not bad. "

HARDBALL

Producer: Advance Software Retail Price: £8.95 Author: B Whitehead

ell, golly gee, its good to see all you folks out there in limey land taking to our fabulous game of baseball. After all, this cricket you play — what kinda game is that, for gosh sakes? A bunch of guys standing around in white pants all day — or some times for a whole week. You're never going to get peak time programming to swallow that. So now you'll all be wanting to

So now you'll all be wanting to know how to play this i'l oi' game. Well, first, the manager picks the squad. Nine guys are out on the ball park, and another 16 are back on the berich. You get plenty of dope on the guys in the team. The list gives you their normal fielding position, which way they bat, and their averages. A lot of these guys got silly names — like there's some guy celled Einstein, and this guy Asimov, whoever he is,
Once you've sorted your line up,

Once you've sorted your line up, it's out to the ball park, to face either the computer or a buddy. The screen shows just the pitcher, hitter, backstop and umpire, with a small insert showing which bases are occupied.

Most of the control in this game is accomplished by moving the joystick and pressing fire. At most stages, there are four possible choices. If you're pitching, then you've got to choose what kind of ball to pitch. There are four choices available out of eight types — and the choice depends on the pitcher you've got. Red hot guys get nifty balls like Fastballt, or

a real Joe Demaggio type can throw a curve that 'It really blow the batter's mind. Then there's a further choice of whereabouts the ball is aimed: up, down, left, right and centre. Then the pitcher winds up and throws.

Meanwhite, down at the plate, the batter has picked his shot and chooses his moment to strike at the ball. If he misses, then the backstop moves to catch the ball, and the umpire delivers his verdict: was the ball a strike? A hitter gets three strikes in which to hit the ball, after that he's out. If the pitcher throws four balls (what you cricket, types would call a no ball, I guess), the hitter gets to walk to first base.

If the hitter connects, the game moves to a view of the whole pitch, with the ball bouncing harmiessly out of bounds, or straight into the arms of a fielder, or, as you hope, streaking for the boundary. Then the fielders have to collect the ball and get it back to the bases. During this time, the fielding player gets to move the fielders around and choose where the ball gets thrown, again by using a menu and moving the joystick and pressing fire. The hitter from a menu to stay where he is, or run on to the next base.

One or two players can participate in Hardball. After three men are out, the teams change over. After both sides have been in nine times, the match is over. Each time a man gets round the bases, a point is scored. If the scores are level after nine innings, the game continues until one side wins.

FORWARD & RUN TO 2nd
LEFT & RUN TO 3rd
FORWARD & RUN TO HOME
RIGHT & INNING 3
USTR O BALL O STRIKE 3

Every pitcher tells a story. Strike three, and the batter's out

CRITICISM

O'' This game has some of the slickest presentation I've ever seen on a Spectrum. The animation on the pitching screen is really rice, coupled with the use of some very pretty shading. And all through the game, there are pienty of decisions to keep your interest up. Only two things mar an otherwise neat game; it's really hard to play, and it hangs around too long on the fielding screen. That coupled with the fact that I don't find baseball the world's most exciting game make this one a near miss for me, although I can see that a lot of hard work went in to making it this good."

 "Its strange to see yet another Baseball simulation on the Speccy as it is a sport that has a relatively small following in the UK. This is more pleasing to play than imagine is international Baseball as it has captured more of the spirit of the game. The graphics are a bit of a mixed bag. The pitching screen is very well drawn, there are some nice large characters and lots of colour. The playing field, however, leaves a little to be desired. The sound is adequate but not brilliant, the effects are fairly extensive but the tune is poor. The only thing that I really disliked about Hardball is that it takes a lot of practice to get anywhere, though once you do, it becomes very addictive and playable too."

•" With my limited knowledge of baseball and the fact I find the sport rather tedious to watch, I entered this game with a certain air of scepticism. To my surprise, I totally enjoyed playing it and as far as I can tell it covered all aspects of the sport, with the bonus of being able to change players as required. The graphics and animation of the pitcher and the batter are superb, some of the best I've seen on the Spectrum, I preferred pitching as I found I could do no end of fastballs and curves. On the other hand, I could never hit the ball when batting. All in all, a very impressive baseball simulation and I'm sure it will do wonders for promoting the sport.

The ball's streaking towards the boundary, none of the bases are covered, and Casey's trying for a home run

THE HAPPIEST DAYS OF YOUR LIFE

Producer: Firebird Retail Price: £1.99 Author: Martin Sherlock

The Happiest Days of your Life is a sort of academic Who Dunnit? with you playing the role of chief suspect schoolboy. The Headmaster has had his wallet stolen and is understandably rather miffed about the whole affair. Because you're known as a bit of a tearaway the blame falls naturally on you. A severe caning, a very sore rump and expulsion are all on the cards unless you can clear your name.

The only way to prevent this chain of events from taking place is by roaming around the school and town, collecting items and taking them to the right place to help prove your innocence.

There is something very strange about this school. Instead of meeting fellow students, all the hero encounters are weird objects which suddenly spring to life when he walks into a room and do their best to keep him away from essential objects. Contact with the nasties results in the loss of energy, displayed on a bar in the status area. Grub can be collected here and there for a boost, but once the bar reaches zero one of the three lives is lost.

As in the MIKRO-GEN classic, Everyone's A Wally the hero can only carry two objects at a time, and walking over a collectable item swaps it for one of the objects shown in the status area. This particular schoolboy can walk left and right or jump into the air — useful if you want to avoid swapping objects in a location. A wide variety of items can be found in the game, including chalks, a mortar board, a pound note and a betting slip! Each location has a name — which sometimes helps to identify the task that needs to be undertaken there... Some of the locations in town are not exactly the sort of place a schoolboy should find himself in — Including a pub, betting shop and dinny nightfellib.

shop and dingy nightclub.

The aim of the game is to find the headmaster's wallet and maybe collect a little bit of photographic evidence to prove your innocence while you're at it. Making a map would be a good starting

CRITICISM

"This is the first disappointing release out of many from since the PCW show. It's a great pity as I was beginning to

have high hopes for FIREAIRO'S Silver Range. Graphically, The Happiest Days of Your Life resembles the MKRO-GEN classic Everyone's a Wally in that all the scenes are similar and they are also laid out in a similar way. The characters are fairly well detailed but animated badly and the sound is dire—there are no tunes and very few effects. I didn't really enjoy playing this one as it is unoriginal and badly presented."

"When you get a character in the games market that has been as successful as Wally has, you are bound to find some clones popping up. Happiest Days is a superboopy of Everyone's A Wally but without all the other characters. I hope the programmers won't be angry with me for saying that It's a copy — they should be proud of this game. I'm sure it will be very successful at £1.99. The game features all the quirks of the old Wally games, even down to the colour clash. I'm sure that there's still a market for this type of game, but only in the budget market — Happiest Days may have got it all sewn up before anyone else has a chance, though..."

"If you are a Wally Week fan, currently sulking because Miknosen have abandoned your hero,

• "If you are a Wally Week fan, currently sulking because MIKROsen have abandoned your hero, fret no more, Here's a game in the same mould, only the price is much more interesting! This is a very neat clone of the game style made famous by Everyone's A Wally, and should appeal to anyone who isn't yet tired of the format. There's nothing original here, but lovers of puzzle and mapping games should find this a worthwhile purchase."

WE TRAX

Producer: Argus Press Retail Price: £9.95 Author: Binary Design

ust how do you avoid post-holocaust hassles? You seal up the portals in space and time which were ripped open when the bombs went off, that's how! To

the bombs went off, that's how! To do this, though, you need to pacify the Eight Minds by returning their Character Items to them, and then seal the Portals Through Time by casting the correct spell...

The game starts in your living room, where you must find a weapon. So, you need to search behind the bookcases, under the setee, in the bins, and so on, until you find a run and some ammuniyou find a gun and some ammunition. Thus equipped, you are ready to face the rigours of time travel. What this amounts to is yet more tramping around, searching every-thing in sight. There are many dif-ferent time zones to explore, each with a distinctive graphical style.

To complete the quest you must find objects which will appease the Minds. The Minds will then feel in a generous mood and give you a rune or two. These runes must be correctly assembled in a cosmic pattern. Fortunately, scrolls can be found which give you a clue to the correct orientation of the runes, and you are also told how close you have got to the correct orien-

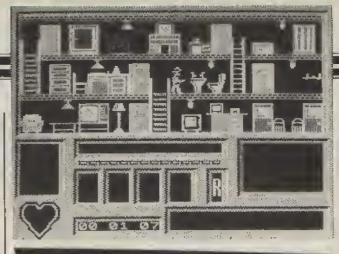

You can move your character

left or right and up or down ladders. You can also leap left or right, fire whatever weapon is in your possession or enter an options mode. This gives you access to a scroling menu at the bottom of the screen which can be used to search, pick up, use or haggle with any minds you might meet.

Travelling around the three screens of a time zone is simple, you just go through various doors and openings. Getting between time zones is a little trickier — you either have to cast a spell, which uses up precious runes, or wait until a time portal shows up. These turn up at regular intervals, so like many aspects of life, it's basically a case of being in the right place at the right time ...

CRITICISM

 "The graphics in this game are varied—some screams have lots of colour and detail, while others look like a bad case of whitewashing. The animation is fine but nothing worth shouting about. One annoying feature is that although your character always carries a gun, it's useless until the bullets are found and loaded. This can result in several very short games. The bullets and just about anything else are found by detailed searching.

Right at the beginning of TIME TRAX, the first task is to find a

This leads to a very slow and frustrating game, and it's this lack of pace that spoils an other-wise well executed game. There's plenty to do but none of it is all that interesting. Suffice to say that those interested in long, drawn out and difficult arcade adventures will find something to their liking. Others are less likely to be impressed."

 "Time Trax is a strange game to play and until you begin to understand how the game works it can be very unrewarding. If you stick with it and learn the 'physics' of the game it can become quite playable, however. The graphics are on the small and undetailed side but they are quite adequate, There is a lot of colour on screen, so when your character walks around a fair bit of attribute clash is generated. The sound is poor. there are no tunes and the use of effects is minimal. If you like strategy games then this one may well be for you, but as there is very little in the way of arcade action I couldn't play Time Trax for too long as it got fairly monotonous."

 "What a strange game Time
 Trax is. At first it looks extremly complex and off-putting, but a few minutes play reveals that this is guite a simple tittle game to play. The graphics look very Young Ones-ish, and all the little characters are drawn with accuracy — but a bit too small for any decent animation. The screen layout is very smart and the options mode is extremly easy to use. I felt that the game was instantly addictive but the appeal soon wore off after a few games. The instruction book is well written and reveals all the little quirks of the game. The idea of swapping time zones was quite good, but I still wasn't too impre-ssed with it."

COMMENTS

Control keys: definable: up, down, left, right, fire Joystick: Kempston, Cursor, Interface 2 Keyboard play: a bit sluggish Use of colour: plentiful, at the expense of clash Graphics: a little primitive Sound: minimal effects Skill levels; one Screens: 21 General rating; An interesting game with strategic elements strategists might complain, though!

The hero wanders around a strange jungle village in TIME TRAX. Below the main playscreen, the game control console reveals that some poison is in the inventory

CAPTAIN KELLY

Producer: Quicksilva Retail Price: £8.95 Author: Icon Design

aptain Kelly was a 'space hopper'—a pilot who treks from the Moon to the Earth and back, day in, day out. A new job was what he desperately needed, one with prospects and plenty of travelling. Oh, and lots of

money.

Whilst browsing through the Space Gazette one day, he saw an advert: 'See the universe and make Mega Credits'. How could he resist? He didn't. He applied, he didn't, he surprise Kelly and much to his surprise, Kelly

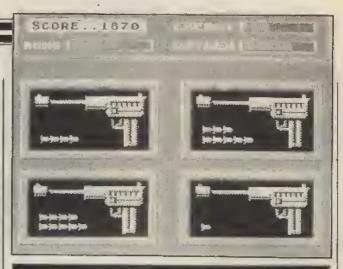

was taken on immediately.

At first the job seemed ideal simply picking up newly finished spaceships and delivering them to clients — rather shady clients at that. Unfortunately, the job began Somehow, he had to reclaim con-trol of the ship from the robots and make his delivery on time. These robots are not stupid by

any means. The entire ship is a robot's playground. As well as the numerous robots on each level of the ship, there are robot repair bays which re-activate droids that have been knocked out of action.

There are seven levels of the ship and five robots per level. Robots can be disabled by using a laser gun. However, Kelly has a limited amount of ammunition and each droid requires several blasts to kill. Extra ammunition can be found around the ship, but it is heavily guarded.

To make matters worse, Kelly has a limited amount of oxygen and energy. When either of these vital commodities runs out, his life support systems cease to function

The armoury sequence, in which the Captain gets a chance to restock his ammo — stop the guns as they file past to choose

CRITICISM

 "What's this, get rid of the nasty robots wandering over the rai levels of your space

"Captain Kelly immediately reminded me of Quazatron, only reminded me of Quazatron, only viewed from above. Although I found the basic look of the game very pleasant and appealing. I found it very boring and hard to get into. The sound effects are extremely good and the title screen features a very good twochannel tune. The game features some reasonably last scrolling, but the movement of the characters is very slow. The scenario on the inlay is very well written and the inlay is very well written and the way the instructions are faid out is very good, giving you a quick idea of what the game is all about. Captain Kelly has excellent presentation — it's just boring to play." play.

 "This is a rather dull little shoot 'em up. Nothing much to recom-mend: it's much the same as any other blast away game. There are a few nice bits of tactics, like getting the robots to shoot each other, but essentially it's just a matter of blazing away. The infirmary is rather silly, pounding away on the keyboard decathaion style to get the guy to rotate in order to restore energy. But don't get too good —if your energy goes over 100 per cent, the game crashes!

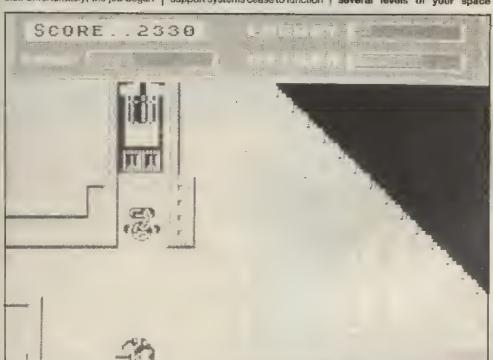

COMMENTS

Control keys: redefinable Joystick: Kempston, Interface 2 Keyboard play: adequate Use of colour: pale effect overall Graphics: two dimensional flat

Sound: funky little tune at the beginning and spot effects throughout

Skill levels: seven Screens: scrolling play area General rating: Nothing remarkable here . . .

Use of computer 76% 75% Graphics Playability 65% Getting started Addictive qualities 79% 62% Value for money 57% Overall 63%

Looking down on Captain Kelly who's in a bit of a comer — he the little guy with the space helmet and oxygen tank on his back. There's a dirty great tank at his front, too

to go drastically wrong when Kelly tried to get into one of the robot controlled mining traders.

Usually, when a pilot inserts a credit disc it disables all security systems inside the ship. Not so this time. Unwittingly, Captain Kelly stumped inside. And It was only then did he realise to his horfor that although the security system lets people inside the complex with no trouble, it just won't let them out again. At least not in one

piece, anyway.

And so, Captain Kelly came to face the hardest mission of his life.

and he dies. Fortunately, energy can be replenished by entering one of the many infirmaries around the ship.

Status reports can be accessed from various points around the ship. These detail how many robots have been destroyed and how many are still intact.

Kelly moves around the ship on foot but he can use the teleports scattered around the ship to transfer him to different levels. Kelly's got a real problem on his hands maybe driving to the Moon and back was a nice job after ail!

ship. I think I've heard that one before somewhere. I honestly wonder if this game was written on ourcessive's new games designer as it isn't at all professional. The graphics are on the whole quite colourful, but the playing area lacks a lot of detail and the characters are badly animated. The best thing about Captain Kelly is the sound track; there's a lovely tune on the title screen and the odd spot effect screen and the odd spot effect during play. The game is very easy to get into as it doesn't really involve any thinking, but because it is so easy it gets monotonous very quickly. On the whole Captain Kelly is not playable or compelling. playable or compelling, so I wouldn't splash out any of your hard earned cash on it." hard earned cash on it.

FICTION ...

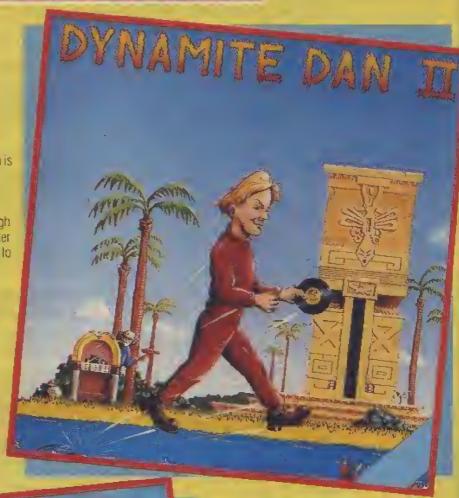

Dr Blitzen and the Islands of Arcanum

Dr Blitzen's latest ploy to gain global domination is to brainwash the youth of the world by including subliminal sound waves in pop records, so Dynamite Dan has been recalled to divert the dastardly doctor once more. He must hunt through all eight islands at Arcanum, picking up the master disc from each, and piece together the password to destroy the pressing plant.

"Very playable and addictive, I strongly recommend it to everyone ... A great game .. superb value for money" **Crash**

Life is hotting up as it usually does at this time of year. You may think it poor that Christmas begins in mid-October these days, when all the pretty, pretty Chrissy trees go up on the storefronts, but at CRASH Towers, Christmas began in June with the first discussions of what would go in the Christmas Special issue and, more importantly, how the team would cope with all the strain! Now it's really getting near, frightening isn't it?

Lots of fine letters this month, bash and counter bash, and counter to the counter bash.

counter-counter bash. For the £20 worth of software for letter of the month, I chose this one from a parent for a change

CHANGES, CHANGES

•

When I started the software was amazingly simple, like being a king and having to feed the peasants for seven years to complete the game, yet it was fun and pretty tricky stuff. Now my boys can come home with games that are truly amazing. I can use machine code to a fair degree yet still find the games absolutely fantestic. How do they do it? Surely the software capabilities of the

machine have surpassed what Sir Clive originally intended for his baby?

I noted a letter in your Sep-tember issue from Brian Gillespie saying he felt a lot of innocence had gone from the software mar-ket. On how true! I remember reading articles about games authors who with one disk drive wrote really good stuff in their back rooms. It was a fun time then and one fell just mäybe you could

achieve this yourself. Of course now games are written by teams of people each working on a sepa-rate slice. It is a shame but in your magazine you hear so many complaints about the quality of software that the houses had to become more professional. You can't have it both ways!
As for advertising, if you spend

large amounts of money in creat-ing a game then you've got to sell a lot of copies. We know this large colourful advertising works from the letters you get from people who rush out to buy a game on the strength of an advert even before it is released. Also regarding advartising, your cover price would be astronomical if it wasn't for the large adverts you carry. used to sell space and know all used to sen space and know all about the discount jungle, so just tell them to stick it 'cause you're Not for Spectrum games players, so my boys tell me, all their Iriends read CRASH or ZZAP! depending on 'religion'.

Finally, we must all face facts, the Spectrum is not the best home. computer you can get even for the money, but we're loyal. Right guys? If it hadn't been for Sir Clive we'd all be playing paddle tennis instead of Ghosts n Goblins. Power to your albow Lloyd, I'm sure we'll be reading CRASH for many years to come. Paul Tyler, Mitcham, Surrey

That's the kind of thing I like to hear! How could any machine in such a fast moving market remain the best value around for ever? Yet the Spectrum has continued to keep pace with all the others simply because it allowed such flexibility in programming from the outsel, that programmers have always managed to better them-selves year alter year. And long may it continue. Thank you for your comments, Paul, your software choice should be on its way soon.

ABSENT FRIENDS

Dear Lloyd (What's a camera?)

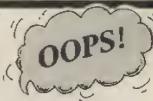

Mangram,
I've got a mighty big bone to pick
with you, WHY, WHY, WHY,
weren't Hannah Smith, Roger
Kean, Oli Frey, Del Brewster, etc.
etc at the PCW show on Friday? Eh? You just tell me that! All the people I saw that were on the Newsfield stand were Sean Masterson, some bloke called

Kavenagh and a woman called Frances as well as other unknowns. Even Penn and Rignall would've done. I felt so annoyed that I wandered over to the EMAP stand and stuck C&VG and Sinclair User Stickers ALL OVER my CRASH sweatshirt, So there!

Yours, Mathew Clarke PS I'm still your friend PPS Tell Hannah Smith she's

sexier than Melissa Ravenflame. The picture of her on the cover of CRASH 31 really turned me on!

Derek certainly wasn't at the show, and Oliver made it down for the Saturday and Sunday as did Han-nah, sorry you missed her on Fri-day. But everyone else was there, Roger definitely was and so were Penn, Rignall, Aunt Aggie (aka Carol Kinsey) and Ben Stone. Not only is Hannah sexier than Ms Ravenflame, she's somehow much more...REAL

Dear Lloyd, We are one of the retailers featured in the READER INFORMATION SERVICE DIRECTORY in Sep-tember's CRASH and are grateful for your free service, but would like to point out to your readers that our telephone number is in fact, CORSHAM (0249) 712653 and not as published.

I hope this will help those who have tried to reach us without suc-cess. Thank you once again for your help and support.

Yours sincerely, G Randall, SOFTWARE MAN-AGER, Gerard's Software, Corsham

Sorry Mr Randall, obviously a typesetting slip up in some department or other! I hope that puts the matter right (but has anyone from editorial passed the information on to whatever department it is made the slip up)?

UNRELIABLE

Dear Lloyd, Having read your PCW show pre-view in the October issue of person there were won terms that personated me to venture up to Olympia on Friday 5th September of this year. They we're the release of sure's much awaited Paperboy and this special offer of pomark's Trivial Pursuit. On arriving at "the event of the year in the games

told by DOMARK's representative that all copies of the above men-tioned *Trivial Pursuit* were on sale for £10 and I discovered that ELITE now plan on releasing Paperboy later this month.

Being a student, d was no mean feat scrounging up the £7 train fare and the £3 entrance fee (including

In the past. I have never had any complaints to make about CRASH, in fact it has been the best CHASH, in retritines beginnedes Spectrum publication by far for a long time, but after this total lack of reliability, famno longer so sure. I hope you can restore my faith in the next few issues. IM Orford, Billericay, Essex

ihope we can too, but information given in advance of any event is taken on its face value, and a month (between publishing and the event) is a long time. Time enough for people to alter their

39

A LITTLE COMPUTER PERSON

Dear Lloyd, Ha, so you've all been wondering where old Robin is then. Well I am the proud owner of one Robin Candy. I bought him at a market in Milton Keynes from this little old woman on a stall selling CRASH backnumbers (now you know why they are running out). He was so mega cheap l just couldn't refuse. a real Candy cage and adoption papers free, yes free! I'm sure this woman said,

'bye,son,' as Hed him away tugging at his chain. I suppose his grunts meant roughly, 'mother,

don't sell me, well not this cheaply

anyway." He's not been the same recently since his supply of CRASH coffee (or is it soup) ran out, I just had to teed him on Hannah's playing tips instead (sorry Hannah) he seemed

to enjoy ripping them to pieces. I will let Candy free for such a small price [feel I'm ripping myself off, all you have to do is make my letter Star Letter. Maybe that should be the other way round, I'll let Candy loose if you don't make this the Star Letter (sorry to have to make threats against you but

I'm in bad need of some new software). Just think, such a small price to pay to be sure of never having Candy soil the threshold of the world famous (nearly) CRASH Towers

Batman and Robin, Brickhill, **Bedford**

Okay Robin, stop writing these 'keep my name on the pages' let-ters or there'll be trouble. You can't fool me with a fake Bedford post stamp . .

THREE POINT TURN

Dear Mangram-thing, I've got a lot to gell through so I'll start immediately.

1. ADS. I must agree with Michael Imprato (issue 32). Many (but not all) advertisements consist of a whole page, devoted to the game's title—Revenge of the Inland Revenue, and a drawing of said leering taxman brandishing his 3 foot long poisoned rollerball — nothing else. No helpful screen shots, no caption explaining what you must do in the game, whether 's an adventure or an arcade game, and sometimes not even a price! This means you know more about how a good ertist is than

how good a game is.

2. MiNSON. Why doesn't this moren push off and do monthly recipes in WOMAN magazine. We want to know about latest launches not latest lunches. His page can, on occasion be amus-ing, but let's have a bit more relevance, huh?

the utterly unreasonable way the comps minion is treated. (cue violins). This poor, defenceless wretch seems beset by every sort of torture and humiliation you evil lot can devise. Shame! Anyway,

3. I am forced to complain about

this has got to stop. I hereby announce the formation of S.P.U.T.U.M. — Society for the Protection of Underprivilged and Totally Unappreciated Minions. This gratuitous violence will cease immediately - or there'll be trou-

Connor Carson, Donaghadee, Co Down PS Go get her Hannah!

Yes, some ads are a bit minimal in concept, on the other hand. they might well become a bit tedious to look at if they get too technical and informative. Still. there's obviously a balance to be found. Minson irrelevant!? He's the epitome of relevancy, a fearless writer who tells it like it is. You think the games business is all fun, all playing games all day. Well let me tell you it's not. There's a lot of hard drinking, loud shouting and unquiet Hawailan shirts to get through before your average computer hack can drop into his unmade bed. Same goes for comps minions (or is that 'comps minsions')?

+-+-+ **DOUBLY CROSSED**

Dear Lloyd, In reply to Amstrad's launching of the new Spectrum I would just like to say I am a bit angry. I bought my Spectrum Plus ten months and Within a year of buying my computer, two other Spectrums have been launched, each one better than the other. I would just like to

say two things:

1. When is this going to stop and
2. Can I get my Spectrum
upgraded by Amstrad? Thomas Greenan, Castlepark,

Annoying, isn't it. But exactly the same thing happened to Amstrad owners, Amstrad seem hell bent on producing new machines, some compatible and some not, at a furious pace without much care for the consumer who buys early. In answer; I've no idea whether it's going to stop, but I doubt it, and I would be surprised if Amstrad upgraded your machine

THE JERRY BACKLASH

Dear CRASH. I really think all these arguments about violence and sexual over nah Smith mud wrestling with Melissa Paving Slab it looked nothing like her, and if this C&VG (eek) tipster is all woman why does she sign her name Jerry Ross? Yours Domark Fraggle, New England, Peterborough

ROSS

tones have gone to Oli's head, i mean look at his drawing of Han-

Good point, why does she?

REVAMPING

l am about to exagerate a little but if you think about what I am about

to say it is quite possible. The Spectrum 128K flopped as it was

Spectrum 129K nopped as it was not devastatingly different to other computers so no-one wanted to fork out the money before there was any software. In my opinion the next big selling computer will have to knock socks off the Spectrum and Commoders 64 for the

trum and Commodore 64 for the same price tag. How, I here you say, can this be done? I'm not

intending that what I'm about to say should be done but it is to

say should be done but it is to prove it is possible.

The late great OL is one hell of a piece of hardware underneath its bad publicity. It failed the business market as people thought it was too cheap to be good and it failed the garnes market as few kids have £400 knocking about. If you put a three channel sound chip into a OL what have you got? Agarnes computer with 128K memory, twice as good graphics as a Spectrum, 8

good graphics as a Spectrum, 8 colours per square, 3 channel sound. In plain English a computer capable of producing games which would out do the best

games or any of the big selling imes machines at the moment. The present price of a QL is £160

and that includes a printer from all Dixon stores. The Spectrum 128K

osts £139 now and is far inferio

to such a computer. Now then 'you may say. People don't want a computer that's not compatible with a Spectrum. This ign't true.

Most people who bought a 128K Spectrum kept their old Spectrum

Spectrum kept their old Spectrum
as everyone who wants a computer has arready got one and there
is nobody to sell it to:

1 personally would keep my

I personally would keep my Spectrum no matter whether lought a new computer which was absolutely 100% compatible with it. Second hand Spectrums are not in demand and if by chance you could self it you would only get \$20 or so for it. To have it as a space is worth more than that. So, a new chimpular need out he com-

a new computer need not be com-patible to be able to sell well.

Paul Fravigar, Skegness, Lincs

Now there's an original thought. Perhaps the QL could see a new lease of life after all! Of course it uses a 68,000 processor, which to

soes a do usu processor, which to some degree puts it in with the Atan ST and Mac. Maybe a naw mag catering for those machines would also help who knows . . . ? LM

MINSON FAN

Dear Lloyd, Just a quick few words to tell the critics in the mould of Philip Cog-gins and Mr Evans to leave Mr Minson alone! Just imagine how dull the page would be if he gave an everyday account of his travels, for "And then I went to микло-сем's offices, saw a game in the pipeline called *The All-new* Wally Week Garne, had lunch went back to CRASH Towers. See how boring it could be? Some spice is needed, no matter what So keep up the good work Mr Min-son (and CRASH)! P Hindle, Lancing, Sussex

PS Tell Mr Minson that I found a half-eaten Barret Sherbet Fountain the other day in Tesco's freezer. He is welcome to it!

I guess that would sound duft. Even duller would be nothing on the page at all. That would be cheaper though — perhaps I should suggest this upwards in the hope that the Minson fee comes downward in my direction, which would be a help what with the new Sufton's seed catalogue out and an early planting start to make after the Yuletide festivities LM

KEEP IT LIKE IT IS!

Dear Lloyd, I am writing to comment on complaints suggesting that the 'Fear and Loathing articles are too adult and boring, and CRASH Course is useless as the average CRASH reader is a teenager.

If CRASH catered only for the average reader, look what would have happened to last month's

The average reader is a games player, so out would go Tech-Niche, CRASH Course, The Gal-

lery and Fear and Loathing. The average game-player plays arcade games, so it would be goodbye to Adventure Trail, Sign Stumps, Front-Line, PBM Mail-box, the adventure Charts and the Stretching Computer Games fea-

So what are we left with?

The Editorial, News, Forum, Hotline charts, the Hall of Slime, Playing Tips, Merely Mangram and the Lunar Jetman Cartoon.

That may look quite a lot, but it is only 68 readable pages, com-pared with 82 pages now!! (This doesn't include adverts)

What a waste of time CRASH would be if those whining simps had their way. Hike CRASH just as

it is, Thanks. Nat Pryce, Rediand, Bristol

Right! And (by your calculations) 14 pages against 66 doesn't eat up too much of the mainstream stuff either, does it? Life has more to entier, toes for the has more to offer than the obvious, and you should selze it when it's there. Thank you, Nat, for a dollop of common sense.

er Lloyd, Ifelt I must write to you after read-ing your letters page, especially Lee Sayers' letter. I also bought my 128K within months of it being launched, and frankly I feel did-dled. We were promised lots of new releases for the new computerbut to date all I have seen are a few revamped programs that have had made adequate use of the 128's excellent sound chip, and only a few have been expanded to make use of the vast amount of memory. Why oh why aren't any of

NO LAUGHING MATTER

Dear Lloyd, in the October CRASH your Competition Minion made a mistake. In the WAR wordsquare you have LAMAR wordsquare you have LAMAR written down as a word to find, but it cannot be found in the square. The nearest word to it is DALOH on the end of HEAD. Phineas Huggett, Eastbourne,

It's simply a matter of the Gomps Minion having the last laugh, huh? Never mind Phineas, like everyone else you were stuck with the same wordsquare, so it didn't make the competition any worse for you.

the software houses being brave and writing games for the 128?

My other gripe is that on the subect of the orus Discovery system, feel that software companies haven't really taken advantage of this excellent system. Games such as Elitecould have made a real use from the Disk System. The game could have been expanded with many more by having the flying and docking loading separately. On this subject may I say thanks to software PROJECTS for putting. Dragons Lair on diskt even as I write this letter my tape and four pounds are winging their way to SOFTWARE PROJECTS in exchange for a disk version of their game. So come on all of you software companies put your games on disks, I would be quite happy to splash out the extra money for advanced speed. This would save me a lot of time in transferring all my games to my opus system as well. Robert Bain, Blandford, Dorset

It is indeed a shame that the Opus Disk drive has not been pushed more, since with more exposure and software for it, more Spectrum owners may have opted for pur-chasing it. This kind of feedback effect always has enormous benefits for everyone in the long

Name		Address	

128 SLAMMED

Since (as you so correctly pointed out) there will no doubt be a massive uproar about N Potter's letter (Forum 32), I thought I'd be different and defend him.

I'll start with the standard 48K Spectrum. In its day, This was a very good machine, but its day has long gone (it was already fading when the Plus was introduced). Yes, the programmers still do amazing things with it, but what right does that give anyone to condem someone who speaks the ruth and admits the Spectrum is outdated. True, the C64 is also based on outdated technology. but it is better implemented — its faults, bad BASIC and the need to use a dedicated tape deck are curable, attribute clash and terrible sound are not (yes there are addon sound boxes but who supports

On to the much talked about (but little bought) Spectrum 128K. This machine is a joke! What's it got over the 48K? More memory —fair enough — I concede on this point. Better sound — hah! If the Spectrum is outdated, the AY chip is positively prehistoric! It doesn't have proper envelope control — just a few preset shapes. Compare this to the SID chip used in the C64 on the other hand, don't --- there is no comparison. The best way to do this is to visit your local compu-ter and get them to put a game on both the Amstrad (which uses the AYchip) and the C64. Listen to the difference - I rest my case. As to how Sinclair has written the ROM sound routine - that's the best of The whole point of having a sound chip is to take the load off

the CPU so it can get on while the note is sounded. So what does Uncle Clive do — he makes it so the computer stops while it plays a note — brilliant!!

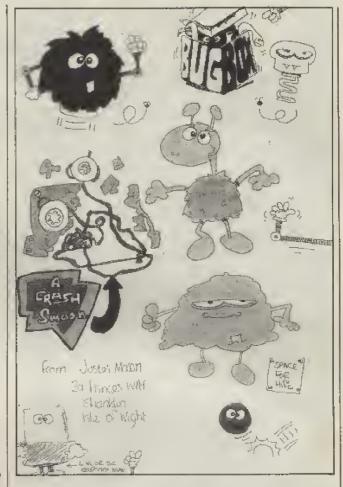

To capitall, Uncle Cimissed his final chance to use a proper keyboard. I'm sorry, I couldn't recommend the 128 to anyone.

Personally, when I get rid of my Spectrum at the end of the year. I'll be buying a C1280. These may not come cheap, but you do get 3 computers for your money.

Games—use 64 mode. Programming—128 mode has one of the best BASICs available. Serious programs — depends on your wal-let size — most Spectrum utilities are also out on the 64 — there quite a few American 128 utilities -for the rich, just switch on CP/M mode.

However, I will stay loyal to CRASH, I've got quite attached to it and could never get into ZZAP! PA Rasbotham, Garswood, Wigan, Lancs

I'm not surprised, such an unpleasant bunch those ZZAP! people! Your opinions are obviously strong on the 128, and I'm not saying they're unfounded either. But whether the plus and 48K have really had their day is another matter. What counts, surely, is the quality of software available. Compare it with a book. Do you decide that just because books have been around a long while (regardless of what's written on the page) it's time to throw them away, It is the book that matters, it's the novel contained on its pages that counts.

FIRE FIGHTING

Could you please ask Hannah Smith when she is going to publish the second half of *The Incredible* Shrinking Fireman solution. The first part was published in Issue 29 (June 86). I'd be most grateful.

Also, could you print my Address because I would like a Pen Pai that has a 48k Spectrum. I am 14 years of age and I have wanted a pen pai for quite a long

David Thompson, 21 Win-chcombe Road, Alcester, War-wickshire, 849 6QL

Hannah telis me she thinks she already has printed it, but perhaps she's become confused by all the recent raving fame. Still, there's a map this month and hopefully the solution (again?) next month.

HIDDEN LEVELS

Dear Lloyd,

Did you realise that CRASH is read by the third best group in the world? (The first and second are not WHAMI) Yes, LEVEL 42 read CRASH! Now listen up, and I'll start from the beginning.

Awhile back I purchased a copy of LEVEL 42's latest album entitled World Machine. It wasn't until now that I noticed this part of the lyric in a song called *Dream Crazy*:

"Stand easy, It's a party CRASH so sleezy lets make a SMASH. Cool covers, set the scene, dive into the neon LOVE MACHINE"

Take a look at those lyrics....notice anything? take a look below.

 The first part mentions the name of your ULTRA-FANTAS-TICO magazine.

2. The second bit mentions the word Smash which I'm sure my fellow readers are familiar with.

The third section mentions 'cool covers', can they be referring to Oli Frey?

4. The last bit has got something about a 'neon love machine', this thing is probably a Spectrum. Now lets translate the song:

Don't panic CRASH are gonna give us a review in a party Xmas special, Let's make it good and they might give us a Smash, If they draw us on the cover it'll be great, So dive into my cupboard and pass me that Spectrum'. Chris Willis, London NI6

Seems to be an irrefutable analysis of the lyrics to me, Chris. Hello Level 42, howre'you doing?

aving owned my Spectrum for 3 ears. Thave watched the software years, I have watched the software industry grow from strength to strength for strength with releases such as JSW/Menic Miner, Sabre Wulf, Underwurde, Kriight: oftenid the more recent Way of the Explicating Sist. All of these releases were original, excellent games, outshining all other games on the market, and are well remembered for doing so

throughs like this are nearing extinction and we have to be conlent with either sequels [Dynamile Dan II, Cauldron III, copies of ear-ler hits (Batman, Bobby Bearing) or arcade conversions (Ping Pong, Ghosts in Geblins).

eem to have blamed ut mare for his, lord knows why, they are the only company that I can think of

Instruction of the state of the state of the state of the spectrum for so long against those homble C64 ewners. I will continue to do so, in hope that the recent software slump will pick up after the PCW show in time to the some my Christmas stocking with some g original stuff.

Änne (yes, a girl) Poulton Wokingham, Berkshire

Perhaps we're all being a bit-Impa-tient. It took a couple of years before the real clever break-through started to happen on the software scene. Since then they have come thick and fast enough. yet if you look back, everything takes its own time. I'm convinced

THE REVIEWERS REVIEWED!

Dear Lloyd, In Issue 33, Thomas Connolly and Andrew Thorpe were criticising Sinclair User, Your Sinclair etc. Thavedrawn up a little benchtestette (look that one up in LMLWD), for CRASH, SU and YS.

These tests are for the October issues of the mags. CRASH SU

Cornes: Colour pages: Adverts: Pages of letters: Pages of tips: Number of Tips: Average review space: Screenshots:	27 31 2 2 53 47 49 51 2 3 2 Free tips special 5 Free tips special half half 76 60

COMMENTS

Crash: long reviews, descriptive SU: longish reviews, quite basic YS: Shortish reviews, full of wit.

RATINGS

Crash: includes criticisms, game keys and 15 other rating factors, SU: includes hintstrips, facts box. Uses very ancient 'stars' system. YS: has 4 rating factors and a mark out of ten.

Crash: Excellent, more than SU and YS. Good variety.
SU: Bad, normally 2 month old tips copied from Crash.
YS: Quite g _____ few screenshots, postermap every month.

Crash: Great mag. Original and full of colour. Lots of clear reviews. There is something for everyone in CRASHI, lots of features, I mean variety is the spice of CRASHI SU: Oute nice. Used to be rubbish but copied CRASH with col-

oured, large reviews. YS: Good, Emphasis on different printfaces, Nice and witty and col-ourful. Lots of 'useless wit' which does nothing for you but makes

Well there it is. You have the evidence. Please print this, if only to serve as a guideline for any prospective buyer of magazines Paul Bell, Lanchester, CO Durham

Thank you for the hard work, Paul. You've saved our statistics department hours of labour!

CRIMINAL BEHAVIOUR

.....

Dear Mr Mangram, We, in Portugal, usually can find a pirated copy of a new release at about the same time it's faunched in England. While this may seem strange to you, that's about all we get; I've never seen an original game cassette for sale in a shop. A pirated copy of any game costs a quid, give and take 50p, and if you play honest and write a British software house you get your money back (sometimes) with a letter apologizing, but "we don't

sell software to Portugal due to the piracy over there", Who's to blame, then?

Joao Paulo F A Carvalho, Loures, Portugal

Indeed, who is to blame? Frankly, if civilised countries can't act in a decent and proper manner, then there's no reason why any software house should either bother with them or the citizens within their borders.

HE FINAL

have been an avid reader of CRASH since Issue 2, (unfortunately, I missed No 1) and thoroughly enjoy most of it! I never used to read Forum until a month or so ago and this month I'm glad

saw a letter from US GOLD referring to World Cup Carnival. I must admit I was amused to read their excuses for releasing an old game

with a new title.

Being a married man with a young son, I don't often find the cash to buy new software, so, as you can appreciate I tend to be fairly choosy when I buy new games. My biggest passion is Sport, I play football at the weekends and most of the games I buy are Sports simulation — Football Manager, Matchday and Matchpoint, being my favourites, When I saw World Cup Carnival

I thought that this could be a good game to add to my collection. Unfortunately, I became too impatient and bought the game. Impa-tient?? Yes! — I'll explain: Usually, wait until a game is reviewed in CRASH before deciding to buy, but as it hadn't been reviewed at the time I had enough money to buy it, I broke my own rule and took the plunge.

Boy, was I disappointed! Apart

from the lancy wrapping and free badge etc, it was practically an identical copy of ARTIC'S World Cup, (a game I bought quite a while ago for about £5 which is now being sold for £1.99. I paid nearly

With reference to useoLo's well written letter; there are a number of personal observations I'd like to

1. I don't read ZZAP! 64 so I didn't see any screen shots.

2. No-one told me at Boots (Aldershot) where I bought Carnival that it was an 'updated' version of the

ARTIC game.

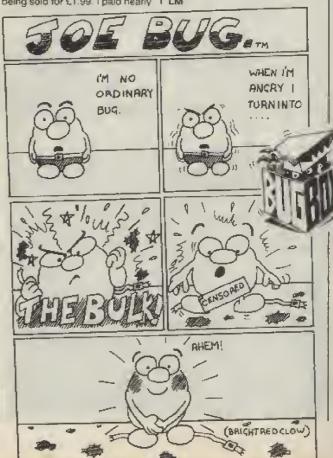

3. I wrote a letter to us coup saying that having been pleased with some of their games, I was dis-gusted that they passed off this game as their own! — They didn't even have the decency to reply! (so much for answering all letters).

To say that Camival was 'to the good of the software market' is in my mind, pure rubbish! I hope you publish this letter so

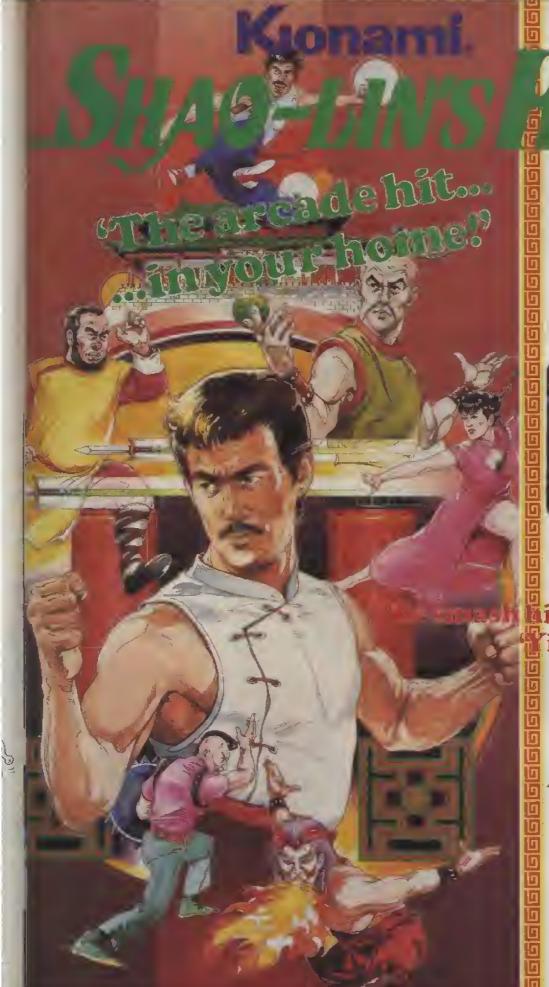

it may encourage other people who have lost a hard-earned £10 on a game that will never be played to add their voices to the protest:

Perhaps software companies who make a good living out of us punters' will start repaying us by not ripping us off. John Miles, Aldershot, Hants

I think your letter makes its own points very succinctly without me adding anything. I'm sure the US Gold reply printed in Forum was well meant in as much as it did admit to original plans going awry, but that's hardly any consolation to those who feel they were taken

software getting harder

HACKED/OFF

Dear Lloyd, I write to you on the subject of hacking. Recently in another Spectrum magazine I saw a whole page of pokes for Eilte, which hacked it to pieces. There were so many different cheats and POKEs from anything between infinite energy bombs to endless fuel, that the game would just be senseless to play. I mean what is the worth of playing Elite where you couldn't die? You wouldn't have any fun, or be achieving anything and the game would just be a bore. You couldn't be credited for

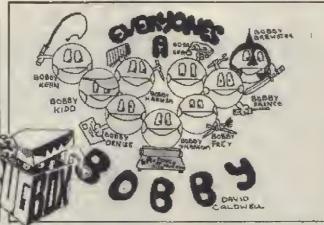

completing that difficult game you had been struggling over if you succumb to the disease of hacking. Some people will argue that there is no point in just leaving a game to gather dust if it's too difficult, you might as well hack it to at least see what the ending's like, but I would rather persevere and be able to say that I completed

it on my own merit. There would be no pleasure or sense of victory if you immediately hacked a game after just buying it. The price tag would be worthless. On the whole I think pokes are a complete waste of time. If you want to admit defeat, poke away

Gary Holloway, Heston,

Hounslow

I don't agree with you at all. There are those who get their fun playing a game on its own merits to the end, there are those who have more fun hacking them, and there are those who get stuck and would give up without some help. As to give up without some neith. As to how much 'help' you take on a game, is obviously up to the individual, and if you wish to persevere to the end on your own — fine let the others enjoy their games in their way.

CRITICAL COMPENDIUM

Having been reading CRASH since Issue 1, I thought it was about time I wrote in. I would just like to raise a few points that have been discussed in the Forum

recently.

1. Minson: Personally I think he writes a very good column. Admit-tedly it has nothing to do with what he is supposed to be reporting on, but it is, in my opinion at least, very entertaining. Keep it up Minson. 2. I must agree with Brian Gil-

lespi that software companies are becoming more and more moneyconscious and less prepared to take risks. I think this is why the 128 is not catching on. It could do with a return of the the 1982 pioneering spirit. I do not think the 128 If will sell either unless the software companies release enough software for it.

3 Valente. Would the people of Tyne and Waar kindly hang, draw and quarter him please?

4. The layout of CRASH. I think that the different types of game should be kept in their own columns. Would you also put the names of the people reviewing a game down so that we can get to know different peoples' tastes.

I think that's about all, except to say better fuck with the runner beans next year

Barnaby Dellar, Stockwell, Lon-

I'm going to plant them a touch earlier next year, perhaps that will help. As you've been a reader of CRASH since the very beginning (and there must be loads more out there in great readerland), how about writing a short essay on how CRASH has changed (or not) over the three years. I would be very interested to hear your views and doubtless so would the rest of the

LM NEW PE

Dear Lloyd,
Just writing you'd letter to test my
new pent, I'll try and write quickly
rose I know you don't have much
time. I've noticed recently that
most of your letters cover a
number of subjects so I'll try to do
the same.

BUDGET SOFTWARE: this has now become big business among software houses with, at a guess af least half of all games being released below the £3 mark and. I HATEIT, Why? Because it is being used as an excuse by authors to write absolute trash. 99% of budget software is of a very low standard indeed and almost certainly wouldn't be released at a price of £5 or more. My plea to software companies is I you wouldn't self at £5 or £6 don't self it, at all; You are just lowering the overall standard of software today. People don't want to buy rubbish no matter how cheap litis. It have bought both Spellbound and Knight Tyme—just wish the rest were as good). e same. BUDGET SOFTWARE: this has

aD.GAMES: In my view, games have very few types of presentation possibilities. The flat side-on technique has been used for many years now and still is with Dynamite Dan II etc but no-one complains. So why should someone being the same 3D technique comes on to the market. It is just another method of presentation den't knock it!

MINSON: Ithink he is great, and sometimes even tunny! He may have a different style of reporting than the rest of the CRASH team, but variety is the spice of life. Or so than CRASH. 3D GAMES: In my view, games

they say.

MANGRAM: Yes you! Personally. I couldn't give a Commodore.

64 (or whathyou really are, As long as you are just being your usual informative, chatty, intelligent self (grovel) then you are fine by me. So stop printing letters with slupid explanations of your being.

Please!

r rease. Well that's it, Good luck with your new magazine. I hope it's as

good as CRASH is now, and that it doesn't go to your head as quickly as Old Flatulance Buter goes to mine! Jeremy Moore, Marsh Baidon,

Woll, we're really having a bash the bashers' session this month, and why not? As to budget software. I think I'm inclined to agree with you. It's always mee to get a really fine game for two quid, but so many are pretty awful. It agree with you. It's always nice to get a really fine game for two quid, but so many are pretty awful. It seems a shame to me that the industry has polarised so much that everything is either under £2 or over £9. Diesn't this mean that somehow reasonable games can be done for around the £6 mark?

I find Minson funny too, especially when he wears a grey shirt and tream tries to look like a fifties. Fleet Street reporter. Great stuff Modesty prevents me from commenting on the rest of your letter.

Electric Dreams Software, 31 Cariton Crescent Southampton, Hampshire SO1 2EW. Tel: (0703) 229694

EXPENSIVE ENTERTAINMENT

Dear Lloyd, With reference to the recent correspondence on the alcoholic propensity of Computer Software journalists such as your own Mr Minson. (P Coggins, September issuel.

It seems to this erudite correspondent that such alchoholic over-indulgence is directly related to another grievance that is often aimed in the pages of your august (not the month, stupid!) publication - that of the extortionate (well, often anyway) price of software. It does not take a genius (like wot I is) to mentally compute that if software houses did not spend so much money on indulging the predefictions of semi-Inabriate epicurian journalists in the hope of a favourable review of their latest offering(s), then they could afford to cut the retail price of their products.

Of course, this alone would not be enough, maybe if said software houses were to restrain them-selves from constantly advertising theirgames months in advance of launch (if, indeed, such products ever come to be launched), the money saved (sorry, Advertising Department!) could be again put towards a price cut.

Finally, full marks to the (beautiful) lady on your stand at the PCW show on Friday who was able, where all others failed, to inform me that INCENTIVE were not exhibiting at the show and thus GAC was not on demonstration (no thanks to INCENTIVE!!). DGW Griffith, Cheltenham, Glos

It's true, of course, that chronically inebriated twisters of prose like Scott FitzMinson, do add up to costing the industry a lot of money. The hardest part of any software launch is to persuade them from the bottle to the screen before they the portie to the screen before mey totter off to another launch. On the other hand, we'd never get to hear about anything if it wasn't for the press launches. Promotion may add up to a substantial sum for a game, but it' still a small amount of the total expenditure, and without it software house search sall into it, software houses can't sell into the chain stores and the like. As I'm sure you are aware, it isn't love that makes the world go round but money — unless you're a press hack of course, then it's booze.

VALUE FOR MONEY?

Dear Lloyd, I am sick to death of hearing people complaining about the cost of games. The argument usually put forward is that in 1982/3 games cost about £5, why the sudden increase?

This is the biggest load of crap I have ever heard. Show me a game written in 1983 which had 3D graphics as good as Batman or a colour scrolling game without attribute problems, such as Light-force (HOW do they do that)?? Come to that any scrolling game at all, with the exception of Lunar Jetman, one of the most addictive es ever written.

What I am saying is that considering the complexity of new games and the time, advertising and promotion involved. And also the quality of the actual games, is it so surprising that games have become £3-4 more expensive?

So tell the whinging ratbags to keep their comments to them-selves, we don't need them. Robert Hayden, Lings, North-

ampton
PS Who needs Claire Hirsch with the adorable Hannah Smith

Who indeed?! It's nice to hear someone defending progress in the games market for a change and, bearing in mind that clever graphics don't necessarily make a great game or become an excuse for jacking up prices, Lagree with vour sentiments sir.

STOP THIS CYNICISM

Døar CRASH On the subject of ultimate On the subject of unimate clones. I suggest that some people should be less cyrical about 3D viewpoint games, after all, it is only a viewpoint. Imagine if Green Baret were called a Cauldron II clone because of its side dron II olone because of its side view, Bounder a Parzadrome clone because of its top viewpoint, why doesn't his happen? The answer is massively different, but the majority of 30 games also have totally different gameplay. Movie, Fairight, Pyradurse, Kirel, Spindizzy, Molecule Man, Quazarron and Raperboy! True there are a lot of games which are real ultimate clones but not that many. But games like Fairlight have been tagged us ultimate clones where, if gard us utilimate closes where, if gad us utilimate closes where, if you think about it, the graphics even are of a very different style (and they re better). So you utterly unsatisfiable people stop moaning about the number of 3D games.

and why not pick on 2D games Instead? Um what else en yes I think that cargocyle, Elite and imagins are really ace, and Green Baret should have been a

Timothy Rouse, Kings Heath, Birmingham PS As for Mr (Hi I'm an *Oran-*ginaholic) Hunto (Totally out-rageous) Minson, cort wot a lad! wot a party anima!! Someone wake him up please.

Let sleeping dogs lie, I say. Wake him up and he's as loud as his shirts, it won't do! As to the clones, I'm sure we're going through a patch where there are so many good games around and yet people still feel the need to complete. to complain, so they do. Once we were all thrilled with a few unidentifiable blobs or arrows for heroes — how much better life is today, only some three years after 'the good old days'.

CRASHE MAG

ADVERTISING ANALYSIS

Dear Lloyd, In reply to your letters on advertis-ing I would like to express my views on the subject. Advertising serves two purposes, one is to inform the public on what games are going to be released, the price and other details. The other is that it helps sell the game. By using fancy artwork and glamorous phreses and licensed people advertisers provoke interest in the game which would lead to more

3D GAMES

I'msorry to say that lagree with N Potter's letter (ish 32) about the recent spate of 3D games, compared to the variety that Commis (Spit) user's have been getting. OK, some of the 3D games are not ox, state of the obligations are not bad (Batman), but I am sick of seeing cheap, tacky versions, as well as ut nimate's drivet. Hook for-ward to the conversions of the Eidolon and the such

However, I think Spectrum adventures are far superior to Commie versions, and will invest more of my meagre amount of money into them if the 3D games survive much longer.

Now to cover some more points triat have caught my eye in FORUM, Firstly I would like to speak out in favour of Hunter. S

speak out in favour of Hunter. S Minson, he is a vital ingredient of your magazine and removing him would be like scrapping FORUM. He is very withy and is the first article I read after purchasing CRASH. What's happened to 'on the cover' and 'Homegrown Software'. What has really happened to Robin Candy, I think your were jealous of his increasing yoularity and killed him, his pastures new is really a field where you tures new is really a field where you buried him.

Jamie Butier, Worrall, Sheffield

You're right about the adventures, except that the Commodore does affertremendousscope as long as you own a disk drive. It doesn't you own a disk drive, it doesn't seem that Hunter MinFitzSim-mons is in any real danger of being removed other than by his own liver (unless it's by members of the Loud Hawaiian Shirt Abatement Society). On the Cover is probably due for a return soon, but I think we had just about run through everyone at the time it stopped Homegrown Software is suffering the pre-Christmas rush period (which makes it hard to fit in timeconsuming activities) and Pob Candy is alive, well and living in Ludlow College, not some field. In fact he stuck his head in a few minutes ago, and as far as I could tell there was a body attached to it. sales. For instance Friday the 13th and World Cup Carnival only generated their sales from clever advertising. Many a time I have been persuaded to buy games sol-ely on their advertising. No matter what people say, everyone is effected by advertising in some

Also, I have seen games in WH Smith underpriced. For example I saw V for £5.95 and Arc of Yesod .95 as well

C Counsell, Hedge End, Southampton, Hants

Well that makes a change from the usual accusation of the chains

over-pricing a game!
Of course advertising affects
everyone in some way, often we're
not even aware that we have been
affected, some times for the good, sometimes for the bad. At its best, I think advertising can actually brighten life up considerably.

A PEDANT WRITES

You will first notice that I am writing this missive in red ink (Readers of the Forum won't know, but believe the Forum won't know, but believe, me I am). This is partly because it was the only pen I could find, but also because I am a little angry. (Now you're scared, aren't you)? What has aroused my wrath? Sloppiness! That's what. My hends do it, my mother does it. Even my economics teacher used to do it. Now even CHASH has faller into the bap, in Issue 33.

To elaborate, what is written on

To elaborate, what is written on the front of the box of a certain game is, "TRIVIAL PURSUIT There is no 'S. There's only one igame in the box for Illips sake! Why the plurat? Why does everybody do 's weep?

do it wreng? Am I the only same person in the world? Sometimes I think I must ge mad. Everyone of your critics in the October review got it wrong, is: it some new psychological trick like: Paris in the Spring? Asargghhhinhinhihhh! Yours sincerelys, Stuart C Mar-low(s), Banbury, Oxon

Sorry appetrals, is the sense in living strats happens when there's lots of periors about who don't know English properlys. Definitely stopinesss, slapped wrists all rounds. Happy's now? LMs

So, there we go for another menth. Not long now to CRASH's anniversary, ish 35 completes three years of exis-tence. How do we do it? But just in case you haven't been ground for the last three years, the address for Forum letters is, LLOYD MANGRAM, CRASH FORUM, PO BOX 10, LUDLOW, SHROPSHIRE SY8 10B, See you

YOUR No. 1 OPTION **GUARANTEED ON**

Finished Product Publishing Free Lance Contracts - Original Concept or Conversion

"In-House" Programming

With exceptional distribution in the U. K., Europe, and expanding markets around the world "Elite" and "2.99 Classics" can guarantee to offer the very best terms on all forms of finished product and programming/publishing agreement.

Here's Why?

It's quite simple. To get the very best products and programmers we offer the very best terms around.

Take up the Challenge

Finished Product Publishing - Our reputation for quality on both the "Elite" and "2.99 Classics" labels ensures the highest profile for the product. With a choice of either outright payment or monthly royalty with a guarantee, its got to be your No. 1 option.

Free-Lance Contracts -

Original Concepts - Elite offer financial support to proven programmers and development houses wishing to create original product.

Conversion Contracts - We can also offer the very finest titles for conversion, again on a fixed payment or monthly royalty with guarantee basis. Around £10,000 per project is quite achievable

"In-House" Programming Opportunities -

Looking for a change?

Both "Elite" and "2.99 Classics" can offer in-House programmers the opportunity to work on both salary salary with royalties. Solid support from In-House graphics and sonics people makes a great working environment.

ACT NOW!!

Finished Product - Send by recorded delivery samples and relevant documentation for an immediate decision.

Free-Lance Contracts/In-House Programming -Advise us by 'phone, telex or post of your experience with details of published/soon to be published work (if applicable) and samples where possible.

Then let us know the area of your interest and if it matches with ours we'll arrange an immediate meeting

Contact - Software Development. Elite Systems Limited.,

DESIGN MONSTER

I suppose there could be some thing nasty living in the vaults beneath CRASH Towers, Every now and then, I get sent down into the dark and murky cellars to search for some long forgotten piece of software. Of course noone else will go down there because they're not daft. They know that something nasty lurks down there — that's why they send me

Just to make things really nasty they sometimes wait until I'm down in the vaults and then turn off all the lights and make horrible monstery noises, scaring me half

to death. It's really not fair. Of course I know there's nothing down there, but, well. . . you never

I spend all my time running around doing this and that, at everyone's beck and call and the inhabitants of CRASH Towers do their best to make my life difficult. I've got a lot of sympathy for Berk, the lead character in PIRANHA's latest game. He's definitely another candidate for the Union of Put-upon Minions and Allied Operatives, along with yours truly. Poor old Berk lives in a castle

which houses a trapdoor, Selow this trapdoor lurk all sorts of hide-ous monsters. Eeek! I was just managing to convince myself that there really wasn't anything down in the CRASH vauits when I had a quick play of Trapdoor. I had just got Berk to open the trapdoor and something nasty had leapt out when some horrible person from CRASH said that it looked exactly like whatever it is that lives in the

CRASH vaults. Well, that was it. I spent the rest of the day huddled in the broom cupboard while Editorial made nasty noises outside and laughed a lot.

Anyway, they say that the best way to overcome a phobia is to confront it. Maybe you lot could help. Why don't you draw a picture of the sort of monster which you think lives beneath CRASH Towers? Just use your imagination, but please don't make your works of art too huge — remember that I have to cart everything that I have to can be cooking around. When I've finished looking at all your pictures of the CRASH Towers Cellar Monster, I won't be frightened any more when those nasty CRASH people throw me into the cellars and lock the door. (Wimper.)

Willie Rushton, one of the people behind the TV series, TRAPDOOR, poses with a selection of TRAPDOOR goodies. Some of them will find their way into the PIRANHA Goodiebage on offer.

30 Copies of TRAPDOOR up for grabs!

In return for your troubles PIRANHA are offering large goody bags for the three best artistic cre-ations. These will contain Trapdoor paraphanalia created to go with the TV series. Thirty runners-up are in line for a copy of the

garie, too.
So, zoom your entries off to me
making sure they don't arrive any

GIVE GIRLS A BREAK!

A few months ago, I mentioned the problems that schools

A few months ago, I mentioned the problems that schools and parents are facing in interesting girls in computers. The London Borough of Croydon has now published a fascinating document entitled *Girls and information Technology* which reports the results of a survey commissioned by the Equal Opportunities Commission.

It discusses the observation that computers seem to be used more by boys and male teachers than by their female counterparts, and refers to a study carried by the MEP Primary Project which showed that twice as many boys as girls have access to a micro at home. Why should this be? Are girls intrinsically less interested in computers than boys are? If parents consider it more important to provide home computers for sons rather than daughters what implication does this have for the future of women in an age of technol-

does this have for the future of women in an age of technol-

ogy? In many secondary schools, computers have been linked with the mathematics department and too much emphasis has been placed on programming and numerical uses rather than data-processing and other social implications. Another problem is that traditional attereotyping

tions. Another problem is that traditional attrectyping seems to occur very early with boys being perceived to have more interest than girls in new technology.

Girls may be keen to learn word-processing but seem to have little curiosity about other computer uses. Perhaps the problem lies in the content of the commercial software available. Girls are not nearly so interested as boys in arcade-type games and even educational software tends to be directed towards male interests. Luckly, though the programs live towards male interests. Luckliy though, the programs I've looked at this month are of a particularly high standard and will appeal equalty to boys and girls.

INTERMEDIATE LEVEL GEOGRAPHY - ENVIRONMENTAL STUDIES

Producer: Scisoft Retail price: £6.95 Age range: 9-13 years

Age range: 9-13 years

There are four programs in this parkage each involving geographical skills. Treasure Hunt' contains three games based on map reading, use of compass directions, and estimation of distances. In game one, you are left stranded somewhere on the map and you have to reach the Youth Hostel safely. The second game involves collecting treasure, while in the third game you have to explore the map in order to find the hidden treasure. Each game is played on one of eight maps which use standard ordnance survey symbols, and you can choose to enter his commands using either bearings from 600 to 360 degrees) or points of the compass. It is also possible to choose between single keyword entry for commands two for walk, in for headingly or typing each command in full. A very useful feature of this game is that the computer will actually teach you the map symbols if required, and there is an optional quiz to test your understanding.

Around Britain in 48 Hours is an excellent game for improving a child's knowledge of the geography of the United Kingdom. The object of the game is to find the

hidden name of a city or town by travelling round the country by d. fail or air, to collect the various letters. At the start of the game, you have £300 and a time limit of 48 hours in which to find the hidden word. You have to remember that travelling by road will be much cheaper, but much slower than going by plane, and that by road and rail a larger number of places are evallable to visit. A map of the country is displayed on the screen, and the computer shows you the possible routes you can take from your position.

This is a very well constructed game, which will do a lot to improve a child's knowledge of his country, atthough I don't quite

understand why it is impossible to fly from certain places which do have airports! In comparison, I tound the simulation Spread of Disease in Woodland rather boring. The aim is to show how a disease such as Dutch Elm can spread from month to month, with the screen graphics displaying the numbers of healthy, immune, and diseased trees.

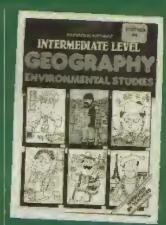

The is represented by a

diseased trees.

The is represented by a grid, and you have to start the model by putting in healthy and diseased trees, with spaces between to stop, the spread of disease. You can also change the probability factors which control the spread of the disease, the charice of an infected tree surviving, and the number of months the disease will last in a tree before killing it or feaving it immune.

Although the program has an important message, the simulation is lacking in any element of fun, and Hound that children falled to be interested by it.

The final program, "Countries of the World", is a database containing information about the area, population and capital city of the major countries of the world. The

menu provides four options; you can find all details about a country, list all of the countries, search for a particular piece of information, or call up the help page. The program is useful for showing children what a detabase is and giving them practice in finding out pieces of information.

All in all, this package provides a good balance of content and activity. The accompanying booklet gives a detailed description of each game, logether with ideas for other activities.

COMMENTS

THE GIDDY **GAME SHOW**

Producer: Mirrorsoft Retail price: £9.95 Age range: under 5 years

Age range: under 5 years

This program is a spin-off from Yorkshire Television's Giddy Game Show for very young children, and uses the same popular characters of Giddy, Gus, Gorilla and Princess Galaczena. The four games on the tape are designed to help children recognise the latters of the alphabet and associate them with everyday objects.

The first game, 'Alphabet', introduces the child to the various letters, which are sensibly split into four groups. For each letter, a picture appears on the screen showing one of the characters with an object which starts with the letter being taught. The letter is displayed in the top left hand corner, and the word for the object shown, with, it's initial letter in a different colour, is at the bottom of the picture. When the child can recognise the letters, he is ready to move on to game two, 'Jigsaw'.

This time, nine squares are shown on the screen, with a letter in the middle one. The letter is then broken up into different pieces and the player has to put it back together again one piece at a time. This is a very good way of drawing ettention to the shape of a letter. 'Hungry Gorilla 'is a simple game with two levels of difficulty. Picturas of six sorts of foods are displayed with a word at the bottom of the screen. One letter of the word is highlighted, and the player has to select the correct letter and picture to match up with the high-

lighted letter, so that Gorilla can-be ted. At level one, Giddy moves round the screen from picture to picture, and when he is hovering over the correct food, the child simply has to press SPACE. At the second level, however, the tetters of the alphabet are split into four to z.—a.to.f, g to l, m to s, and t to z.

s — a to 1, g to 1, m to s, and to z. In the ficial game, 'Princesis Galaxzena and the Maze', the child has to help the princess to find her way to the castle to rescue the imprisoned king. On her way through the maze' she must avoid passing any objects beginning with one of the forbidden letters displayed on the screen. As acceptable objects are passed, their names are spell out at the bottom of the picture, if the princess accidentally goes past three forbidden letters, she ends up in the dun — in with the king. This is a very enjoyable little game which motivates young children to succeed. A 12-page colour story book accompanies the game, explaining what to do, and reinforcing the skills being taught.

COMMENTS

by the times!

CRACK IT! TOWERS

Producer: **Mirrorsoft** Retail Price: **£9.95** Age range: **puzzle fans of** any age

Crack fit Towers is a collection of puzzles which you must complete to steal the secret of Count Crack It's powers. Each of the rooms in the Towers contains a puzzle which has to be solved and to enter a room a player has to pass a mental arithmatic test.

The first room is the home of Oswald the Rubber-necked Duck and the puzzle is to guess what Oswald wants for his dinner. Puzzles in the other rooms include working out the next number in a sequence, moving through a maze by means of the directions north, south, east or west, working out co-ordinates and completing the missing letters in a word. If a player fails a challenge he gets a ducking ma most intested with piranna and even if he is successful in the puzzles he still has to cope with other problems which crop up:

There are three skill levels to choose from — difficult, more difficult or impossible—and there is also the option of changing the sets of words in the word prob-

lems, a feature which extends the game's educational potential. A nicely written Visitors' Guide Book accompanies the game, giving hints on how to solve the puzzles and introducing the characters—Jim the Jellyfish, Albert the Alien and so on. The only thing that bothered me about this game is the claim that it is suitable for puzzle fans of any age'. Crack Itt Towers is a game most definitely for children aged seven and over—why pretend otherwise?

COMMENTS

Control keys: each puzzle has difrerent requirements and the con-trof keys are clearly described in the booklet

Keyboard play: good, but it is annoying that if you madvertently, press the wrong key it is impossi-ble to delete. Graphies: very nice. Use of colour: good. General ratings: an enjoyable.

General ratings: an enjoyable program interior as ense of humour which children will enjoy. The large range of puzzles and problems will hold a child's altention for quite a while.

FLETCHER'S CASTLE

Producen Fernleaf **Educational Software** Retail price: £10.00 Age range: 8-12 years

Age range: 8-12 years

Like The Pertime Hunter, this game is designed for group, rather than Individual use.

The story line is that a kniight has been given a gift of land and has to build a castle quickly in order to defend it. He is given entry ten days to complete the work so that he can demonstrate his authority over the native population, and in that time he must prepare the mound and the ditch, set guards, fell and haul trees, build the tower and tences, and obtain had the tower and tences, and obtain had the tower and tences, and obtain had the contains a pupil worksheet which may be photocopied, and this allows the group to keep a record of the work done each day together with the gains or losses of soldiers and workers.

At the beginning, the group are told that the type of bastle to be constructed is a wooden motte and barley, that they have 91 soldiers to help them, but that the 35 local workers cannot be trusted alone. Their first task is to evaluate from the map three possible sites, each of which hes advantages and disadvantages.

Gradually more and more decisions have to be reached, so that

the soldiers and workmen are all sensibly and usefully employed. Every as aften, the screen display shows in graphic form how the work is coming along, and gives an up-date on the state of the workforce, some of whom may have been the victims of accidents, surprise attacks, or lack of food.

Floridier's Castle would be accidents.

food.

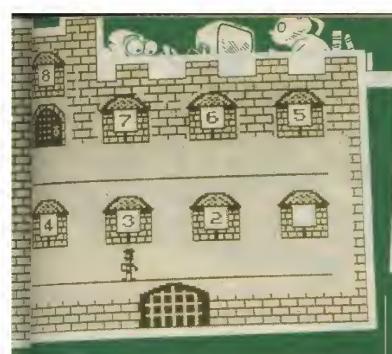

Fietcher's Castle would be an excellent resource for use within a program of work on the Norman invasion. Although the historical content of the program is very limited, its success less in the focus it provides for logical reasoning, and the development of oral language skills. Children will love this game, and the teacher or parent will find it fascinating to observe the group dynamics.

COMMENTS

General ruting: this is an interesting and absorbing simulation which will spark off a whole variety of learning activities, Highly recommended.

STORYMAKER

Producer: Arnold-Wheaton Retail price: £4.95 Age Range: 8 and over

This is an unusual program which aims to motivate children to write stories. In Storymaker, children are introduced to a picture character called Alpha, who helps them to choose the structure for a story. First of all, the time setting for the story must be chosen from a list containing ideas such as 'In the days of the cavernen' and 'In the year 2082AD'. Then the main character must be selected and this might be a wounded man, a kidnapped young lady, someone of the children's own age, an astronaut, a select or a blind person. A choice of setting for the story is also made, together with some other characters and an outline of piot. After the ending of the story has been selected, the title is chosen, and finally the computer displays a copy of the story plan, which might be something like this:

TITLE: Rescue; THE TIME: In the days of the cavemen; MAIN CHARACTER: A kidnapped

young lady; THE PLACE: In the imiddle of the sea; OTHER CHARACTER: A friendly boy or girl; THE PLOT: They travel through time; ENDING: Their go thess is rewarded.

The success of this program lies in its ability to motivate even the most reluctant writer. Children see the task of story writing as a game when given the instructions by the computer, and soon become aware of the importance of planning their structure before they start to write. The screen text is clear and easy to read, and if a ZX printer is attached, a print-out of the plan can be obtained.

Keyboard play: good Graphics: confined to the charac-ter Alpha

Use of colours: very limited → blue background with text in yel-

General rating: a useful program which lays the basis for structured creative writing

THE PERFUME HUNTER

Producer: Fernleaf **Educational Software** Retail price: £11.50 Age range: 8-12 years

This game is designed to be used by groups of three or four children, and aims to offer an experience in the use of logical thinking and reasoning to resolve a problem.

Some bottles of perfume have been lost in long grass. A dog is on hand to help, and knows when it is close to a bottle, but not its exact position. The players have to move the dog around a grid using north, south, east or west commands. A set number of moves is allowed in which to find the bottles and return the dog to his kennel.

As well as the grid, the screen displays the number of bottles still to be collected, the number of bottles next to the dog's present position, and the number of the grid.

cannot be moved into, nor can a bottle be hidden in these squares. The value of the game lies in the group discussion that takes place as the players try to deduce the correct moves Strategy also enters into the game as the children decide how to cover as many squares as possible within the moves allowed.

There are six levels of difficulty to choose from, and it is possible to store the results of up to 12 games. The Perfume Hunter is a useful little program which children will enjoy.

COMMENTS

Control keys: N,S,E,W. Keyboard playt-good Graphies: adequate Use of colour: attractive General rating: useful for getting children to cooperate

TREASURE

Producer: Fernleaf **Educational Software** Retail Price: £11.50 Age range: 8-12 years

Age range: 8-12 years

The main objective in this game is to offer practice in multiplication, though there is also considerable scope for deductive reasoning. A gnd is displayed on the screen and the object is to find the treasure which has been hidden at random in one of the squares.

The game has been designed to be played by two groups of children who take it in turns to position marker buoys. If, for instance, a group choose to set a marker buoy in a square with the co-ordinates 4.2, they first have to find two factors which make 42 and enter the command 6x7 or 7x6. The buoy will be one of three colours red means next to, or on, the position of the treasure, purple means not near the treasure, white means not near the treasure, vounger children will find this game quite difficult especially as 1x a number is not allowed, but

much discussion can be generated in the groups as the children work out the best strategy for revealing the treasure without giving any advantage to the opposition. A work sheet containing a blank grid is provided for use with the program and players are encouraged to record the clues given and work out their reasoning on the sheet.

This is a very useful strategy program which provides a practical stimulus for learning multiplication tables.

COMMENTS

Control keys: number keys and single letter commands Keyboard play: fast Graphics: none, apart from grid Use of colour: simple but effec-

General rating: gives a context for the learning of multiplication tables, and encourages children to discuss and plan their strategy. Great funt

Now you can get your hands on these amazing all-time classic Spectrum games at a new super low price through CRASH Mail Order. What's more, if you order ALL FOUR of this month's selection, we'll send you a fifth game entirely free!

Copies of the latest releases from THE EDGE up for grabs! TRAVEL SHAO LIN'S ROAD AND WIN A KUNG FU SUIT!

Learn the Mysteries of the Shao-Lin Temple!

PICTURE A

PICTURE B

Sometimes I teel as it I'm in a

computer game. . . . There I was, stealing a quick forty winks in the broom cupboard, well away from the nasty noise of the ZZAP! office and the pongs of Girlle perfume from the CRASH den. All was quiet and t was starring in my favourite dream: I turn into a six-foot tall, fourteen-stone Kung Fu expert and wreak my revenge on all who have offended me at CRASH Towers, Anyway, it was just getting to the good bit where I'm about to throw Graeme Kidd into the river Ludd and there was an awful pounding on the cupboard door. Before I knew what was going on, Auntie Aggle had me trapped in her vice-like grip and was propelling me towards the door. My head was reeling. What hide-ous fate had she planned for me? After delivering a quick kick to my posterior, she ordered me to cart several large and very heavy looking packages up end less flights of stairs to the hal-lowed ones Up In Art.

It's at times like this that I often wish I was in a computer game. Especially one like the EDGE's new release Shao-Lin's Road. Yes, I can see it all now as I bound effortlessly through the building, defeating opponents in my path with expertly delivered Kung Fu kicks. Just like the character in Shao-Lin's Road. No-one is safe from Grand Master Comps Minion as I hack and kick my way up to the att Roam!

Anyway, while we're on the subject of Shao-Lin's Road those very nice people at the eose want to give away some prizes in honour of their new game, the official ochversion of Konami's arcade machine, Shao-Lin's Roads. All you have to do is study the Iwo pictures of Kung Fu flighters lan Craig's drawn here, and spot as many differences between them as you can. Circle the differences in Picture B with your biro, fill in the entry form and whisk it off to KUNG. FU MINION, CRASH TOWERS, PO BOX 10, LUDLOW, SHROPSHIRE, SY8 1DB making sure it arrives by 20th November.

The first all-correct entry pulled out of Graeme's special Martial Arts Document in the senior the sure of the senior the sure of the senior the sure of the senior the

The first all-correct entry pulled out of Graeme's special Martial Arts Doc Marten wins the sender a Kung Fu suit, just like the one in the piccy, together with a copy of a book which explains the mysteries of the ancient Shao-Lin temple. This mystical place of worship was maintained by monks who defend it against barbarian hordes — the book is packed with information on the temple itself and explains Shao-Lin Kung Fu. But there's more! The winner also gets the choice of one of the following specingrams which will be released between now and Christmas: Shao-Lin's Road, Manta a shoot 'em up, Fairlight II and Artist II.

Fifteen more winners collect a copy of the Shao-Lin's Temple book and the choice of one of the above products; then thirty five runners up get the chance to choose a game from the same list!

THE MARKETING MIX . . .

September was a busy month for Jonathan Eggelton, designer of the first GENESIS game. Not only was he working on the game graphics for Graham Stafford, but he also went to **DOMARK**'s HQ for a briefing on how the game would be taken to the marketplace. And a trip to Ludlow had to be fitted in to discuss the inlay artwork with Oliver Frey. Meanwhile, there's a full preview of KAT-TRAP on page 66...

THE PUBLISHER'S TALE ...

DOMARK's founders and joint managing directors, Dominic Wheatley and Mark Strachan come from a marketing background — the duo met while they were working at a London advertising agency. They entered the home computer industry some three years ago, bringing a certain marketing flair with them — all their games have been launched and promoted in an original and strong way.

Agreat deal goes on behind the scenes before a finished program arrives in the High Street shops—and there's much more to the process than just booking a few ads, duplicating the cassettes and waiting for orders to flood in. There's the Public Relations side of things to deal with—spreading the word about a product without actually buying advertising space. Someone has to take care of liaison with the editorial staff working on computer magazines, newspapers, radio and, if the game's very tucky, television. Like a lot of companies in the software industry, pomark pays for the services of a Public Relations (PR) firm to do all sorts of useful things that help the game get into the public eye.

Domark's PR firm is called inter-

DOMARK SPATITITIS Called INTER-MEDIATES, and it was the cuddly Dave Carlos, INTER-MEDIATES bossman who collected Jonathan Eggelten and his murn Margaret from Milton Keynes and drove them to Wimbledon for the first marketing meeting, PR companies do "... all sorts of useful things..."

Jonathan admitted that he'd never really thought about the way a computer program actually gets into the shops, so Mark Strachan set about explaining the process. Essentially, there are half a dozen elements to the process of marketing a game: setting the price; arranging for the artwork for prom-

otional material; designing the packaging; setting up an advertising budget and strategy; arranging for distribution of the product and of course, the PR side of things.

"All these element are interrelated," Mark explained, "and the first thing Dominic and I do when we have a finished game on our hands is sit down together and go through the marketing plan. Then we have to think about the commercial side of things—at the end of the day, everyone's got to make money out of a product. Perhaps the first consideration is the price, because the price that is charged in the shops affects the amount of money we have available to promote the game."

When you actually buy a game in the shop, paying £7, £10, or maybe even £15, have you ever stopped to wonder why so much is charged for what is, after all, then than £1's worth of materials? Lloyd's postbag is usually brimming with letters complaining about the price of software — let Mark Strachan explain where the money goes:

"Say we decide to charge £7.95 for Kat-Trap. Over half the retail price goes to the shops, so that leaves about £3.00 for bomark. Out of that £3.00 we've gotto pay for the box, the tape, labels, duplication and assembly costs—someone has to put the package together. Actually making the physical product which is sold in the shops could cost £1. That leaves us with £2." Out of that £2 we have to pay for

"Out of that £2 we have to pay for advertising and prometion, which could easily eat up half of the money remaining, and then there are the royalties that have to be paid to the programmer."

Buying advertising space in computer magazines gets expensive very quickly. A full-page, colour advertisement in CRASH, for instance, costs about \$1,000 and that's not the highest price in the

Oli and Jonathan chat about the artwork for KATTRAP. Next month, we'll bring you the full story and show you Oli's painting!

Just a selection of the packaging afternatives available. And of course, there's always the possibility of designing and making aspecial box for a game. KATTRAP is likely to appear in a standard DOMARK library case, like SPLITTING IMAGES...

Industry . . . In working out how much money to spend on advertis-ing, the problem is, you don't actually know how many copies of the game are going to sell. If a £7.95 price tag is decided upon for a game and at least 10,000 units sell, according to Mark's breakdown of costs comark could budget to spend about £10,000 on advertisements. That's a lot of money could buy a very nice car or maybe asmall house with such a sum. Why is it important?

Advertising does many things," Mark explains, "it informs people that your product is availa-ble, it gives the selling price and tells people where they can get the product. You need to tell people that they must have your product, but not tell them too much. In the software business, advertising makes the difference between a real success and an 'also ran'.

"Apart from the consumer advertising, which is aimed at the enduser, there's the trade advertising to be taken care of too. The people involved in the distribution and retail side of the trade are very different - we can advertise to oustomers easily. We also need to tell the shops about a game have to tell a little story in a way, explaining why people are going to come in and buy it. It helps to have quotes from magazines, and it's useful to explain our consumer advertising and promotion plans as well. We'll probably take adver-tisement space in COMPUTER TRADE WEEKLY, which circulates to people in the home computer industry, and produce some A4 'flyers' — leaflets which tell the retailer about our game, explain why it is going to sell and aim to

persuade him to stock copies." Once an advertising budget has been set, bookings have to be made with the publications - and everything has to be planned carefully, because publishers need to know in advance who wants to take advertising space in an issue of a magazine. Advertisements that appear in this issue of CRASH

tions. We never advertise a product until it's ready — It just con-fuses customers." And wastes their time - Lloyd has quite few letters from people who've seen a game advertised and spent time and money going to the shops looking for it . . .

The packaging is an important part of the 'marketing mix'. Shelf space in High Street stores costs the retailer quite a lot of money, and shopkeepers want to make the best possible use of the display space they have available. Some large retail chains lay down the sizes for computer game boxes and if you don't comply with their standard sizes, your game simply doesn't get onto their shelves. It all has to be borne in mind.

"We've got two alternatives when it comes to packaging, Mark says, fetching some exam-ples of previous bomark games, we can use our standard cassette library case — the one used for Splitting Images, or we can pro-duce a special box as we did for Eureka! and Trivial Pursuit. The problems with special packs are that they can't be recycled, they're more expensive and they have to be specially made, which takes longer. Our standard case fits in with the requirements of Boots, WH Smiths and so on, yet stands out a little bit, so we'll probably use the library case for Kat-Trap."

The artwork used on the inlay and for advertisements and posters has to be commissioned and prepared in time to meet up with printers' schedules. Advertise ments need to be similar, if not identical, to the packaging and the logo and artwork are crucially important to the whole process of marketing agame. As well as being written and published by some of the top people in the industry, Kat-Trap is getting off to a good start on the artwork front — Jonathan has been working on ideas for the central character for months, and is a keen artist. And Oli has agreed to paint the picture that will be used. More of that, a little later. . . .

appointment and go and tell them about a game, giving them details of the advertising budget and the reviews we've had, if any, It's not an easy task — last year, for Instance, Smiths were offered 1,500 games and actually took 75

"Orders have to be secured and then, the day before the launch, we have to ship games to distributors. Every customer of ours MUST get the game on the same day everyone wants to get their hands on the product immediately. In fact, the same day isn't good enough — we've lound it has to be the same hour, A shopkeeper usually deals with more than one dis-tributor and if he wants copies of a new game, he'll approach one distributor - if that distributor hasn't received the game and can't supply immediately, the shopkeeper will go to another distributor. To avoid the bad feeling this causes, we hired twelve vans to take Trivial Pursuit to our twelve customers and we told the drivers to wait outside the warehouses until noon

before actually going in and making the delivery.
"Once they've get the product, distributors ring round the shops

they supply, selling the game in for us, and all we have to do is sit back and wait for the phone calls from distributors, asking for more supplies . . . If the game is a hit, we'll get several calls a day from each distributor and that's very

In many respects, the customer has got the easy job — okay, you've got to find the £7.95 from somewhere, but all you have to do is go into the shop and buy the game. It takes a long time for BOMARK or any other software pub-lisher to see their share of your money, however. The shopkeeper puts your money into his bank account that evening and then has to pay the distributor — usually within 60 days. That's three months. Then the distributor has to pay the publisher — which can take even longer. But of course libs publisher has to pay printer's bills, advertising bills and the costs of actually producing and shipping the cassette. When Jonathan went to see comark, in the middle of September, over a million pounds was riding on Trivial Pursuit — pub-lishing software certainly isn't tri-

THE PR PERSPECTIVE

After lunch at burger bar over-looking the home of the Wombles, it was back to the offices and time for Dave Carlos to explain his role in the marketing of a game. Dave used to be the editor of HOME COMPUTING WEEKLY, and so thoroughly understands the way computer magazines work. This helps him a lot when it comes to liaising with the computer press...He's been involved with the GENESIS project right from the start, liaising between CRASH, DESIGN

DESIGN and DOMARK.
PR work starts months before the launch of a game. "We get involved with the marketing plan," Dave explains, "and have to work out how to tell the media in general that a game is on its way. Television, newspapers, Micronet, magazines and of course European publications all have to be informed. Downers is one of the clients we provide a PR service for, and in their case we get involved right at the start. We can spend days, or even weeks thinking about the ways in which we can actually present a new game to the press. Alaunch party could be held at an interesting place that has a connection with the game, for instance — in the case of View To A Kill the game was launched at Pinewood studios and journalists were invited to a screening of the film that took place a week before

the Royal Premiere.
"It is the PR company's job to provide backup to the publisher and deal with journalists. We have to arrange for photographs to be taken and supplied to magazines, and have to come up with interesting ideas that will get people talk-ing about the product — the aim is to reinforce the message that the product is NEW!

"When a game is getting close to launch, it's time to start thinking about promoting it through com-

petitions—the PR side is very different to advertising. We spend time thinking about crazy ideas and then seeing if we can actually do them — for TP, a solid gold Tri-viai Pursuit set is being made and will be given away as the prize in a national competition. For the next Bond game, we investigated the possibility of setting up a photo session with Mark and Dominic and some alligators, but the whole idea turned out to be too expensive." (Relief washes across Mark's face at this point!)

Dave Carlos is given a budget to work with, and has to allocate cash for competition prizes and cover other launch expenses such as the hire of a venue and the food and drinks bill for Hunter S Minson and his friends! A good rapport with magazines and customers is important to a software publisher, and Dave works for a number of chents as an intermediary, in effect. He takes care of all the administrative work involved in sending out press releases arranging photographs, holding a launch party and inviting the right people, sorting out promotional products like badges, T-shirts and hats, and ultimately, presenting the game to magazines.
"With Kat-Trap Mark and I will

try to see all the magazine editors personally, taking the game with us and demonstrating it. It's just possible to cover all fifteen magazines in London, visiting each of them, in a single day but it's not the best way to do things

it's very tring and hard work!

"And the final part of the PR company's job is to be on the end of a telephone sorting out queries and problems. If a journalist wants to know the price." to know the price of a game, the name of the author or the age of the designer, it's up to me to pass on the information quickly and efficiently.

A quick tutorial on airbrush techniques from Oli. RULE ONE: open the window before spraying that niffy orange ink that smells as if someone's thrown up?

for instance, were booked before the middle of September and had to arrive in Ludlow, ready to go to the printers, before the end of September. You can't always get an advert in at the last minute! "In the case of a Spectrum/ Amstrad game like Kat-Trap, we'd usually take space in CTW and ten ora dozen consumer magazines", Mark says, "and we have to decide how we're going to spend the money across the publica-

Mark has nearly finished explaining the work bomank will be doing for Kat-Trap: "Once the product has been advertised and manufactured, the final stage is to arrange the distribution. We haven't got the time or the facilities to deal with all the shops that sell software, and our customers are in fact about a dozen in number they are the distributors and large

cháin stores. "We have to ring up, make an

KAT-TRAP — A GENUINELY **EXCLUSIVE PREVIEW!**

Well, Kat-Trap is the GENESIS game after all . . . Last month we reported on the way Graham Stafford planned to implement Jonathan's design. Then, only the bare skeleton of the game had been assembled but Graham and Jon have been beavering away and Kat-Trap is moving, and ready for a preview. With the delays involved in producing CRASH, by the time you read this, the game should be finished!

it is the 24th century and Earth has been abandoned by the human race for two centuries — solar exposions forced a huge evacuation. Now, the Earth people deem it safe to return to their home planet. However, when they arrive they face a shock for although the planet itself seems to have survived quite well, squatters have moved in. Mother Earth has been

moved in, mother Earth has been taken over by the Cat Men!

The World leaders want their planet back, but there's no point pottering off to the County Court for an eviction order — the Cat Men aren't going to give up without a fight. From enforced exile the

Earth men hatch a plan. They send down a sophisticated Multi Terrain Exploration Droid, affectionately known at M.T.-ED. He's not really a combat droid — M.T.-ED. was designed to potter over awkward terrain and maybe get involved in a bit of scrub clearance, but fighting ... well, it's not really his fighting ... well, it's not really his forte. A few weapons are botted on to M.T.-ED and he's sent down to Earth along with Hercules-1, a maintenance and command droid. A reluctant hero, M.T.-ED. sets out to oust those unwelcome Cat Men for good.

At the moment two screens are

nearly complete - the ruined city

and the forest area. In Jonathan's original game plan there are four-teen levels, ranging from lakes, deserts, mountain peaks, and casties, And Graham Stafford reckons all these levels will be included in the finished game.

Apart from the ravenous Cat Men who are possessively guard-ing "their" planet, other nasties ing "their" planet, other nasties have to be dealt with. Ghost-like shadow men drift in and out of the forest areas and Mechno Cats roam around chewing up anything daft enough to get in their way. A sinister sewer beast grabs at vic-tims from manholes and all manof undesirables have joined forces with the Cat Men. Points are: scored for all the baddles blasted to their doom.

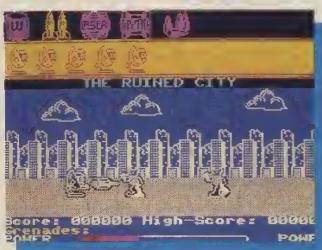

M.T.-ED, moves around by scurrying along or by taking a series of bouncy hops — even in the game's present embryonic state he sproings around in a very convincing mechanical way. To defend himself against the dangers, M.T.-ED. has a variety of weapons at his disposal. However, not all these are effective against all of the invaders. Water cannon, missiles, a powerful laser, grenades and bullets should all be available in the finished game the heroic droid must stomp through each successive level eradicating the dangers that meet him and selecting the correct weapon for each type of baddie he meets.

Although the work on the game has progressed a great deal from the last time it was viewed, there is still quite a bit more to do. Changes will probably be made to the scenario and structure right up until the last minute. But you'll have to wait until next Issue, when we'll have a full review before you'll know the whole story...

The original acreen design from Jonathan's GEMESIS entry. Mr Stafford's keen to keep as close as he can to the original brief, as you can see from the screenshots . . .

M.T.-ED. tackies some Shadow Chests, They're pretty slusive, however as they fill in and out amongst the trees

SCREEN SHOTS FROM ORIGINAL COIN-OP

A new software label swam from MacMillian not so long ago, and two issues back there was a little celebration in honour of PIRANHA. The idea was to put together the scenario for a mini Spectrum game starring a piranha. Oliver Collins of Chetwynd Road, NW5 1DG won first prize with his hero who spits razor-sharp teeth to great effect, as you can see in the picture. He receives a bulging goody bag containing a PIRANHA sweatshirt, a cuddly lish and all the forthcoming PIRANHA games: Nosferatu. Rogue Trooper, Strike Force Cobra, Trap Door and The

Colour of Magic. Five runners up will also be very happy (now, won't you!) with a T shirt, cuddly piranha and their choice of one of the above games. choce or one of the above games. lain Charlton, Briery Bank, LA5 0DY; J E Le Gresley, Ketilworth Rd, PO5 2PG; Michael S Jones, Klea Avenue, SW4 9HG; lan Durston, Eastwood Close, TA6 4DX; Luke Gietzen, Orchard Close, SE23 3QN

PUT DAN DARE BACK ON COURSE N

WIN! Copies

of VIRGIN's Sizzling

new game! Books,
T Shirts, Videos/LP's
and Posters up for grabs

So, you think you know a bit about Dan Dare sh? Reckon you could get him out of a scrape and back into action against the Mekon?

Virgen's excellent game featuring Dan Dara sends him on a mission to thwart evil Mekon's plans to blackmall Earth. The evil Green One has taken over an esteroid and set it in on a collision course with our home planet. Dan and his faithful assistant Digby set out in their trusty craft the Anastasia, planning to land on the Asteroid and do battle with the nasty green Treens. If Dan succeeds on his mission, and disables the Mekon's asteroid, Earth will once again be a safe and happy place in which to live, but should he fail. . . .

Our very own Oil used to draw Dan Dare strips before he helped to set up CRASH, and he simply couldn't resist the temptation to revisit an old friend with his airbrush. Oil was a bit pushed for time, as you can see, and didn't quite manage to complete the artwork for the series of cartoon frames that appear here.

HOLD TIGHT DIG - WE'RE

IN FOR A ROUGH LANDING ...

COPYRIGHT @ IPC/DAN DARE, LTD. 1986

AND COLLECT A HOST OF GOODIES!

Dan has suddenly run into a problem on his journey to the Mekon's hideout . . . Treen forces have intercepted the Anastasia, and Digby and Dan find themselves spinning down towards the hard surface of the Mekon's blackmail planetoid, out of control. It's up to you to finish the story and make sure that Dan lands safely so the game, programmed by the crew at vincin, can go on.

What we want you to do is to

What we want you to do is to complete the comic strip story ... you can use whatever artistic materials you might have to hand, sided and abetted with a handful of talent. Complete the artwork and then turn your mind to the trio of tricky questions (well, not too terribly tricky) that

appear on the entry form.
Complete the coupon and send it off to DAN DARE COMP, CRASH Towers, PO BOX 10, Ludlow, Shropshire, SY8 1DB making sure your ertwork and answers arrive before 20th November.

Lots of luvverly prizes are up for grabs — and there are TWO First prizes in this competition! The senders of the top two entries will collect a Poster, a Dan Dare T Shirt (one of a Limited Edition run, specially produced by vinain), a copy of the game, a copy of the book The Man Who Drew Tomorrow — a biography of the man who created Dan Dare in the first placs — and either three videos or five albums. (Vinain will send the two top prize winners catalogues so they can make their choice of videos or eibums.)

A tric of runners-up are set to collect a copy of the game together with a Limited Edition T Shirt and poster, and then no less than twenty five lucky entrants are going to be receiving copies of this Sizzling game together with a poster.

QUESTIONY BITS:

1) What is the name of the artist who originally created Dan Dare?

2) In which comic did (and does) the Dan Dare strip appear?

3) From which planet did the Mekon and the Treens originate?

C Townstern Contary Fo

Funny, the Sticker Wars that started at the PCW Show seem to have

more islands from Dynamite Dan II sent in by Andrew Keeley and Paul Burchell from Eastbourne: Hijack, the cunning game from Electrac breaks has been mapped by Andy Leates and R Walker from Haywards Heath, West Sussax, Their work should help you negotiate your way around the game and catch those nasty terrorists. Suart Middleton and Ray Tradox from xee, made a pligrimage to Ludlow and brought me a superb Universal Hero map which graces the pages of Playing Tips this month. Robert Sevens drew a very pretty Incredible Shrinking Fireman map in case there are still some nearlie who haven't finished it yet. There's an endless livet, atmost

preny increases similaring throman map in case there are still some people who haven't finished it yet. There's an endless (wetl, atmost) stream of POKEs, and jots more.

Cartographer of the month prize goes to Aridy Léates and R Walker for their Hijack map and Top Tipster is Piot Foreyth from sunny Glasgow, who collects a prize for his Dan Pour solution, £20 worth of software will be on its way to you guys before you know it.

Anyway, enough of the welfie and on with the tips

STAR FIREBIRDS Infinite Lives

The recently re-released Star Firebirds is certainly a brute to get through, if you're' having trouble with worn away finger tips as you try to blast all the swooping and swirling alien crait, then take a POKE or two from the Industrious Trio of Hackers from Hasby (and Rom Haxby (and Pocklington), Chris Smith, Jason Bean and D Austin, Type this routine into your Spectrum, then RUN and you'll have infinite lives, Whoopte Doo!

NIGHTMARE RALLY

Here's a little hint from Richard Cowdery and Robert Moran who live in Hanworth, Middlesex for Nightmare Reliy. If you'd like your Escort to go just that little bit faster, then here's what you do. When the game has loaded and the race has started, press SYMBOL SHIFT and Q simultaneously. Your car will now enter into Turbo Mode. You won't be able to crash (even if you try really hard). If you want to stop then SYMBOL SHIFT and W will do just that, How cute. Here's a little hint from Richard

HEARTLAND POKES

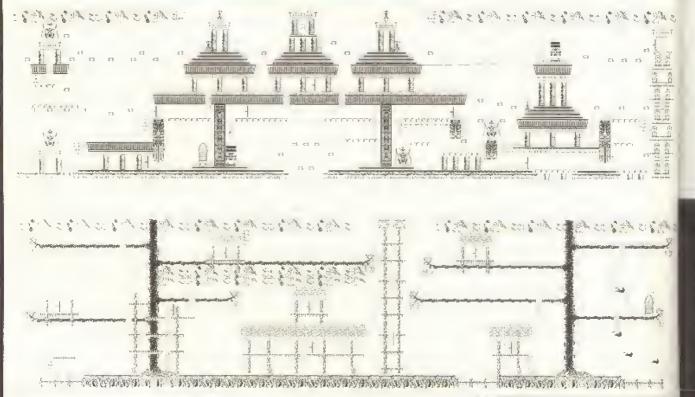

Phil Churchyard has been attacking some more games this month. Heartland, the game that involves chucking a top hat around at various nastles certainly seems to be giving people some serious gyp when it comes to getting through to the end, because I haven't received any tips at all on the game! If you are one of these people struggling through Heartland then despair no more. Thanks to me mate Phil, here's a routine to make you do all sorts of interesting things . . .

EQUINOX MAP

EQUINOX CHEAT MODE

You surely can't still be having problems with Equinox, what with the HUGE map printed over the last two issues and the infinite lives POKEs published a couple of months back? However, I'm probably wrong, so here's a cheat courtesy of Andy Powell from Sutton in Surrey.

On level one find the red square with PETE written all

over it. Take this cube back to the start of the game and using the lifts go to the top left hand corner and while thrusting upwards press RNC simultane-ously and the game will pause for a second or two and when it resumes you will find that you now have Infinite lives. Repeat this routine for each new game.

DYNAMITE DAN II CORRECTION

Cosh, what can I say? The poor girlies up at Gravel Hill have been inundated with 'phone calls about the *Dynamite Dan II* POKEs not to mention all the nasty letters you've sent to me! Well, I really don't know what went wrong last issue, but there went wrong last issue, but there was a he-uge cock-up on the POKEs front. For some reason I got my type, setting codes all wrong and various other embarrassing things. You will be pleased to learn that Graeme kicked me thoroughty around the office with his special barbed Doc Marten Boots which he reserves only for very serious offences. Anyway enough of the apologies. This is what the Dynamite Dan II POKEs should have said. Change the following lines to read as follows:

10 CLEAR 26000 60 LET prog=PEEK 23635+256* PEEK 23636 100 same as line 60 120 RANDOMIZE USR (prog + 176)

Now change the equals in line 30 to a hash sign and everything should be ticketty-boo

LEVEL 5

SPECTRUM TAPE and DRIVE TRANSFER UTILITIES

- TUB ESSENTIAL for ALL Spectrum owners our tape utility for backup and drive conversion.

 Simple operation for fast loaders accurate even if over 48%, (tone and back rate
- measurer)
 measurer)
 measurer)
 Deals with clicky loaders converts COMPLETELY to normatifor tape toad (plus easy drive transfer with TP2).
 PLUS MANY OTHER FEATURES A UNIQUE PRODUCT!
 COST only \$6.98 on tape or E7.99 on m/drive cart.

TRANSFER PACK 2 - FOR TAPE TO DRIVE TRANSFER

- Package of programs INCLUDING TUB, other utilities, allows drive transfer of many programs.

 Details given on transfer of 40 programs.

 Manages velocity all clicky leaders. Bytes choppet/splitter, header reader, etc State name of crive system (eg dridfire), Opus disc, etc).

 DNLY ELL 99 on tape OR ELZ, 99 or myfdrive cart. INFORMATION SHEETS (1 each) up to No. 18 available) includes many top 20 hits SAE to list.

MICROTRANS - M/drive utility

Two programs — a must for all mydrive owners. Fast and EASY DRIVE to DRIVE back-up TAPE TO DRIVE (inc headerless) — does NOT CONVERT PROGRAMS. Multiple end-program (for true cat, printer output) etc. atc. ONLY £3.50 on tape, £4.50 on cartridge.

OVERSEAS: add £1 Europe, £2 dihers for each, UPDATE SERVICE – SAE for dotain PROGRAMS CARRY OUR MONEY BACK GUARANTEE (not updates) LERM, DEPTICE, 11 BEACONSFIELD CLOSE, WHITLEY BAY, TYNY, AND WEAR

Last issue I printed the tips to get off the first section of Universal Hero. This month to accompany the splendid map given to me by Stuart Middleton (who wrote the game) and Ray Tredoux (his site kick) from xest, and included in glorious technicolour in the maps section, is the final solution to the game. (Gosh what a long and rambling sentence). Anyway, courtesy of Leigh Bogardis from Truro in Compwall, here is the final partien.

if use the air tank in lo replenish your exygen supply
2) Us the flysweiter found in reprit
to kill the cockroach in to kill the lenus fly traps
4) Use the potting shed key to open the door
5) Use the potting shed key to

flower
6) Use the weedkiller to get the
ts
7) Use Droid Recail Devica
8) Use rough glass (found in the
first section) to get the lens
9) Use the mirror to diver the light

beam 10) Use the lens to locus the light Beam

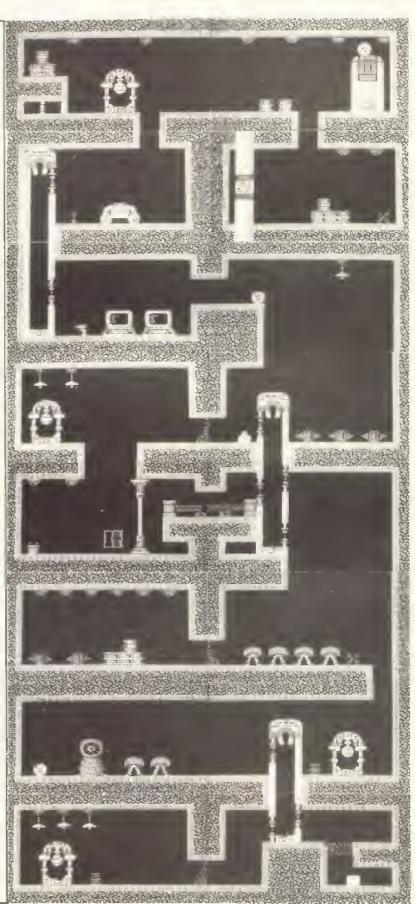

10) Use the lens to focus the light beam
11) Use spanner
12) Use Repair Dirold to get the current of electricity
13) Use starting handle with the boot file do this you must go between the two ledges) to teleport to the third section
14) Use the knife with the rope and lock to destroy the plant to k to destroy the plant key to get a straight key

teleport
22) Now use the ring with the orb, peritacle and laisting to teleport
23) Stand on the table with the orb so that you can beleach vith the orb so that you can beleach vith the ID, and the fuel to get to map 1 and the fuel to get to map 1 then get the lead radiation box and then get the plutch jum
27) Get back to map 2
26) Use the ruby with the crystal and plutonium to complete the game.

EQUINOX MAP

CAULDRON II POKES

At long last some Cauldron II POKEs have actually errived at CRASH Towers (and about time tool). Thanks to G Patterson from Billingham in Cleveland here is that much sought after routine. (Gleeful chuckle).

10 CLEAR 65535 20 LOAD **** CODE 30 POKE 25046,205: POKE 25047,234: POKE 25048,97 40 FOR 1=25066 TO 25073: READ 8: POKE 1,8: NEXT 1: RAN-DOMIZE USR 25000 50 DATA 62,0,50,238,206,195,196,97

Press RUN and start the Cauldron II tape.

When the game has loaded, press BREAK and type in:

POKE 52974,0: RANDOMIZE USR 52180.

You will now have infinite lives.

KIREL Infinite Lives

Remember Addictive's release a few months back about a cirte amphiblous creature by the name of Kiref' Well, here are some POKEs from Edward Ricketts from Corsham in Wiltshire to give the poor, put-upon chap a helping hand. Simply type them into your Spectrum and RUN to get infinite lives for your blobby chum.

10 CLEAR 24575: PRINT AT 10,8;
"START KIREL TAPE"
20 FOR f=23296 TO 23309:
READ a: POKE f,a: NEXT f

50 FOR f=60187 TO 60206;
READ a: POKE f,a: NEXT f
60 DATA 221,033,000,096,017
70 DATA 000,136,062,255,055
90 DATA 044,138,195,091,138
100 POKE 60094,61: POKE
60095,235
110 CLS: RANDOMIZE USR

MOLECULE MAN Infinite Everything

If you're having trouble negotiating your rotund friend around the extensive maze in Molecule Man from MASTERTRONG then halp is at hand. G Patterson from Billingham in Cleveland has come up with a POKE which gives Molecule Man infinite everything.

Man infinite everything.

Type MERGE "" and start Molecule Man tape. When the OK message comes onto the screen stop the tape and press LIST. Put the following POKE in before the second RANDOMIZE USR statement:

POKE 64585,0 Press RUN and re-start the Molecule Man tape. When the

game hes loaded you will find that Molecule Man is now totally tuff!

LAP OF THE GODS

Michael Rowe from Mansfield in Nottinghemshire sent in this next cheat. It enables you to get Into System Cheat Mode in Lap of the Gods. Play the game through once, scorling enough to get the chence to put your name on the high score table. Instead of typing in your name, however, type CHEAT. Next go you will find the option System Cheat Mode on your menu. This gives you a full inventory of useful items to make your mission a bit easier.

for the game. And here they are You can put your pick axe hand les down now than kyouverymuch.

POKE 34716,24 (infinite lives) POKE34445,201 (crushers don't kill) POKE 38785,201 (monsters don't kill) POKE 38504,0 (water doesn't

SUPERNOVA TIPS

A few issues ago CRASH did a review on a piece of Home Grown software called Supernova all about a little ROBOT on a nightmarish holiday up in the Astral belt, Anthony Bailey who wrote Supernova (and has apparently sold a fair few copies of the game) has sent in some exclusive tips for you lucky CRASH readers.

The basic idea of the gama is to help ROBOT raise enough cash so that he can go home from his horrid holiday. The easiest way of doing this is by selling things to fellow tourists. There are nine tourists in the game and each one will buy a specific item. What each tourist says gives you a clue as to what he'll buy from you.

For instance, the first tourist is stuck out in the entrance corridor complaining that 'They won't let me in.' Therefore you can sell him your passport for 100 credits. The other tourists

are locked in their rooms on level two. The room keys are scattered throughout the hotel in easily accessible lockers. Find these lockers and open the doors. One tourist will buy his room key from you. To get your own room, collect your key from reception, then take your case and leave it in the Luggage room. The staff will then deliver the wrong case to your room and you can sall this case to another tourist.

You have two other objects which can be used. The comblets you into the Teeth specialist and the braces you'll find there can be sold to the tourist who wants suspenders. The camera opens the cinema door. Use the Friday video to enter Fish where you will find several useful items including chips which will open the Casino. To make some more easy money, buy the gold shares, then buy the brooch. Self the shares back at profit and then return the brooch and you gain 100 credits.

if you are puzzled by the computer remember that there are five empty lockers by it and five signs in the equation. Also, not everything in the arcade is a game...

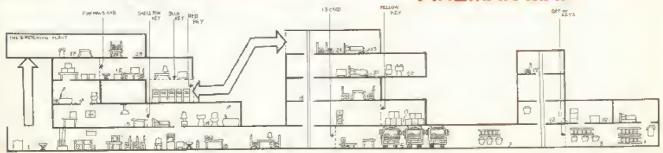

These are only the first tips to get you started on Supernova. Anthony has promised to send the rest of the solution which I shall hopefully be including in the December issue or maybe the Christmas special.

MONTY ON THE RUN Still Running???

For some strange reason this last couple of weeks tive been inundated with letters pleading for POKEs on Monty on the Run. Moved by the sheer-lengths that people will go to just for the sake of a measily infinite lives POKE or an anti-crusher curse, I decided to delve into my 'vast' Playing Tips file for this much sought after POKE, However, to my extreme embarrassment, I didn't have one POKE that actually worked (blush), Imagine my ecstasy when I read Andy Powell's letter and found that he had actually included some POKEs

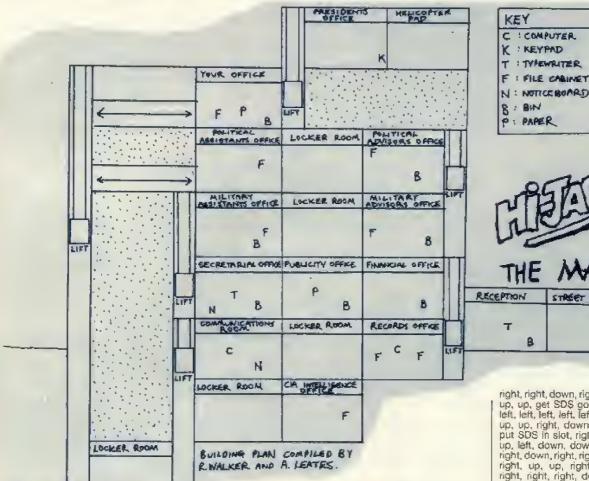

THE INCREDIBLE SHRINKING FIREMAN MAP

85

DAN DARE SOLUTION

Apart from the tiny mistake (which I'm sure you all managed to correct yourselves) in last month's Playing Tips, the Dan Dare POKEs hopefully helped you to get quite a bit further into the game. In case you didn't manage to suss out what was wrong with the routine I shall tell you. In line 60 it should be a hash not an equals. Anyway, in case some of you are still having problems completing the game, here's the complete solution as sent in by Paul Forsyth from Glasgow:

So flex your fingers and file your typing nails down and from the start, ladies and gentlemen....

right twice, down, right, down, down, right, right, up, get S.D.S, down, down, left, left, left, left, walk to the left of the screen and one of the circles will flash go right, down, left, down, down, left, left, left, left, left, left, down, down, right, right, up, left, down, down, right,

right, right, down, right, right, right, up, up, get SDS go down, down, left, up, up, right, down, left, left, left up, up, right, r

AND THAT'S IT (cough, cough, splutter).

ACE CHEAT

DEFICE

Cascape recent flight simulation Ace was received quite favorably here in CRASH Towers. Steven Mitchell from Halifax, West Yorkshire got rather peeved at crashing every time he tried an ambitious loop-the-loop. However, while attempting this dangerous manoeuvre, he discovered a rather useful cheat. In order to re-tuel in Ace you need quite a lot of fuel which rather defeats the object of the exercise...

N

8

OFFICE

c

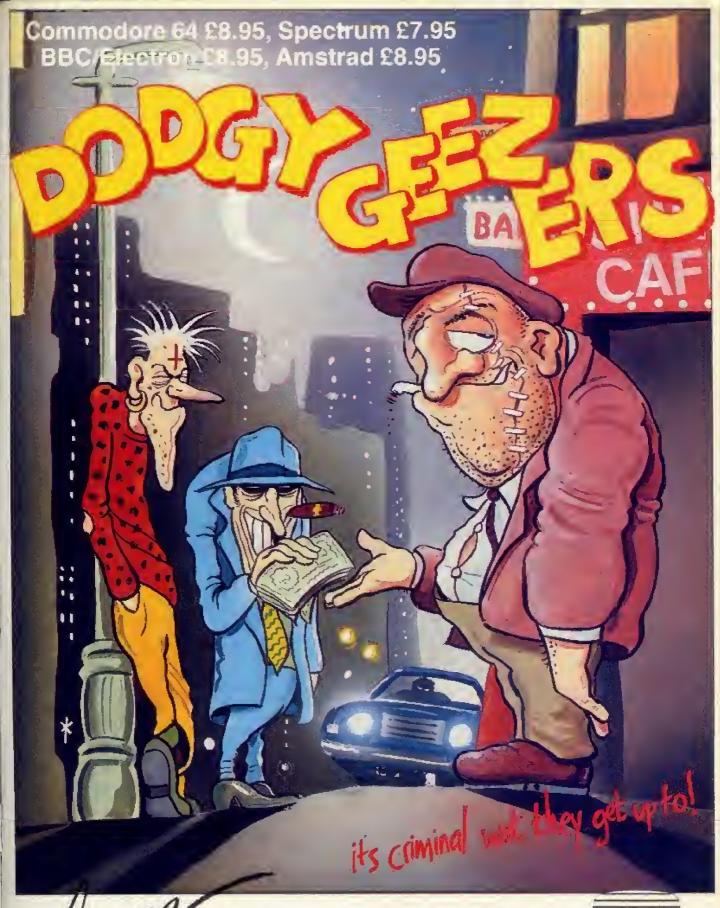

Steven has however discovered a way to re-fuel without using any fuel whatsoever! Begin to climb vertically then reduce the thrust to zero. Surprisingly enough you continue to climb and even accelerate. However, if your vefocity gets over 9999 then it will flip back to nought again and you'll crash.

I.C.U.P.S. POKES

Mr Churchyard has been busy yet again. This time he's come with a jolly fittle routine for I.C.U.P.S. If you type this into your Spectrum and RUN you'll find that you can fly through the first section without being hassled by any of the nasties. When you get to the second section of the game you're on your own, and it's all down to skill and judgement. Take it away Phil.

1 CLEAR 65535 2 PRINT AT 21,6; "START I.C.U.P.S. TAPE" 3 MERGE "" 4 RUN 5 15 FOR x≈0 TO 26 45 DATA 221,33,0,91,17,0,117,62 46 DATA 255,183,55,8,243,205,98,5 47 DATA 210,0,062,200,50,245,134 48 DATA 195,185,134

MELBOURNE HOUSE
The Home of the Hits!

LAP OF THE GODS POKE

As well as the Lap of the Gods cheat'in this issue there is also a short routine for the game for those people who would rather use POKEs than cheats. By typing this listingette into your trusty Spectrum you will find that your little creature has infinite lives and the devil incarnations cannot steal your effigies. Thanks for this go to Peter Featherstone from Leeds.

5 REM LAP OF THE GODS 10 CLEAR 28999 20 LOAD **** CODE 30 FOR f = 47039 TO 47048 40 READ a: POKE f,a 50 NEXT f 60 HANDOMIZE USR 47000 70 DATA 176.50,219,210,50,149,212,195,8 0,255

DO NOT READ THIS!

Also from Peter Featherstone is this routine for infinite lives in Thrust. But before I give it to you, you must promise me faithfully that you won't use it for a couple of months yet because we've only just reviewed the game. Promise? Thankyou.

Now this is what you do. . . .

5 REM THRUST 10 CLEAR 65399 20 LOAD "" CODE 30 FOR 1=65425 TO 65431 40 READ a: POKE f,a 50 NEXT f 60 RANDOMIZE USR 65400 70 DATA 175,50,51,153,195,0,250

PAPERBOY Infinite Lives

it's a hard life being a Paper Boy/ Girly/Person. I used to do a paper round many eons ago curre's latest arcade conversion residing under the same name is just as hard to get through as the real thing, especially when you get onto the days at the end of the week. However, do not despair. Stephen Thompson from Hartlepool in Cleveland has sent in a really good routine to get you through the game and onto the high score table in no time at all.

Not only does your Paper boy avoid pegging out, but he also continues to ride through impassable objects as if they weren't even there! Simply type in the listing and RUN, then play Paper Boy tape from the beginning.

Now what could be easier?

10 LOAD "" CODE 20 FOR f=65302 TO 65307 30 READ 2: POKE f,a: NEXT f 40 POKE 65110,22: POKE 65111,255 50 RANDOMIZE USR 65000 60 DATA 50,151,187,195,86,5

PENTAGRAM POKE(!!)

No, wait a minute, don't go away, this is important! I know Pentagram POKEs were done eons ago but these are different guv, honest. Not yer run of the mill POKEs here y'know. No pappy infinite lives this time. Slice me a lemon etc, etc... These Pentagram POKEs will give Sebreman he-uge leaps. No guv, I don't mean yer run of the mill leaps, guvnor. These leaps'll 'ave yer average Sabreman leaping clean out of the screen,

slice me a lemon, (etc repeat to fade). . . .

Simply put this POKE in before the RANDOMIZE USR statement. You know how to do this, don't you? First type MERGE instead of LOAD—and stop the tape after the header and you'll see an O.K message. LIST it and stick in yer POKE

POKE 50751.0

PEN FRIEND PLEA

Anton Lang would very much like a pen friend. He is fifteen years old, has a Spectrum and would like to exchange games, POKES, and maps with fellow CRASH readers everywhere and anywhere. You can contact him at 64 Shirley Avenue, Croydon Surrey, CR0 85H. There, aren't I nice?

PAPERBOY MINI TIPS

To go with POKEs this month for Paperboy, here are some tips to help you finish the game with lots and tots of points. Credit must go to A Pruhs from Lines.

Try to keep off the road as much as possible. On reaching the BMX track, take the left hand side of obstacles as there are more obstacles to aim for. Jump over every ramp as this re-fills your paper bag with newspapers.

On Wednesday to Sunday there is a drunk to avoid. To dodge him, slow right down and drive off the path. He will now just walk right past you. Later on in the week it is better to go faster than slower as belting along at a fair speed makes it easier to dodge the faster items like the skateboard.

Finally, try and do as much damage as possible to the black houses but always leave some papers for the blue houses, Also try to remember where you can find more newspapers as this saves on time.

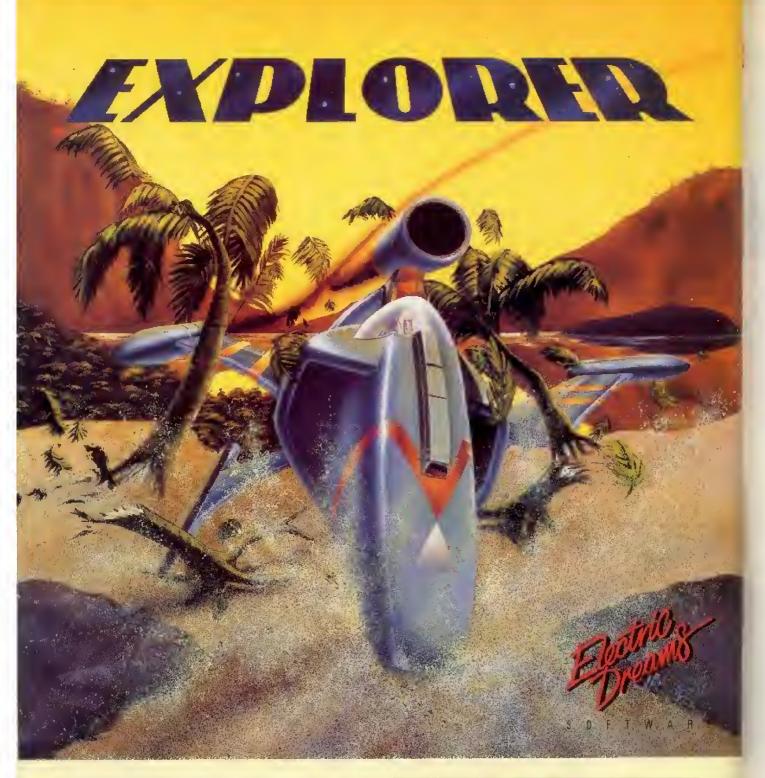

CHRIS JETMAN TURNER ANNOUNCEMENT.

Mr Turner is well and truly worn out with replying to your endiess queries on POKEs and stuff. As from this month, however, could you send any correspondence

directly to him at this address: Chris (Jetman) Turner, Cardigan Arms, Kirkstall Road, Leeds.

That's it for yet another month. The nights are closing in now and soon it'll be like working in a cave, because it's so dark in my tiny office. Let's have some maps on Druid and Bombscare next month as well as some tips and POKEs for Lightforce. Also, how about some requests for tips and POKEs which haven't been published before in CRASH for Inclusion in the bumper Christmas Special? Use your imagination. Anyway, Happy Hallowe'en and keep those letters a-commin'. As usual mark them for my attention to HANNAH SMITH, CRASH PLAYING TIPS, PO BOX 10, LUDLOW, SHROPSHIRE, SYB 1DB.

Aaargh. Something just woke you from a cryogenic sleep right in the middle of your favourite dream.

Your ship has dropped out of warp and you are forced to make a glide-In landing on a very strange looking jungle planet. Equipped with jet pack for flying, navigation and weapons systems, fight your way through the jungle taking on it's strange and none-too-pleasant inhabitants. Only by finding vital parts stripped in your ship's unscheduled descent can you ever hope to escape.

THAT'S NOT YOUR FACE

How many advertisements for new arcade games have you seen with blurb to the effect that, 'This game is a shoot emup with elements of strategy...' in recent months? I realised at the PCW Show that companies are not really going out of their way to make games more thought provoking or satisfying. Some reviewers have been taken in, almost quoting the blurb on game inlays when they announce that a game has 'strategic overtones'. I nearly was myself.

Rubbish, Absolute drivel. Find me such a game. They don't exist and It's as simple as that. The software industry is paying lip service to an ever growing faction of gamers, instead of providing real diversity in their products. It's true that more crossover games have appeared in the mould of Lords of Midnight but arcade games have remained just that. Any use of 'strategy' in the blurbs must be in the most abstract sense only.

I'm not claiming that the con is wholly intentional. It seems to be a case of the King's New Suit with some software houses.

I'm not claiming that the con is wholly intentional. It seems to be a case of the King's New Suit, with some software houses believing that any increase in the complexity of play must entail a 'strategic' element. What hasn't occurred to them is that what is required is a change in the style of play - not the detail.

Anyway, moan over. Next month I hope to take a look at some home grown strategy games, supplied by FRONTLINE read-

NAPOLEON AT WAR

Producer: CCS Retail Price: £8.95 Author: Ken Wright

This new game from ccs, the first since Desert Rats, is written by Ken Wright, author of some of tomLorsen's most successful titles including Waterloo and Austerlitz. Presumably, Mr Wright retained the copyright on the formula of these seems the same because the mat of those games because this one works in exactly the same fashion. More of that later

The game is a reconstruction of Napoleon's confrontation with the Russian army under Bennigsen in a solitaire game that casts you as Napoleon. The game gives you control over five infantry corps and one cavalry corps — each with three divisions. At last, artillery is instituted in the secondary and its included in the scenario and it's good to see that Mr Wright has acted on the constructive criticism from the public and given the

Presentation is neat. After a passable loading screen, the player is presented with a scrolling map containing terrain symbols and unit markers which are uncluttered but obvious. Units are displayed as single character blocks annotated for unit type, Corps ID and Command ID if any, Cursor keys allow observation of the whole play area, and a menu at the base of the screen displays possi-ble options as keyprasses. The French are coloured blue, Rus-

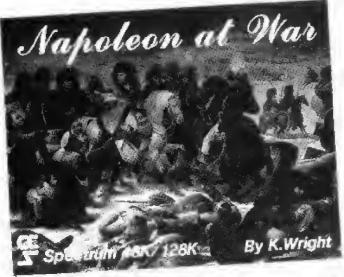

sians are black on yellow and a single Prussian Corps (com-manded by Lestocg) is displayed as black on white. You can analyse the strength and morale of your own units by asking for details when the cursor is above a unit. The marker then doubles in length to display the required informa-

As in the previous games of this format, units may be ordered as an entire corps by directly ordering the lead unit of that corps, or as individual divisions — though as Mr Wright points out in the notes, such detailed command was unheard of at the time of the origiwas nal conflict. If the orders you give are suspect, a corps commander may send a message to suggest an alternative course of action. Original orders will still be followed

A formidiable Russian force (dressed in yellow for the Spectrum screen) lies in wait on the right of a river. At the top left the entry point for the reserves is made visible — they don't

if you insist, but it's advisable to take note of the suggestions to

begin with. The game's three difficulty set-tings reflect the adaptability of the computer opponent. In a solitaire game, this has to be good. In Napoleon at War the opponent is nicknamed Charlie Oscar and the designer is evidently proud of his creation. Chartie O boasts unpredictability and sophisticated intelligence. Immediately the enemy forces start to move, hidden movement comes into play and opposing units begin to disappear from view. In fact the intelligence. from view. In fact the intelligence is a definite improvement on the earlier games and the advantages of this ere manifold. If the enemy played in a similar fashion to Waterloo, my guess is that your artillery would hack most of them to pieces before they ever got close enough for melee. But it's

programming.
In the original battle, both Napoleon and Bennigsen were left claiming victory. One thing was obvious, the battle had gone in a way neither had anticipated or desired. The game does well in recreating this confused and unsatisfying flow, and victory conditions are correspondingly difficult for both sides to fulfill. Again, it's good to see such demanding restrictions in a sol-

good to see such a quality piece of

itaire game The rules are straightforward and arrive on a glossy, fold out sheet. Apart from designer's and historical notes, the game includes a couple of useful battle maps and some new features such as the reorganisation of depleted units to

maintain a coherent fighting force. Moans? Well, there are a few. Marshal Ney's 6th Corps and Les tocq's Prussians come into the game as reserves for both sides on Turn Four. Unfortunately, they are displayed on the map at their relevant entry points right at the start of the game. The result is a slightly annoying distraction but one that can be lived with. My copy of the game also appeared to be slightly bugged, preventing me on certain occasions from offering orders to divisional sized units Hopefully, this was just a fault in my copy as the bug seemed intermittent and random. Finally, the game's now obligatory double cassette housing boasts compati-bility with 128K machines. Try as we might, we could only get the program to load on a 48K or 48K Plus model. There is no joystick

option for control aesthetic omission but it would have been nice.

Nearly a year after the appearance of Mr Wright's first Napoleonic games, he has entered the fray once more with a host of improvements on his original system. These are not necessarily dramatic or immediately obvious but, as I keep reminding people, the best parts of a strategy game are the bits you can't see. What choice do I have then, but to present this game with a well deserved CRASH Smash?

PRESENTATION 90%

Beautiful cover art, clean but attractive screen and well printed, thorough rules add up to good production values

RULES 90%

Some unnecessary brevity but no awkward omissions or cryptic explanations. Rules anyone could learn easily

PLAYABILITY 92%

Apart from the annoying distraction of those reserve units lurking on the map before they should be around, there's nothing to stop you from diving in at the deep end and just playing

GRAPHICS 89%

Perhaps these could have been livened up a little, but they work well as they stand

AUTHENTICITY 93%

The artillery has finally arrived; the hidden movement and re-organisation work well . . . very impres-

OPPONENT 93%

Agame like this lives or dies by the quality of the opponent. While there will be some of you who master the game quickly, a new stan-dard has definitely been set

VALUE FOR MONEY 96%

A quid cheaper than offerings of a year ago, and the system has matured in the meantime

OVERALL 95%

improvements were almost obligatory after such time and there are more good products now by which to compare the game. I still think it's going to go down well

War game convention: GAMES DAY '86 . . .

How many Games Days have there been now? An awful lot. The exact number of the latest one couldn't be remembered by anyone at this gar's show but it must be into double figures. Running over the last Saturday and Sunday in September. looked like another successful show with thousands of people packed into Landon's Royal Horilcultural Centre on a hot and humid day.

The show followed its usual formar. Stands of games dealers, com-panies and clubs fined the outside of the hall, leaving the central area for a range of games — role playing, wargame and classical. Some of these were demonstration games organised and run by particular groups, Others were public participation games where you could book time for Ore bashing and so on.

These are always the main visual attractions of a role playing conven-tion and some world-class displays were in be found in the hall. The NOTTINGHAM PLAYERS GUILD, Ind. by artist and game designer Gary Chalk had an immense famasy wargame running on a table taking up large portion of the display area. Thousands of hand painted 25mm lead figures, dragons, fantasy airships, dwarvish steam-powered battering rams and other weird and wonderful feasts for the eye were included. The terrain was lavishly

detailed: castles rose several feet into the air at each end of the table; rickety wooden bridges spanning meandering rivers beaved under the weight of hundreds of heavily armed infantrymen cushing forward to meet the enemy's glants and zom-

I asked Gaev Chalk how many man hours had been put into the display but it was all he could do to shrug and say, 'Impossible to guess,' before greeving to hear of the loss of one of his most powerful leaders in combat. Tears in his eyes, he continued, '... but the thing is, we do this for fun. We play on hoards like this all the time. They're practical and not just for display.

Apart from the dedicated behaviour of such gamers, there were more modest games on show hased on everything from Blake's 7 to Judge Dredd (another superb effort, complete with partially built city). In previous years, a variety of computers have been used to run wargames. This year there was only one computer running a game - a proud-looking Amstrad PCW 8256 demonstrating the kind of software SLOTH ENTERPRISES use to moderate Play By Mail games.

In a raised area at one end of the hall, a variety of costumed adventurers invited members of the public to a bit of swordplay. The weapons are convincing from a distance but

One of the monster costumes cres by MYTHLORE — enough to give onsfer costumes created anyone a had dream or two

are invariably made of foam rubber, allowing you to unrefily bash your best friend on the head and only damage pride. In upstairs rooms around the half perimeter, games designers and fanzing editors gave talks on hobby related items. Artists also had a chance to show their abilities at an exhibition. Perhaps the most visually attrac-

stand belonged to a company called MYTHLORESTUDIOS and their wares were remarkable; apart from costumes and armour of a very high quality, the MYTHLOREalso makes small treasure chests, monsters' limbs in varying states of decay and even full size monster duminies. I know it sounds crazy (especially if you saw some of the price tags) but the quality of their work is incredi-

Fighting Fantasy authors and CAMES WORKSHOP founders Steve Jackson and Ian Livingstone were to be seen from time to time (along with Rod Cousins from ACTIVI-SION but this was largely an event for the public rather than per-sonalities. Even the Games Day Awards (the only ones of their kind for the industry in this country) were typically informal.

The atmosphere at these events is traditionally more enjoyable than romputer shows. There is little in the way of hard sell and more encouragement for people to just have fun. That they did. Some of the games were competitive by nature

and offered prizes for those who survived but there was always the bar for those who didn't

It's surprising how many of GAMES WORKSHOP's ra-employees HOW become successful gamebook authors: Jon Sutherland and Simon Farrel, Gary Chalk and or Dever, Ian and Clive Bailey, Jamie Thompson and Ian Marsh . But as Simon Farrel, one of the co-authors of a historical series of solo-gamebroks said, "That part of the market is rapidly reaching sat-That brings me to the sad part of

the story. In the fast twelve years, role playing emerged as the most rapidly-growing, interesting and compelling new hobby in the western world. But it's two years since I last paid a visit to Games Day and

The arched ceiling of the Horticultural Hall spanned the throng at GAMES DAY

little has changed. Roughly the same numbers of people go to visit. It's claimed as the largest convention of its kind, but it seems to have stabilised in terms of popularity, The gaming press has progressed little either. There are more British journals dedicated to what was once a solely American phenomenon, but the hobby seems to have become stagnant and that is unfortunate,

Perhaps that distant link between traditional role playing and compu-ter gaming will create a new boom and signal a fresh growth period for the hobby. The inherently complex nature of RPGs can only benefit from the availability of cheap and commonplace processing power. It would appear however, that the right circumstances have not yet ari-

Brevity is beauty. Beauty is truth. With such astounding philosophy, it's straight into a mini FRONTLINE FORUM!

Dear Sean

Wargamers are in a minority because there is a large number of bad games that serves only to put off potential newcomers. Only a few classics exist. The Spectrum isn't used to the full as it is for other types of games, and few software houses bother with strategy games anyway because there is more money to be made in Jet Set Willy 25 and lots of mindless sheep

ready to buy it.

Whilst computer wargamers may be a minority, the number of true wargamers is far greater than that of home computer owners The subject has been practised for centuries and is a standard part of the teachings in military colleges such as Sandhurst and West Point. It is a new hobby as far as computer gaming goes, and few wargamers have home micros but the number is growing. Only in the last year or so, articles about computer wargarning have started to appear various wargaming magazines. it's only a matter of time before the demand for more sophisticated

games increases, David Eltringham, Stockton, Cleveland

Actually, a substantial number of wargamers have home micros. Most however, do not play compu-ter wargames. They tend to use their micros as a game aid with the computer calculating moves and combat results. Most of their income is spent on miniatures, Both software and miniature figures are expensive, but the situation is improving.

A bit of constructive criticism. In general, most strategy games have poor graphics. Okay, they do their job and can be recognised, but rarely do they go beyond that, It may well be that strategy games require by their nature more memory for rules and a playing area, leaving little memory for graphics (in 48K anywey), but with the advent of 128K machines, it should be possible to provide rules, maps and good graphics.

Quite a while ago, Think by ARIOLASOFT appeared in the main review section and received pretty good ratings. I wonder how much game had been reviewed in FRONTLINE. After all, it is a strategy game. So is Chess for that matter. I think the chances are that THE EDGE'S Psi-Chess will be reviewed in the main section as well. Why? Because it is polished software and as such looks out of place in FRONTLINE. I hope that

David Wild, Edwinstowe, Notts

You imply that you are satisfied (to an extent) with the complexity of games as they stand and that extra memory is best applied to aesthe-tics. I must disagree. I'd rather have an extra scenario or better Intelligence than better graphics. Anyway, software houses still

largely ignore 128K machines. Getting them to write 128K strategy games is harder still.

Your second point, I agree with entirely. Go to any normal book-shop and you will find good SF and Fantasy liferature is put in the clas-sics section instead of the SF/Fantasy department where it belongs. When did you last see Danie's Inferno alongside a Robert Hein-lein novel? When people have a goodproduct they tend to be wary of marketing it in a way that might be off-putting to the masses. I hope things change too. You have earned yourself £20 worth of software for your troubles.

Next month - realtime wargaming, tips for Desert Rats and more . . Send your missives to FRONTLINE FORUM, PO BOX LUDLOW, SHROPSHIRE. SY8 1DB.

HOUSE HUNTING

t is standard practice (now that the few professional software houses who used to pay royalties quickly have left the games side of the Industry) for a programmer to be paid many months after a game has been submitted to a software house. This can prove annoying to a full-time programmer but is, admittedly, common pratice in parallel industries, for

example, book publishing.

A more recent turn of events, however, is rather worrying; some software concerns are commissioning several versions of a blockbuster and only paying the one, final, winner with no money going to the luckless programmers who produced the less lavourable versions. Worse still are some houses who are so devious, or unprofessional, as to make an offer for a game under fierce competition only to reject it much later when the game has lost some of its topicality. Such foul play leads to suspicions of double dealing on the part of the software houses. Tactics such as delaying competitive releases, or even pinching program ideas, can't be ruled out. It would be a good thing for programmers to honestly exchange notes on which software houses are unreliable or unprofessional, as such information might help bring programming onto a more secure footing and help eliminate rumours which do no-one any good.

Because of the uncertainties over payments for programmers they will be much more reluctant to spend large amounts of time on one mega-game and so churn out many smaller, less innovative, programs. Ironically, the churning out of conversions can be more fucrative than good innovative programming. Hence, it may well be that programmers will be less inclined to push the Spectrum to its limits, a thought which should sadden any Spectrum owner.

AFTERSHOCK

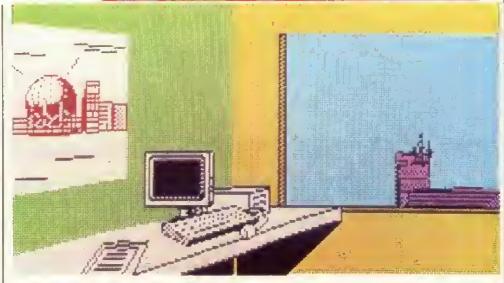

Producer: Interceptor Price: £9.99 Author: David Banner

Eve. eve. no sooner do I mention. the old Banner/INTERCEPTOR gang in the August editorial than, lo and behold, up they pop after a year spent in the wilderness. Well all I can say is welcome back, all is forgiven, and don't get too worried about this review — after a year of Quilled games anything that isn't Quilled immediately gets pride of

place these days.

David M Banner first worked with INTERCEPTOR on Message from Andromeda (CRASH Aug 84) noteworthy for its fast machine code response, silent key entry, lack of cursor, pernickety vocabulary, and good graphics which, already residing in memory, were quickly drawn. Apart from the graphics improvement demanded by all games purchasers, very little changed through Forest at World's End (Nov 84), Jewels of Babylon (Feb 85) and Warlords (Sep 85), (these last two with Terry Greer).

Wadords had particularly short location descriptions but shared the series' distinction in needing prepositions with the input while adventures coalesced down to a verb/noun

understanding The EXAMINE command was as constant as the price: £5.50. The review of Jewels of Babylon caused a stir in the INTERCEPTOR camp because they assumed the impressive graphics alone war-ranted a good review whereas I saw my task as to review the game as an adventure; after all, anyone

could look at the screen shots and make their own minds up about the quality of the pictures (and they were, indeed, super). A criticism i made which now looks dated was that aimed at all these games using the same system with apparently no room for improvement. Dated now because that was a when Innovation

improvement were the name of the game (as in arcades) but the invention of The Quill put paid to any hopes of adventuring breaking new ground consistently. So now the tallies have turned, and games like those from INTERCEPTOR are

very much welcomed. Having said all that, this latest release ending the year's hiatus.

does actually improve the old systern as here the text does not fly off the top of the screen on fresh input along the bottom so that all is readable in a very reasonable fashion. The pictures, so attractive in Jewels and Warlords, are almost as impressive. The story is probably the best in the series recounting the aftermath of a huge earthouake which rocks a city whose very heart straddles the faultline. The experts had only predicted minor rumbles for years but an underground nuclear test in the to the east activated the fault with dire results. Horrifying though the destruction to the city might be, it is its effects on the nuclear installation, for which you are responsible, that poses your immediate problems.

Having helped design the station you realise the importance of the failure of the coolant backup system before the earthquake, but now the quake has occurred, and you have been informed of the primary cooling system losing pressure and workers losing nerve. The urgency for you to escape your damaged office area and make your way to the reactor becomes all too clear. The fault has been traced to a switching valve in the backup system and you're the man who's job it is to ensure the valve works and the reactor is contained.

Playing Aftershock will be made much easier if you remember how this game's series often prefers you to be wordy with your input, prepositions and so on sprinkled liberally for good mea-sure. The first difficulty is met after only six locations. A chair, a pen and radio are picked up, along with some lissues from the washroom. The lift is inoperative and the stairwell from your office is filled with smoke and flames. It becomes pretty obvious that the chair is used somehow to escape and this is soon achieved if the program's propensity for long, exact sentence structure is remembered. After the claustrophobia of the first six locations the program runs wild with you being able to wander a great many locations without great many locations without pausing for thought. Pause for thought you eventually must, however, when diverse objects are met: fruit and meat vie with the likes of diamonds and a television set, alt looking for a problem as a home to settle in. The feed is found just outside the zoo, home of lions, bears, reptiles, insects, and an elephant on a ramp. Something tells me there's a problem here somewhere, I wonder if you can spot it? One timely tip about this game — get into the habit of searching the artefacts of areas and don't just rely on the bottom line which tells of any obvious objects present. In this way you'll unearth even more objects looking for a problem to solve! On the technical side this program runs very well with instant high-res graphics and a sure-footed (if silent) entry system.

There's some confusion over who produced the fine graphics on this one: Robin Chapman is credited on the inlay but Terry Greer is once again cited on the loading screen.

Aftershock is something special in these days of Quilled adventures. The storyline, and pictures which illustrate it, are really fine things to behold at a time when

good new adventures are thin on the ground. If you hanker for the days when adventures were stimulating, thought-provoking and imaginative, have a look at this one, and fill a large black refuse sack with all the *Quilled* clones released, because that's what I've done

COMMENTS

L'AFFAIRE VERA CRUZ

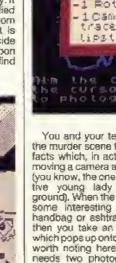

Producer: Infogrames Price: £8.95 Author: Gilles Blancon

I thought I'd skip the smart guy intro and get straight into the story

You have just been appointed Detective Sergeant in the Crime Squad at Saint Etienne, a place known to you, me and everyone else who has sat through those interminably boring French lessons at school as just another faceless town on a that country's wallchart. As an Officer of the Police and In your capacity as a Judicial Police Officer, you are capable of leading any criminal

investigation (which rules out any comparison to the luckless Clouseau, not to mention the fact that I can't even spell Clouseau).

No sooner have you taken up your new post than you are called upon to investigate what the press are fast terming L'Affaire Vera Cruz, or, in English, another one of those flippin' inrockames grames, sorry, games. On the 8th of August 1986 you are notified by the caretaker at the Forest apartment block of the discovery of a body. It has been provisionally identified as one of the residents and, from the caretaker's description, it is believed to be a case of suicide with a shotgun as the weapon involved (although I could only find a 9mm pistol).

You and your team must go to the murder scene to ascertain the facts which, in actuality, involves moving a camera around a picture (you know, the one with the attractive young lady lying on the ground). When the cursor lies over some interesting object, like a handbag or ashtray for example, then you take an instant picture which pope up onto the screen, it's worth noting here that the diary needs two photographs — one just shows the outside and it is the second which reveals the very easy to miss details here and to rush onto the second investigative part which loads next but, no doubt, like myself, you will resort to sweeping the screen systemat-

ically with your viewfinder in order to unearth all the details this scene holds. It would take a Clouseau sense of the inappropriate to try to commit these facts to memory and not to make good use of your notebook.

So onto Part Two and this is where the pace slows, not just because of the need to think out and to see through each investigation, but also because the instructions are Inadequate leaving you to flounder in a most Clouseau-like fashion (oh crumbs, there I go mentioning that infamous French clot again, a right cliched review this one's turning Into). The State Police Force is one of the oldest French institutions since its origins date back to Napoleon, its experi-

HQ. Code M for message is the first of many access procedures for the Diamond Network. A message addressed to any service must include the code for that service and its base town and must impart as much information as possible.

The P Code stands for printer and this refers to a printer connected to your Spectrum. It must be an 80 column printer, otherwise you're with all the rest who must take notes manually.

S is for Statement. To hear

someone's statement you need to know, not surprisingly, their name and whereabouts. E for Examinations encompass things like Autopsy while Comparison allows svidence to be correlated and compared, for example, an alibi from one suspect can be compared to the evidence of another. If you are certain of someone's guilt it only remains for you to arrest the culprit, but arbitrary arrest is the sign of a , on go on, say it, a . . . Clouseau type of incompetent.

L'Affaire Vere Cruz is a much more promising release than INFOGRAMES last—Mandragore— but it falls just as much in presentation to the reviewer. Little help is given to get through what is a very complex game and one can't help but develop a healthy suspicion of games which are just dumped in laps; is it that the company doesn't want the reviewer to get far enough to see through the game? Leaving such weighty considera-tions aside what can be sald is that the program has an irritating autorepeat on its input routine and the second part of the game chooses blinding white as its background colour (in fact the whole lot, including the super photofits of sus-pects, are all boring black and white). Regular readers of this column needs any reminder of what I think of that ideal

Difficulty: very hard to get into the second part Graphics: very good Presentation: neat, but that blinding whitel input facility: keywords and sentences

MORON

Producer: Atlantis Price: £1.99 Author: P & J Sutton

In the past we had caveman, in the present we have commuter man, and in the future, according to this game from ATLANTIS, we have moron (plausible enough, I think). You find yourself on a moron spaceship orbiting 250 miles above, errr, wherever you are. But never mind where you are it's what you've got to do which is important find the three pillars of time (past, present, future) secreted about the spaceship by the devi-ous moron captain. Some very useful abbreviations are described on the cover including G for GET, T for TAKE, and O for OPEN commands so useful I found myself still trying to use them on the next adventure reviewed, to no

Oh, so that's where you are, in a teleport in the good old UK. You collect the torch and specesuit, is automatically (checked by looking up your inventory with I). Since you are told the telepart button is marked 'press', and no other direction is allowed, it seems the only way for-ward is to press it. 'Everything is dark' is the result but getting the right words to get the torch on isn't half a struggle. The unfriendliness here took my mind back to the days when you just slung any old illogical couplings at an adventure until it gave in and let you through. The pictures which accompany the first few frames are rudimen-

tary, but passable for £1.99. Onto the tlight deck and we have a situation so simple it's either a parody of stuffy adventures or a parody of pathetic adventures (a bit like 'Ever Decreasing Circles' TV which is so sparse and deadpan it borders on being funny). Here we have a red button, a yellow lorry, I mean button, a green button, a blue button, and of course a lever. Two of these buttons turn force fields off, one nor-maily turns the lights on (but the fuse is missing) and another starts the ship's self destruct sequence.
I'll leave you to find out which causes what to happen!

The lever, naturally enough, is stuck. There is indeed yet another option at this stage; pressing the teleport button once more, but this simply has you ending the game without any of the pillars of time — and a score of zero percent.

Shortly, a moron appears, welcomes you aboard the ship and offers the assistance of his colleagues who'll help whenever they can. So, it's just the captain who's a villain; a reassuring thought this. Untortunately, there are other nasties willing to make up for the moron's hospitality — like the wolves who make a meal of you unless you deal with them within a very few moves. But wait a minute, perhaps the moron crew aren't so friendly. They later ask you to stay

for lunch and then nearly forget to tell you that you may be on the menu!

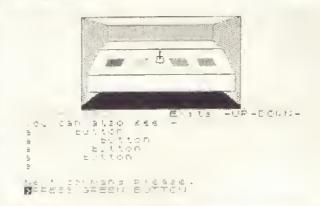

In the limited time I had to play this game I never quite got on top of the wolves. There is a great deal of spaceship to explore in the tew moves the wolves allow you. There are the upper, middle and lower transit bays, and the recreational area at the very bottom. On this lowest level I tried locking myself variously in the steel telephone box and the wolves' cage itself without success, the wolves always miraculously getting to me to munch my bones to calcium bis-cuits. Even the laser rifle and grenade from the armoury on the lower transit level didn't provide much help — I only succeeded in blowing myself up with the gre-nade! Still it's nice for a change to leave a review with a puzzle to whet the player's appetite.

For £1.99 Moron has some nice touches and I really enjoyed play-

On the bridge of the good ship MORON — now which button should you avoid pressing?

RETURN TO OZ

Producer: US Gold Price: £7.99 Authors: KAOS

Now it you think Oz is a rather down to earth character from an ITV comedy show, then this software is not aimed at you. No, it is aimed at a younger audience, who, enthralled by tales of the who, enthralled by tales of the original (starring Greta Garbo . . . err, that can't be right err . . . Elizabeth Taylor, well, someone incredibly famous) from their mums, rushed out to see the recent remake starring someone equally unforgettable. It all began with an Elton John shum entitled. with an Elton John album entitled 'Goodbye Yellow Brick Road' which was so good (not to mention long) that a chap who worked at Disneyland, called Walter, thought he'd base a film around the album. That's where Shirley Temple and Zena Ravioli (her stuntgirl) came in, child pawns pushed forward in the limelight totally unsuspecting the deeper meanings to the Bernie Taupin lyrics of the filmscores; hence its cult following. (Facts courteousy of the YTS information bureau).

Now, as I've said, this one is for the kids, which should be obvious to anyone who looks at the cover as it has KIDSI plastered all over it. Generally the program works very well for its intended audience, with the need for text input replaced by a menu bar accessed by pressing ENTER when the SPACE key has highlighted the option required. Slightly more clever is the way objects in the pictures can be highlighted with the SPACE key. The main options are LOOK, TALK,

main options are LOOK, TALK, SEARCH, GET, LIST, and LEAVE. LOOK is really very effective and gives the young varmint playing the game a full low down on what the SPACE key has highlighted right there up on the screen. For example the first screen only tells you that you are in the farm yard looking for Billina. But using LOOK we see that this scene has much to offer and teach us. There is Aunt Em, some good white hens which lay their eggs every day, and (after SEARCHing the wooden coop) Billina, which is a beautiful golden coloured hen, which hasn't laid an egg for ages. If she can't provide

the eggs for breaklast then she'll end up providing the meat for supper. (And this is where Colonel Saunders, head of the US Allied forces, gol his idea for naming his fast foods, after the state where Dorothy in the film loses her marbles — YTS Info Service).

TALK is another useful command where you can while away

TALK is another useful command where you can white away many happy moments conversing (with various degrees of success) with the various straw-headed flower pots you get in these kind of stories and thereby learn much about your quest and the routes you should follow (sadly, the Yellow Brick Road, like a present day M1 has long ago cracked up and you'll soon meet diversion signs). LIST leads onto the sub-options of DROP and USE.

I have one major complaint to level at this program so let's get it over with here; some of the printing is bugged with print split at line ends and some lines begin with full stops. Now if you consider the age group this game is aimed at these errors take on quite some significance.

Anyway, let's finish this one with the official version of the story, to rubbish all that disinformation from the YTS Into Service.

You find it difficult to sleep. All you can think about is Oz. The wonderful world of Oz. The Tin Woodman and the Cowardly Lion

Aunt Em who looks after Cameron when he plays RETURN TO OZ. Assh!

and the Scarecrow. All your friends from magical Oz, where anything can happen if you want it badly enough. 'Oh, why did I wear the magic Ruby Slippers and wish to be home in Kansas?', you think quietly to yourself. If only you could find those slippers and wish yourself back to Oz. But every day, the same, you search in vain, 'Kansas', you say to yourself. It's not quite as exciting here on the farm as it was in Oz. You can't even mention the word 'Oz' without making your Aunt Em and Uncle Henry upset and angry. But something is wrong in Oz. You know it. Today is going to be different.

though, you are going to find a way to Return to Oz.

Don't know about you, but I preferred the YTS Info Service version.

before a small post office counter in a long queue. Standing behind you is Princess Diana waiting for her family allowance. Through a door to the south heavy traffic can be heard moving along the high street. Prince William wears a set of enormous rubber ears upon his head. They sway wildly from side to side as he runs madly about impersonating an aeroplane.

From this first frame you will see

From this first frame you will see that the royal persons mix quite freely with you in the streets of London, although you must negotiate your way into Buckingham Palace to meet the really alcof ones. Prince William, however, is too young to stand on ceremony, and he snatches the giro from your hand before you've had the time to cash it in. And so begins your task to wrest the giro from the little darling's hands in order to give the Queen her money, but the road to achieving this is amazingly convoluted.

luted.....and fun.
There are not that many graphics in this adventure; I can only remember seeing one (the Telecon Box) in the lirst part of the gameand it would be more honest to consider it a text adventure. The Telecon Box is reached across a zebra crossing which is traversed only when the beeping stops thanks to the constraints of the program. Never mind, the program allows you across and you hear the telephone ringing. Answering it starts a recurring chain of events which have you telling Andrew in Rocksoffs nightclub about the var-lous states of his girlfriends in regards to their being in the family way. I particularly liked this part for inventiveness and humour, qualities which run through the whole adventure. Just a little further on you negotiate the Lon-don buses. Very often a change from one route to another is required to get you on to your destination with the EXAMINE command telling you which hus number has pulled up at the bus stop. You will notice around the road area a lot of repetitive car honking which becomes a bit of a bore to read every time but it wouldn't be an adventure without some irritant.

HRH is a really funny adventure. It is long (after quite some time I got the Rule Brittania ending time and a miserly score of 5 out of a possible 250), well-written, and sufficiently devicus to hold your attention for hours at a time. Available mail order from eth pay software, 18 Flaxhill, Moreton,

Wirral L46 7UH.

HRH

Producer: 8th Day Price: £6.95

At last, STH DAY SOFTWARE have gone all hip-hop and commercial (like) with this offering which mercilessly lampoons the royal beings

As Britain has slid into a rather sorry state, the daily trashy papers have nothing more to concern themselves with than the boring everyday machinations of the royal beings, Some of the columns are a bit personal in the press, others affectionate, while others still make satirical mileage out of the royals' peculiarly detached aloofness, a family apart. This game is certainly of the latter category, so if you're the type who goes fishing when there's a Royal

Wedding on the telly then HRH will be right up your street, even if it's just a row of crumbling terraces.

The cover illustration is a one penny stamp depicting a po-faced monarch with her two index fingers pointed in a most unbecoming fashion, God Save Our Gracious Queen rings out on loading with a screen which is by appointment to her majesty's bodyguards. But this is only an introduction to the humour which begins with the storyline. It's Wednesday morning and, sitting hunched beneath the letter box waiting for your dole girc, you rummage through an ash tray for a last remaining dog end. After what seems like an eternity the letter arrives, Hallalujahl Eagerly ripping open the DHSS envelope you clutch the giro to your beaving chest, gibbering uncontrollably.

Regaining your composure you notice with a gasp of horror that it isn't your name on the giro. Thunderstruck you rack your brain for a local pub called the Queen Elizabeth ... until, that is, you notice the address.

The giro slips to the floor, the long line of zeros on it staring accusingly up at you, like Princess Margaret after you've nicked her last bottle of brown ale. It looks as if you've got the Queen's giro, surely she must have yours? Will she have to resort to selling the corgis to MacDonalds to pay for a new chainsaw for Prince William's birthday present..? How is she going to have meals on whoels for the Queen Mother..? And how are you going to pull off handing over a giro with the Queen's insignia on it?

Hoping to save the threatened dignity of our most gracious monarch, and perhaps making a bob or two selling your story to the press, you see yourself being knighted as you hand the Queen her dele money.

her dole money . . . This game is Quilled and Illustratored but makes up for its cloned look with a redesigned character set — light on a dark background so its easy to read. Of course the main interest to the game is the humour directed at the royal persons. I think this game's really got something here, as it is well-written and the jokes are well-executed. Quoting the first location may sometimes seem a little too easy but with this game it's well worth white as it is pivotal to the first part of the adventure. 'You are

inside the telephone box — give Andy a bell down in the nightclub and pass on the news. , , ,

Without music, graphics and sound the Board Game has become the most popular in the world. Now it has them.

"Over 3,000 questions of no vital importance."

4.T.U.M.P.4

Another record postbag for SIGNSTUMPS with the most popular queries, once again, centering around the BOOGH, KENTILLA and SEABASE DELIA. Before we start with the queries S Holland from Botton provides an answer to an unsolved problem in the September Issue:

"Christopher Manley from Norwich wants to know how to pass the Shadow gate. Please tell him hemust WEAR CLOAK which he should have GOT when he got the crown after speaking to the Baron. He must get the cloak before he gets the crown as the game moves on as soon as the crown is taken. Tell him also that when facing the Shadow gate, HELP may help him."

Tom Wheatcroft from Birmingham is having trouble with TERRORMOUNOS and writes:

"The steptadder doesn't want to co-operate with me — I keep breaking my neck when trying to use it. I have collected everything except the sultease and camera. Please tell me how to use the stepladder."

To make the stepladder safe you will need to MPDL TUFQ.

On the same game N S Christensen from Denmark is having difficulty finding the passport. Try FYBNJOF TFUUFF.

Andrew Dowd of York is stuck on the very popular eoggrand asks:

"Can I enter the Troils' cave, the one with the locked stone door, and if so how? How do I escape from the Gobiins' dungeon? Do I need the useless, curious key?
How can I escape from the Elven Hall? The butter hassies me a lot. Do I need to use the coffin?
How do I open the magic door near here?"

You can enter the Troils' cave using the stone key. To get the key you will need to turn the Troils to putly by TBZ MYY. In the Goblin Dungeon EJH TBOE then TNBTI USBQEPPS, after you have created some light USPX SPQF until it catches on the window, then QYMM SPQF. Escape from the Elven Hall is roughly the same as in the hosem; I don't know how to open the magic door.

Steven Murray from Wigan writes:

"I recently purchased seasase betta and am having a few problems. I would appreciate it if you could answer the following questions. How do I get the chicken to lay an egg? How do I open the heavy metal sliding doors? How do I get the magnet? Where's the tape for the tape recorder? And finally, how do I get the plank nailed to the shipwrack?"

To get the chicken to lay an egg DIFX HVN then CMPX CVCCMF. The heavy metal tape can be found in the memory banks on level 3. As you have probably guessed by now, this is used to open the heavy metal doors. To get the magnet you will need the

screwdriver, FYBNJOF MPVE TQFBLFS and VOTDSFX NBHOFU. To get the plank from the shipwreck you will need to QVMM OBJMT XJUI QJODFST.

Jamie Cork In Stoke Poges, Bucks is having difficulty with ATLANTIS'S very popular MAFIA CONTRACT II and writes:

"In MARIA CONTRACT II I'm having trouble getting past the security fence. One time I tried cutting it with the cutters but found 1000 voits flowing through me. If you go a different way there is a brick wall and I cannot get past that either, and also if you bump into the guard dogs they chomp you to bits, What is the cold meat for and also when you are in the car is there any way of avoiding a crash?"

You can avoid being chomped by the dogs if you UISPX NFBU to them. You can now TIPPU QBEMPDL. Now get the HMPWFT and XFBS them. You can now safely cut the fence.

No adventure trail would be complete without more tips on KENTALA, and as I have received twelve more queries this month it's only right that I answer a couple. J Li from Bootle Merseyside writes:

"I would be grateful if you could reveal the answers to the following questions:

1) What use is the large glowing crystal?

2) What use is the Emerald which shows strange images?
3) Where is the Fireshield?
4) What use is the metal rod found in the Trolls' lair?
5) Of what significance is the

Shadow creature?
6) How do you get past the Glowing Ward? I have tried hitting it with Velnor's Staff but the computer replies Nothing Happens!
7) Is there an easier way of getting past the large trolt in the Black Tower? I usually end up dead!"

Several of your questions are related. For example Nos 1 and 7. The crystal can be used to store up sunlight which of course has a detrimental effect on the health of Trolls. Try examining the emerald in a dark place to find the magic word to activate the staff. The fire protection scroll is being guarded by the dragon isomy!.

Further on in the same game S Ford from Hessocks, West Sussex is having difficulty progressing past the natural cave below the Demonic Idie.

To tind some assistance FYBNJOF EFCSJT.

Alan Sutton of Woodley is yet snother victim of a rather difficult THE HELM and writes:

"Please help me, it's THE HELM from PIREMIND. I am stuck in the wilds, I get the key from the river, unlock the shed, get the plank and cross the gorge. Then It gets hard as I keep ending up in the wilderness. Where am I going wrong?"

You shouldn't enter the wildemess, but should cross the swamp instead. You can use the same plank that was used to cross the gorge.

That's about all the room there is for another month. Send any questions you have as well as any help you can offer to:

4-UP-E-RHE-ROEF

This month's leading SUPERHERO competition is over the MASTER-TRONIC game, MASTER OF MAGIC, and the undoubted winner is Sean Doran from Belfast. Sean's winning date was August 4 (at 2.30 in the morning to be precise). He confirms, "When you drop the Amulet of Pedestal, you see the following message: A sudden flash of crimson light. Theiric appears, he says 'Thank you for saving my life. I will now return you to your own world! Fare ye well'. Just beaten into second was Chris Hunt (Aug 5) and the laggers were R Davy (Aug 13) and M Bailey (Aug 21).

On Sep 5 at 3.16 pm HUN-

CHBACKIN fell to A Burgess of Cheshire when he killed the cardinal and ran off with Esmerelda over the rooftops of gay Paris to live happily everafter. PLAYERS game shewsbury KEY was completed on Aug 14 at 8pm. When the game is finished you enter your name and a screen is saved which is a kind of certificate saying you have finished. If I'm not mistaken we haven't had a VERY 810 CAVE

if I'm not mistaken we haven't had a very 810 CAVE ADVENTURE SUPERHERO (and if I am mistaken then it's just tough). The accolade here goes to John Wilson of Rochdale (Sat July 19) who is a regular II ever there was one.

See you next month.

Quite a mixed bag this month. There's some more into on two old favourites: SHERLOCK and THE FOURTH PROTOCOL. Added to these letters are another adventure vocabulary routine, some queries on GAC the new adventure creator, an adventure I somehow mis-placed which has now come back to haunt me, the ultimate bug found in a res game, and a chappie who thinks I might want to change my mind over awarded CRASH Smashes. Well, all I can say is I'll follow the mores of the times and say 'The Trail's not for turning'.

ZIPPY ROUTINE

Dear Derek, You printed a BASIC 'seerch code for vocabulary' program a while back. I've knocked a machine code version up for you and it is a million times faster than BASIC; try it and you'li never use BASIC again. Type it in and save to tape by running the program. Reset computer, load code of your game, load my routine, and then RANDOMIZE start of game; LET a = USR

10 RESTORE : FOR n = 23298 TO 23334: READ a: POKE n, a 20 DATA 205, 107, 13, 62, 2, 20 DATA 205, 107, 13, 62, 2, 205, 1, 22, 237, 75, 118, 82, 33, 0, 0, 237, 66, 229, 197, 63, 10, 254, 31, 56, 6, 254, 127, 48, 1, 215, 193, 225, 3, 43, 124, 181, 32, 235, 201 30 SAVE "eserch" CODE 23296, 40: PRINT "Rewind to verify": VERIFY "search" CODE

Good sh? Because the code's in the printer buffer it wan't interfere with the adventure, so once you've finished, just call the adventure in the normal way. Ben Hanson, Totnes, Devon

PROTOCOL AT THE BARBICAN

I thought that readers would find directions in the Barbican, FOURTH PROTOCOL, USeful. When you emerge from the Barbican tube station go north. If you now LOOK you'll find a theatre. From there go N.E.E when you can talk to a guard. Then N.W.S.E where you'll meet afforist and can buy the flowers for Blodwyn! Then N,N,W,E — another guard, then S,N,S,N,W where you'll find a tramp — talk to him! Finally go W,E when you LOOK to find yourself in a newsagents. Talk yourset in a newsagents. Tall to enable yourself to buy a guide. Using this will then automatically transport you back to the tube. And you've successfully negotiated your way around the Barbican.

way around the Barbican.
Further to Mark Whatling's
query in CRASH, issue 25. I too
crashed the program when
travelling wast after a few
moves, it would seem that this is
some sort of 'bug', but if my
directions are followed it is possible to avoid the crash

Don Markwick, Eastbourns

MORE QUESTIONS THAN ANSWERS

lam happy to be an owner of the brilliant eac (why did the FRONTLINES guy review it?) and have nearly finished an adventure. Now I have started on the graphics—they are good whilst black and white—but when I start to colour them in they just clash, the colours, that

I know about the Spectrum's stupid colour problems, though there are a few tricks I have learned to help me. What I want to know is whether the sunser Video Digitizer can help?
1 Can it be combined with GAC? Or will it only run on its own? 2 Can the pictures be coloured, or just black and white? 3 Will the graphics really be lifelike, or just expensive rubbish?

Please printed answers.

A Taylor, Surrey. Please print this letter as I

I'm sorry to say that you won't be able to use the SUMSET Digitizer with OAC as it simply generates a full screen pic-ture in non-compressed form. Four of these pictures would take up the entire memory of the 48K Spectrum. I would guess that the results couldn't really be any more than monotone due to the Spectrum's attribute limitations - aithough there's nothing to stop you trying to add limited colour to the digitized pictures.

BLUE MURDER

Dear Derek.

You may or may not recall receiving a certain bulled adventure entitled MURGER. In all possibility you have not played it PLEASE DO! You may like it though it is, I admit, far from per-

Anyway, from reading carefully your wonderful adventure section (on dear, a bad sign — resorting to crawling) and mak-ing copious notes (have tried to pack in a lot of features le long location descriptions, good EXAMINE function, colourful inventory, realistic object start locations), and new features (allbl, Info). These were derived from all those several page-long letters on "My Perfect Adventure". I have put as many in as allowed by the limitations of THE quel (superb), though with asc coming out I may consider a purchase. You seem to egree with these letters so perhaps the game may rise in your estimation? Hope so. I also read that you wished

more adventure companies would send in maps of their games, your wish is my com-

mand as you can now see. Derek, in the unlikely event of your reviewing the game, don't forget this...the game's price is still £2 (cheque, PO) and if the fast loader fails, try the normal load side. WALLSOFT, 10 Wheatlands Park, Redcar, Cleveland TS10 2PD I'm glad you wrote to me as I remember reading a favourable review of your game comewhere end thought to myself, 'I'm sure I received a game like that'. The likely scenario is that I received your game during a particu-larly busy month, it wouldn't load, I put it to one side, and moved house leaving it heaven knows where. (The fact that I received a game with a very similar title to confuse your game with didn't There's some general advice here for any company submitting programs to this column. Ease of loading is very important; providing two versions recorded using different cassette recorders land therefore head slignments) on each side of the cassette la a useful device to prevent frustration on the part of the reviewer. In this respect the small company has an advantage over the larger concern which only has time to zip off standard copies of their games. One last fip for small companies—any magazine which doesn't any mayaune which deesn't review your game after favourable responses in rival mage should be sent another copy — this usually jogs the memory and does the trick.

Million Market

THE ULTIMATE BUG

Dear Derek, From Christmas 84/85 I have enjoyed Spectrum games, being restricted previously to the school's RML 380Z, and also the odd dabbling with machine code, and have sampled arcade conversions, arcade adventures and have finally fallen for berderline adventuring/strategy/ you've-hed-a-lot-of-lettersbout-it via the freebie you get with a Curren Speech and a budget-priced sherLock. (??OB). After running up against the coded letters in SHERLOCK, I concentrated on MYSTIC TOWER (curnax Speech game) and from there progressed to out of THE SHADOWS and it is about this I am

primarily writing.

1) Why in the dungeons does exciting via some doors cause crashing which therefore leads

to much saving?
2) is there a level below the one populated by dragons, balrogs and spiders as in my quest (8-Sceptre among Demons) I can't find the respective creature?

After playing cors for a while I, deciding it was the next logical step, bought sas even though I knew it to be slightly bugged. However I have mixed emotions about this game. Despite the fact I couldn't get used to the awkward, annoying control system, I feit it was in essence a

สเสม เกเมียนให้เหตุกดี

good idea (note I didn't say game) so I persisted, estab-lished a powerfullish magical character and used about 70 lives to clear quadrant one, then the bugs stepped in - items vanished off lists (not picking up a a magical item which disap pears the lot, I had got fly for that) monsters being reincar-nated and also the ultimate bug which has reduced sas to a quiet, dusty corner. Because I was laden with goods and mov-ing very slowly I decided to cache them in a newly con-quered quad two room, only to find that when I scrolled the inventory list to the last object the game went crazy. I disco-vered I was holding objects such as 'dismembered', 'Zob', 'Flud-dit' and when I pressed select the game either crashed, prop-elled me to someplace else, or elled has to somepace size, we returned to the game as normal only to crash when it felt like it. To say the least I'm disappointed and £10 out of pocket.

Gordon Waddell, Kilsyth

SMASH FLASHES

Dear Mr Brewster,
Although you didn't write the
articles in question, Pete Tamlyn's thoughts on 'Rote Playing
on Computer' have proved to be extremely interesting — mainly because I agreed with his comments! In particular, he men-tions swores a soncery and HEAYY ON THE MAGICK. Both games were awarded Smashes in your column and yet when I re-read your reviews on them recently I came to the conclusion that you pre-ferred sas over masicx. Am I cor-rect in this assumption? I ask because I agreed with Mr Tamlyn when he states severe disappointment over esa's game and praise for gangovie's which has so far been the nearest thing in feel (if not execution) to true role playing games, DARK SCEPTRE sounds like it too will achieve this much sought after atmos-

On the subject of previous Smashes, do you still feel that the grand epic LORGOF THE RINGS deserved this accolade? Hound the game słow, bug ridden, lack-ing atmosphere and ultimately boring. Many other magazines awarded it their highest prize but are now criticising it. If only

Philip Mitchell and his team would look at the quality of LEVEL a games before they start on Part Two. It's because of them that I sympathise with Mr Barnes SHERLOCK complaint in Issue 32. In fact, I don't think Philip Mitchell should write Part 2 at all. The inglish parser is badly outdated and if they're going to have graphics - do them property!
Richard Hewison, Luten

You shouldn't compare reviews in different issues as you can easily be led to the wrong conclusion. HEAVY ON THE MAGICK was reviewed a couple of months after sas and in my opinion is better. I still like ORDOFTHERINGS but It has many flaws like speed, bright background and bugs which are inexcusable. Unless part 2 Improves on part 1 in these respects I think a Smash Is most unlikely.

SHERLOCK SOLVED

The main thing to bear in mind is that everything important must be examined. As soon as the geme starts tell Watson to folgeme starts ten water to do flow you, get the oil lamp, open plain door and go north. Wear chinaman's disguise, then take it off. Do the same with the old man's disguise, then leave house and take a cab to King's Cross Road, Catchthe 9.15 train

From Plattorm 3 to Leatherhead.
Go to Chief Constable
Straker. Follow him to the
female corpse. Closely examine Bridge and corpse. Say to Les-trade 'Brown killed herself'. He will ask for proof but don't worry over fills. Examine the note, follow Straker until you reach Basil and Daphne and wait until Les-trade has questioned both of them before asking Basil 'Tell me your address'. Follow Straker to the kitchen, watch while Lestrade questions the servants, then say to Cook 'Tell me about Basil'. Follow Straker to the body end closely examine the bookcase, go west, get the clothes and examine them. Then go east, examine the body, and go to Jones's front gate, waiting for Lestrade and Straker to arrive. Follow Lestrede back to the library end listen to Ffoulkes's story. Follow Les-trade back to the front gate, then Straker back to the kitchen. Lis-ten to the description of Ffaulkes and follow Straker Dack to Basil and Daphne, Ask Daphne 'Tell me about Tricla'. Follow Straker back to Jones's front gate. Follow Lestrade to Scotland Yard.

Catch a cab to Sidmouth Street but do not get out. Instead wait for Ffaulkes to arrive. He will go into his house and come out again, then haif a cab and trevel to Slater Street. When you arrive, pay the cebbie, Mannaph

get out, wear the chinaman's disguise and go north. Take off the disguise and listen to Froutkes's confession, then go south and wait for Lestrade. When he arrives say to Lestrade 'Ffoulkes is innocent, Ffoulkes visited the opium den' twice, then return to Leatherheed.

Go to Cobden Lane, enter Basil's house, and open the safe. Get the letters and examine them. Go upstairs and examine the plano and gramophone. Closely examine the bed and window. Now enter Mrs Brown's house, go upstairs and through the wooden door. Open and closely examine the drawer, open the false bottom to retrieve a note and bank account book. Examine both. Return to station, go to platform one; wait for Lestrade. At some stage Basil should pass, but don't take any notice. Say to Lestrade 'Tricia blackmailed Brown'. Don't worry about the lack of evidence. Go south, follow Straker to the east side, examine the stream and Lestrade will now believe Mrs Brown killed herself. Go to platform two end catch the 10:45 train to Kings Cross. Catch a cab to Portman Street and go to Tricia Fender.

On arrival open the safe and get the unfinished note and fol-der and examine them. Say to Tricia 'Tell me about the clothes' and tell Mrs Jones to fellow you. Catch a cab to Parli-ament Street and go to Scotland Yard. Sey to Lestrade 'Tricla blackmeiled Brown', 'Tricla had the plans', 'Jones killed Tricia'. He will ask for evidence. Give him the clethes and ask him to examine them.

Say to Jones 'Tell Lestrade about the clothes', then say to Lestrade 'Jones killed Tricia' and he will believe you. Now head for Camden Street, go east and wear the chinaman's disguise. Wait until 10:06 and go northeast. Do not stay in Basil's house too long! Go to the library and get the note. Examine it but don't trouble yourself with the decoding. Go to the backyard and closely examine the trashpile. Get note and examine trashpite. Get note and examine it. Go back to Watson end take off the disquise. At 10:06 go northeast, get the note and examine it. Catch a cabto Parliament Street, go east, end say to Lestrade 'Basil Phipps has the plans', 'The sale location is the Old Mill Road'.

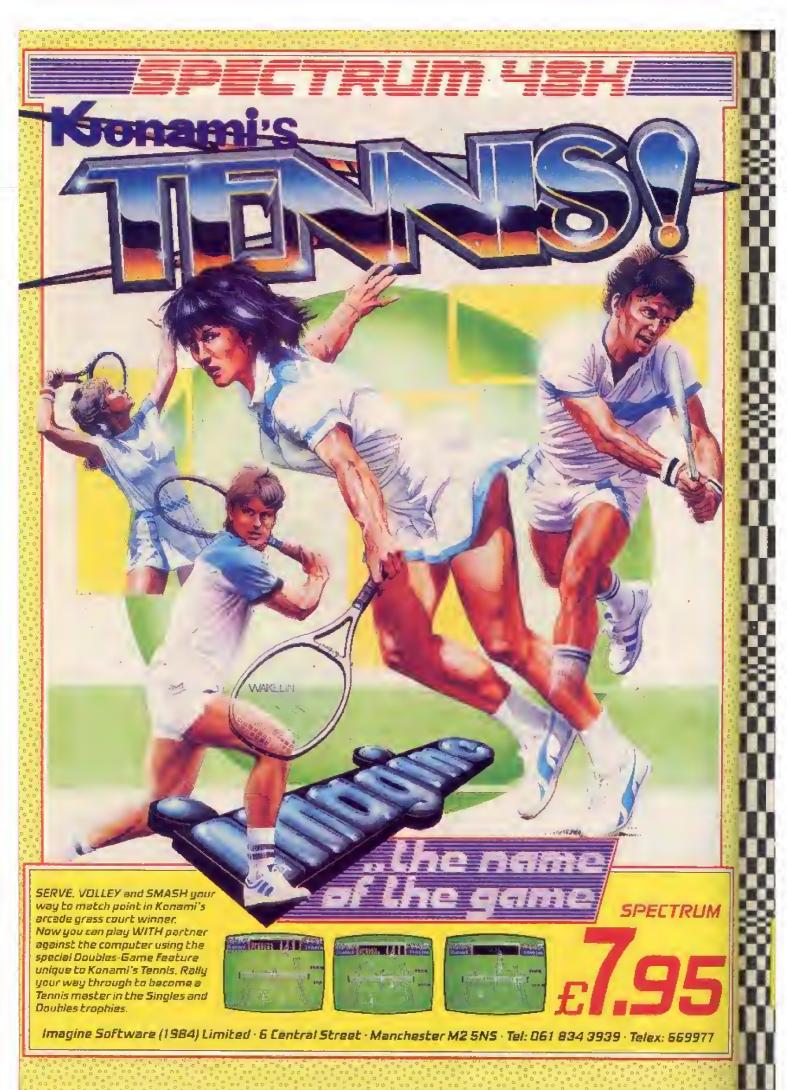

Now follow Lestrade until you reach Old Mill Road. Basil and

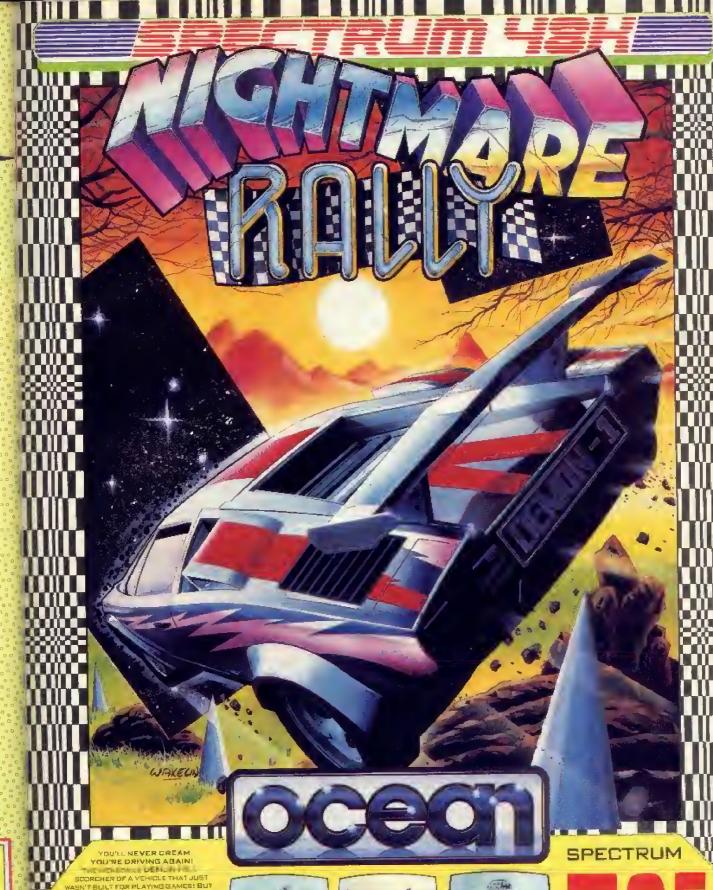

reach Old Mill Road. Basil and the Germen agent are there but the dermen agent are the out if you stay in the police cab, Les-trade takes no notice and lets them get away. So, as soon as you get there, say to policeman 'Furiously go to Main Street'. When you errive back in Leath-erhead waste no time in going to the station. Do not worry about Basil and the German agent — you can't deal with them yet. Follow Lestrade until he halls a cab, then climb into it. Before Lestrade can say where he wants to go, say to cabble 'Go to Buckingham Palace Road'. When you get there wait until Lestrade enters and errests the culprit.

Unit BH, Armstrong Mall, Summit Centre, Southwood, Farnborough, Hants, GUI4 ONE Tel: 0252 522 200.

ook. There's this big blue furry monster called Berk, and he lives in a castle. He spends his time feeding 'im upstairs, and trundles around his dank and gloomy kitchen collecting the fried slimeys or worms or squashed eyeballs that his master demands. And there's a large trapdoor covering a subterranean zone where nasties of every shape and size lurk. Berk doesn't get on too well with some of these.

It sounds exactly like some of those cute little games which featured stunted animals climbing up and down levels and ladders, and which sank without trace about two years ago. The kind of game which now gets crucified whenever it inadvisedly raises its rute little head.

Berk, however, didn't get crucified. Maybe it was something to do with those huge animated sprites, with not a hint of colour clash, smoothly tolling around the screen. Maybe it was the Ingenious problems posed, asking you to think laterally as well as logically. And maybe it was just the plot itself, bizarre in the extreme, and the well-rounded character of Berk, with all his endearing clumsiness.

Whatever. Trapdoor, the exploits of Berk, got astounding reviews right across the board, with CRASH almost Smashing it with 88 per cent - surprising enthusiasm for a game which is based on a kids' TV series, and could be mistaken for an underfives educational program.

And probably no-one's more surprised than its author, Don Priestley, who's been cheerfully ignoring lukewarm reviews for the last year or two, all the while refining a graphics style that has become a personal trademark

LONG IN THE TOOTH

Like the games he writes. Don is far removed from the public's conception of what a programmer should be. Gangly and bearded, he looks like one of those people that hangs around science fiction conventions. He is also, well, old. 'I have been described in the press as," he pauses, "a pensioner Well, I'm not, though I am getting a bit long in the tooth. Not long enough, however, to worry about it."

Neither is he, as you might imagine, an ageing systems programmer who tinkers with home computers for light relief. Until 1979 Don was a teacher, and he first saw a computer in 1981. It was just about then that Clive Sinclair was beginning to bring technology to the masses, and Don thought that his teenage son ought to learn something about this new science which, as he puts it, 'was no longer the dabblings of a cracked minority'.

They both enrolled in a night school to acquaint themselves with programming in Pascal, and though his son dropped out after a month, Don stayed on, immersing himself in the abstract delights of developing a life-type program, one of those mathematical puzzles where an organism grows within memory according to a certain set of rules. Don's subsequent purchase of a ZX81 was simply to convert this program to BASIC.

His first commercial game was the result of delving through the archives of the Lancashire Public Library, where he came across a program called Mugwump. In bar code. He played around with the idea, and it eventually saw the light of day as Damsel and the

Don Priestley — A well-matured Big Cheese when it comes to TV tie-ins . . .

Beast, bought by see ever, a young company then in its ascendancy. Those of you who are almost as long in the tooth as Don might remember it.

BYTTEN BY THE BUG

Don now began a brief but fruitful freelance association with sug syrse, which included the two classic ZX81 games, Dictator and Mazogs. Dictator was the first of the banana republic trading simulations which people went, um, bananas over in those heady days. It was later converted to run on other machines, and is still hailed as a minor masterpiece.

For those unfamiliar with the ZX81, it is perhaps difficult to see why Mazogs created the stir that it did, back in June '82. Don explains: 'I was trying to get

TERRY, ARFUR AN

away from all those games which revolved around a dollar sign being chased by an asterisk. Mazogs featured large mobile sprites in a solid maze, all constructed using Sinctair's sugar cube graphics. It was my first game which got itself a full page ad. **SUE BYTE** went over the top on that one ... 'The game was later converted to the Spectrum, and retitled Maziacs, published by **PKTRONICS**.

"3D Tanx was one of the most successful games ever written"

The days of the ZX81 were numbered now, with everyone going do-lally over the Spectrum, and Don joined **by Troones** as a director, in March 1983, where he stayed for over a year, writing 3D Spawn of Evil—'too smart for its own good'— a 'bog-standard' Meteorods, and 3D Tank.

"3D Tanx was one of the most successful games ever written," says Don. "It sold at high levels consistently over nearly 15 months, averaging about 5,000 a month. Levels unheard of now," he adds, ruefully.

And then there was *Jumbly*. Remember *Jumbly*? Of course you don't. It was a sliding puzzle game, and even now Don still thinks of it with a sense of achievement. He remembers a letter in a magazine which went something like; 'Dear Ed, I've been playing *Jumbly* for three years and I've only completed five of the

pictures ... 'At least one person got value for money,' Don laughs. 'I really thought it was good, but puzzle games are not too acceptable to the public, and it didn't do very well.'

Which brings us on to Minder

THE WORLD'S YOUR LOBS TER

A game based on the most popular TV series since Coronation Street should have been a record-breaking hit. It wasn't Minder landed like a blue whale dropped from eight miles high. A resounding flop.

Here's what one CRASH reviewer said about it, in June '85.' I was disappointed. I found it difficult to get on with ..., Time-consuming and annoying ... A tenner's a bit steep, ain't it?' So, what went wrong?

"It got out of hand, there were too many things going wrong - in fact, the game was written twice." Don elaborates, "The whole structure of the game was built on sand, not rock. Short of tearing it down and replacing the foundations, there wasn't much it could do about it."

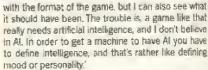

As TV spin-offs go, though, Minder wasn't too awful. Unlike many other games written around licensed titles, bearing little or no relation to the source matenal, Minder ambitiously attempted to translate typical plot, character likenesses and even language from the TV to the computer screen.

Don laughs again. 'That's fair praise, I was pleased

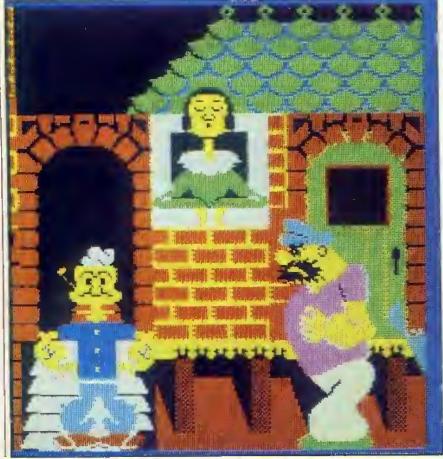

Don's next program for **DKTRONICS** was another licence — *Popeye*— and suddenly it looked like the company had a chart-topper on its hands. Certainly, it woke up a few comatose games reviewers who'd fallen asleep over *Roland's Rat Race*, another TV-am spin-off,

The first thing reviewers noticed about Popeye — in fact, its main attraction — were the colossal graphics. Here's another CRASH reviewer, gelting excited; 'For the first firm masses of colour have been used and with no colour clash. I've never seen anything like it ... A very well finished game that proves even the impossible can be done with a clever bit of programming. Brilliant! Buy it to believe it.' Not surprisingly, it got a CRASH Smash.

The game had been a long time coming, though, and more ads for it appeared in the twelve months previous to its release than after. Don fills in the background: 'a version of *Popeye* had been already written by A. N. Other, and it was duff — a platform and ladders game. I was asked to do it again.

The graphics happened by chance. The licensors, King Features — were at pains to point out that any game had to include fair representations of the central cartoon characters, so I sat down with a large grid and came up with a figure of *Popeye* which was seven characters high and six wide — 42 characters to move for each frame!

'I nearly abandoned it then. It was just too big! What could I do with it? The game really developed in the way it did because the figures were so big.!

ND 'IM UPSTAIRS

The second Don Priestley gams to feature monster sprites, BENNY HILL'S MADCAP CHASE isn't exactly Don's favourite program

found the reviews pleasantly surprising. Unfortunately, **bk** had lost interest in software by this time, and the bottom had latten out of the market. They were ready enough to offer it to **MACWILLAM**."

"The less said about Benny Hill the better"

Despite the ecstatic reviews, Popeye soon vanished from sight, To resurface recently in versions for the Amstrad and Commodore. By this time Don had left **DKTRONICS**, though he was to write one more game for Them, Benny Hill's Madcap Chase. 'But I don't want to talk about that,' grunts Don, Why not?' The less said about Benny Hill the better.' Do you think it falls as a game or as a TV spin-off? Don pauses, "fee!"

THE TRAPDOOR OPENS

With Trapdoor, Don's latest game on the new macmus, LAM label PREADMA, it looks as if he might, at last, have that elusive best-seller. It's yet another computer game based around a TV series, though in this case it's a series which has yet to appear, so if the game sells well now then it is doing so entirely on its own ments.

With three other TV titles under his belt, is Don getting a reputation for specialising in this field? 'Well, I'll have a reputation so long as I don't do too many Benny Hills, But yes, I suppose so, and I think Trapdoor will enhance that reputation.'

Converting successful formulae from one medium to another has its own advantages and disadvantages. Often Don is given a video to watch, and then he spends the next few weeks just walking around thinking about how best to capture the spirit of the programme in a computer game. Sometimes it's easier than others. The main character in *Trapdoor* was given to me on a plate, Berk was large, easy to draw, and best of all, he's entirely blue. He's almost exactly like the TV character. All the other monsters are mostly my own design.

But the trouble with TV series is that they're essentially narrative, whereas arcade games are not. The end of a game is not an end, but a level of attainment. What I do is convert from narrative to competitive.'

"I think that Trapdoor will enhance my reputation"

BIG HASSLES

Programming is an essentially lonely occupation, and Don spends much of his time shut away in the study of his Mortlake flat, often for 48 hours at a stretch, while the trains and planes pass noisily around and above him. 'It's a bit like being a novelist ---- you just have to get your head down and get on with it. Thank God, I still consider it a paid hobby.

'What drives me on is the mystery element — will this program work? Is it going to appeal? Will it be too easy, too difficult? I don't work from storyboards, but instead constantly change things while I'm programming. If you plan something from beginning to end then you fall into the trap of doing the same thing again and again — like Agatha Christie or Barbara Caritland.'

Don regards himself as a storyteller, dreaming up ideas. He maintains that he knows very little about the technical side of computers — 'all that's a big hassle to me! — and remembers reading articles about using interrupts and thinking 'What are these interrupts! Why does everybody keep talking about lhem?'

This results in a rigid technical censorship, and to overcome it, Don usually approaches other people. The music on *Trapdoor* was done by someone else, and all Don's protection routines are programmed by someone who then sends back a mastermaker. He relies on a small clan of young users, who he's come to know over the years, to test and criticise his games. 'At the PCW show two more were recruited — they came up and asked for my autograph!'

Don's next game for **PIRANHA** is, for once, not a licensed TV tie-in, though it does include some characters which will be instantly recogniseable. Apparently the screen presentation is unusual, but he is unwilling to divulge any further details.

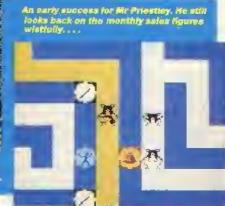

THE SURVIVOR

For all his technical shortcomings and advancing years, Don Priestley is a walking microcosm of the ever-changing software industry. His career spans the monochrome days of the limited but lovable ZX81, right through to the technicolour glory of today's bigger, cheaper, games machines. That he has survived, and produced both classic and innovative programs into the bargain, is a continual credit to his willingness to accept and overcome each new challenge.

Long may your teeth continue to grow, Don.

The amigble blue Berk stemps around the castle cooking up "goodles for "im upstairs

Here's another extra large portion of PBM news 'n' views. This month Brendon Kavanagh gets wind of the next PBM convention, samples some Arcadian delights, and still manages to talk diplomatically!

A JOURNEY TO ARCADIA

Arcadia is a computer moderated PBM wargame with strong fantasy and roleplaying features. Run by and roleplaying features. Run by Jace cames on an Atari ST, Ancadia's flexible software can hold up to 30 players who releplay as tribe leaders in the land of Arcadia.

At the start of the game, you receive a large wall map of the Arcadian landscape. You must design your character and your tribe, and then choose your preferred starting place from any of the map's 1575 locations. Here the GMs will place your home city, which you must use and defend. The aim is to use diplomacy and your armies to capture the other players' cities, as well as the non player cities. No easy task, believe

ROCS

Existing in the game environment are 90 player armies (three per player), 30 player cities, several computer-controlled cities, many computer-controlled characters and armies (to befriend, if you can trust them!), wozums (friendly but rare birds used for spying and scouting), and the Rocs. Hmmm, the Rocs. Rocs are not very nice birds at all. Rocs are dim, Rocs are mean. Rocs read BANG. And when Rocs are hungry, Rocs eat wazums.

MAGIC

Magic exists in Arcadia in the form of ancient spells located in secret places about the land. Magic is a mysterious feature: it is very dangerous, powerful and rare. So be warned.

COMBAT

Being a tantasy wargame, combat is a major teature of Arcadia. Combat resolution is no simple task since the GM takes several things into account, such as your army design, magic and the season.

The army movement system is neat and efficient, allowing your armies to make detailed manoeuvres during any one turn. This makes multi-army battles very tactical indeed.

TRADE

As in most good PBM games, the clever use of trade can strengthen your armies and it can also help you gain alliances. If you make a weaker player than yourself reliant upon you for food, then there is little immediate danger of him suddenly stabbing you in the back, Trading is done by using your armies, which makes them rather

CHEAP AT THE PRICE

Arcadia is a fairly low-priced PBM game to play and is proving quite popular in the UK. The startup pac-kage is very good by PBM standards and the game itself is great value: a Freepost address (no stamps needed for UK players), long printouts (later in the game being as long as 20 A4 sheets or more), and no hidden costst

The four GMs of JADE GAMES are real enthusiasts who appears at many of the British FRP Games Days with their PBM and FRP service offerings. They ensure that Arcadia is a well run, fast moving and well thought out game which encourages diplomacy as well as strong tactics. If you are thinking of joining another PBM game, why not try it?

A startup in Arcadia costs £5.00, but CRASH readers who send JADE GAMES the voucher printed on this page can startup for only £3.50. This fee includes the rulebook, first move, poster, a 20x30 wall map, and two free turns. Turns cost £1.50 (including Freepost) thereafter. Write to JADE GAMES, FREEPOST, PO Box 54, Southsea, Hants PO40BR before December 31, 1986 to take advantage of this offer.

PBM FORUM

Before I start this month's forum, I'd like to thank you all for the many letters I have received about PBM Football. Be sure to get next month's issue which will be full — well, nearly full — of football affirmation! Meanwhile, here's a selection of the past month's mailed

VERY INTERESTED...BUT

Dear Brendon

I was very interested when I read your first CRASH article on Play By Mail games. I would like to start PBMing but I don't know what I need, or which games to start with. Please help!

Bayid Heldstock, Deal, Kent

Four crucial things needed to begin PBMing are: imagination;

spare time (and plenty of it); a budget of at least £1 per week (depending upon the games you choose to play); and CRASH (the

most important item!).

Most games are suitable for PBMers new and old, but if you first try the games that the PBM MAILBOX covers then you can't go wrong!

CRIMINAL NEGLIGENCE

Dear Brendon

I am very impressed by the PBM MAILBOX — It's great! July's col-umn gave me the incentive to join Vorcon Wars, game number 72, and I am finding this challenge very exciting indeed.

However, I have another reason for writing. In July's CRASH, I saw an offer to join It's a Crimel. 1 immediately sent a large stamped addressed envelope off to the given address; six weeks later I still haven't heard anything from either

In the September's CRASH you commented on the large response to the offer, and that a new game of Crime! was set up to accommodate it. Have you, I wonder, received my application?
Paul Harrison, Cardiff, South Wates

I'm glad that you are enjoying Vorcon Warsand I wish you well with your megalomanial

I have had a number of moans and groans about KJC GAMES' slow treatment of some CRASH Crimel startups, so I have dropped them a note, tied round a brick, promising to fit their boys with concrete shoes if they don't get you all started up pronto. Me an' da boys reckon you'll hear something soon

AT A DISADVANTAGE?

Dear Brendon

I have been reading your page in CRASH and it has been rather interesting (only rather?! — BK). I started playing game three of it's a Crime before your articles first appeared, and my gang — the Triads — has just entered it's 13th turn . . . I also play another Kuc game, Earthwood. Which games do my fellow CRASH readers play

While wondering which game to join next, I read your article on StarGlobe Four and decided that this was the game for me. How-ever, I feel that I will be at a disad-

vantage in SG 4 as a lot of the players will have experience of the earlier games. Can you give me some tips for starting out? Kerin Pack, Higham Ferrers,

North amplonshire

Don't let the more experienced players worry you: the GMs are very wary about experienced players picking on 'newbies'. It just doesn't happen, unless you really ask for it by declaring war on a large alliance! See next month's issue for StarGlobe Hints'n'Tips.

PBM CONVENTION!

folks, it's here again (one fanfare); the British PBM Convention, Loyal

Yes, folks, it's kere again (oue fenfare), the British PBM Convention. Loyal CRASH readers will remember that back in February, of this year, John where's the bar?' Minson visited the First British PBM Convention in the Socialist Republic of Islington to learn all about the extraordinary world of Play By Mail gaming.

Mike McGarry has just dropped me a line to inform us all of the Second British PBM Convention, to be held at the Porchester Hall, London WE2 (near Paddington Station) on Saturday February 7, 1987. All of the major, and most of the minor. PBM companies will be there to chat with their punters, and other features will include demonstration games, contact him and — yes, John — a bar.

The last convention was a great day, out for PBMers young and old and I am certain that this will be just as enjoyable. Those to see you there!

For further details, send an SAE to: Mike McGarry, 2 David Court, 200 Lansdowne Road, London N17 9XC.

For further details, send an SAE to: Mil 200 Lanadowne Road, London N17 9XC.

DIPLOMATICALLY SPEAKING

The multiplayer nature of PBM games makes interplayer contact—termed 'diplomacy'—an inevitable and crucial feature of the hobby. Diplomacy is not an easy activity to describe, but basically, it's the process of communicating with players in the *real* world to further one's progress in the game. This is done by post or telephone, subjects—discussed—being alliances, advanced strategies and so on.

Diplomacy is essential to the hobby because it is the means by which games develop their characteristics, as players communicate with each other—declaring war, making trade deals and thus building up diplomatic relations within the game environ-

There is quite a skill to diplomatic communications, and different players adopt individual approaches to gleaning information and doublecrossing allies (my personal approach has sometimes caused true allies to badge me as a "devious boogger"). Some people, myself included, get so involved with the diplomacy surrounding a game that they spend more time and money on it than they do on the game. To me, this is the true beauty of PBM games; after all, when did your Spectrum last send you an intelligent letter?

GETTING INVOLVED

This is all very well, but how do you get involved in diplomacy? And how should you go about it? On the whole, this is for you to discover, building up your own methods by trial and error. There are, however, a few guidelines for the new PBMer to follow, ones with which most experienced players will arree.

enced players will agree.

When you first meet another player in a game it may be more advisable to befriend him than to immediately start trying out your wonderful 'zap everything' weaponry: an ally in the hand is better than a kick in the mush. If the game in which you play doesn't give you the player's address, then most GMs will pass a letter on to that player if you give them the player's game name, player number (if known),

and game number. You have to hope that the player will write back to your address.

The presentation and content of your letters is important. A tidy, sensible and mature letter is more likely to win you a friend than an untidy scrap of paper prattling on about the two of you joining forces and knocking out the strongest player in the game. A threatening letter which contains personal insults — as opposed to insulting the player's game character, which is generally OK — and threats of physical violence is likely, to get you thrown out of PBM altogether, so don't do it!

Finally, never abuse addresses and telephone numbers; some players choose to keep their IDs secret, so if anybody does give you details of how to get in touch with them in the real world—don't tell everybody!

TRY IT

To conclude, I can theroughly recommend getting involved with diplomacy; there's a lot to it and a bit of espionage can be quite exhilarating! The more you do it, the better you get (hmmm, a lesson for life, that) and once a game is full of complex diplomatic arrangements, agreements and arguments, you will soon see the difference between these and normal computer games.

DIPLOMATIC

To further the cause of peace and understanding amongst the peoples of the PBM gaming world, CRASH wishes to undertake the task of publishing a DIPLOMATIC DIRECTORY in the hope of encouraging diplomatic relations between competing gamers. To become a CRASH DIPLOMAT, simply post your name, address, and details of the games in which you play to: DIPLOMATIC DIRECTORY, PBM MAILBOX, 1/2 King Street, Ludlow, Shropshire SY8 1DB. I will then enter your details into the DIPLOMATIC DIRECTORY for all to read...

From the RICHARD DONNER Production

Based on the Story

TECH-NICH NICH

This month Jon Bates gets well into a new music utility from RAM **Electronics and** FLARE Technology. It seems this little number just about does everything . . maybe you should get talking to Santa?

HE MUSIC

Producer: RAM/Flare Price: £49.95

This is one of the best all round music add-ons for the Spectrum that I've seen. With it you get a very decent sound sampler and sequencer that enables you to sample sounds, edit them and then compose tunes with them bar by bar, ordering the bars into a composition using the sequencer option.

Very cleverly it has a set of drum sounds that you can use as a builtin drum machine once the software is loaded. There have been other packages that either give you drums, sampling, some sort of tune composer and MIDI interface but The Music Machine takes the best of each option and puts them all together in a well documented package. You don't need to be an expert as it uses a very simplified music notation that encourages you to experiment with sounds to create whatever

you want,

The option of MIDI interface means that ram's hardware can become part of a complete home music system using synths and other music devices. As you may have realised, it does not use a sound chip for its sound. Rather, it comes with pre-recorded samples which can either be either altered or replaced with your own. The package arrives with a dinky microphone, but you can get away with putting any sound source directly in so long as you are careful. All tunes, rhythms and samples can be saved on to either cassette or Microdrive and although the software is cassette based it too can be downloaded to Microdrive. Having loaded up, the main menu gives you a whole pile of option pages - I'll run through these to give you some idea of what the equipment can do.

PLAY All pages have this option

play your sample, drum sound, composed bar or complete tune depending on the page displayed. On the main menu page this option performs the factory-set demonstration tune.

PIANO This converts some of the top two rows of qwerty keys into a one octave keyboard on which you can play any selected or created sample direct from your micro — sounds really funny with drums! The name of the current sample played is displayed. The display does away with the need for an overlay as it illustrates the keyboard on screen, it might have been useful to have more than one octave available here, as most tunes use a wider range. Unfortunately this page is only monophonic (one note at a time). SAMPLER Here life starts to get

interesting. The sampler has two methods of recording a sound. Like most tape recorders it has either an automatic record level or a manual record level, set with a slider on the hardware. There is a bar graph on-screen that changes colour as the input level increases in automatic mode recording only happens above a preset threshold. With the manual option any level can be recorded, but only if the trigger key is depressed. There are some limitations to the amount of sound you can record this is also in direct relationship to the pitch of the note. The gen-eral guide (without getting too technical) is that the highest note you can record is half the sampling rate. For our techno buffs this means that the highest note it will accept is 9.5kHz, which is well above the top notes of the piano, although a little limiting on the upper harmonics.

However, the total time capacity at present is only one second. So each of the eight samples had better be pretty damn short. Not to worry. As you will see the Music Machine has some very useful features to help you around some of these problems. Having captured your sample you will more than likely find that it has gaps at the beginning and end, or that it simply is not percussive enough (head-bangers anonymous will love this!). Back via the main menu we find the

SAMPLE EDITOR This lets you see a graphic regresentation of your sample on screen. By Judicious use of the editing facilities you can chop the blank bits of the start and finish off your sample, If the sound is not percussive enough (that is, it has a slow rise time) then you can chop the beginning of the sample to suit. For finite editing the page has a 'zoom' facility that enables you to enlarge the graph for the start and end of your sound and make the edit absolutely spot on.

Quit

Play

(#0+50E)

COMBELL TOM2 TOM1

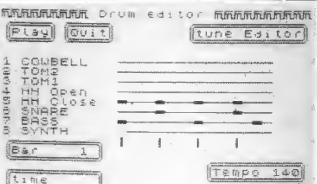

HH Open HH Close SNARE

BASS

Lovers of the bizarre will rejoice in the knowledge that the sample can also be reversed for weird effects. For continuous sounds like strings there is a loop facility which endlessly repeats the sound as long as you hold on to the key. All in all a pretty good effort at home sampling without the tears and frustration of a mega-over-

ECHO Obviously, with a sampler the possibilities for echo and delay are abundant. You can delay your voice for up to one and a half seconds by selecting this option, noting the delay lime on screen, It would be more effective if you plugged the microphone via a mixer that gave you separate out-puts (or an effects send and return). This would allow you to mix the Ireated and untreated signal to give variable 'double-track-ing' effects to whatever sound you have input. Real laughs start when

The drum editor. Now it's time to create rhythm patterns to accompany your music, using the drumsounds supplied or sounds you've sampled specially for the purpose

you put headphones on and try to hold a conversation with yourself through *The Music Machine* with it adding about a one second delay to the sound that reaches your

ears.

BAR EDITOR AND DRUM EDITOR The prime difference between these compositional tools is that the drum editor lets you play all the samples and the bar editor accesses selected samples. The bar editor only allows two notes simultaneously (duophonic no lessl), although these can be different voices. These options function much like other tune composers we have seen in the past in that you can compose a bar, mess around and gradually perfect it. Once you're happy with a bar, move on to the next one.

The notation used is not standard, although it uses conventional staves—the time signature is unreasonably inflexible at present; anything with three beats to the bar can upset it a little. However this is being corrected as this issue is being printed. Each bar composed can be given a name—for instance 'intro', 'verse' or whatever expletive comes to mind, The drum editor works very much on the same basis except that each drum sound is given a line on screen.

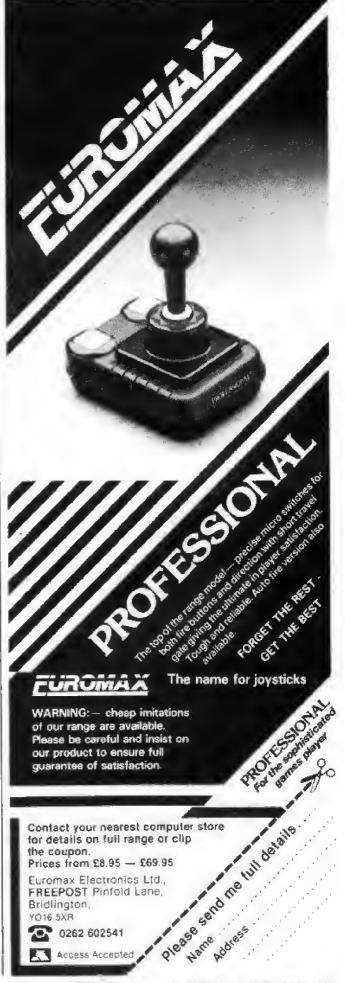

TUNE EDITOR This assembles the bar patterns created in either drum or bar mode. You have to list each appearance of the bar, so 256 repeats of bar One could be a bit of a pain to enter. One big minus

here is that owing to the limitations of the computer *The Music Machine* will not run a tune and drum pattern together. Shame. This means that it's either down to the good old tape recorder or using the MIDI options to play the synth voices while the drum machine ploughs relentlessly on.

MIDI Either you play the samples internally from the qwerty or externally from your MIDI keyboard. Presto, an instant sampler. Or you could use *The Music Machine* as a drum machine. Or you could get it top play the tune in the sequencer in time with the drums in your keyboard. In other words it will send and respond to note on/off commands, pitch values, and the MIDI timing clock pulses on any or all sixteen channels.

Future developments for the package look good with a 128k version of the software out soon with increased sample time. Later on there will be software that converts the package to either a dedicated drum machine, MiDI real-time recorder or music sequencer.

Clearly, The Music Machine is going to be the basis of several specialised music utilities. In general the whole package represents excellent value for money and I would suggest that as Santa is thinking of whipping his reindeer into action soon, it might be an idea to get him to do you the courtesy of dropping a Music Machine down whatever passes for your chimney.

DEMPSEYAND MEREPEACE

You have a limited time to locate and rescue your partner who has been captured and is being held somewhere within the area of London. Driving and shooting sequences combined with

3D exploration sections in the search for clues

required to complete your mission. Your final rating will not only depend on successfully rescuing your partner, but also on the time taken and on how many other crimes you can Spectrum 48k, Commodore 64, Amstrad CPC

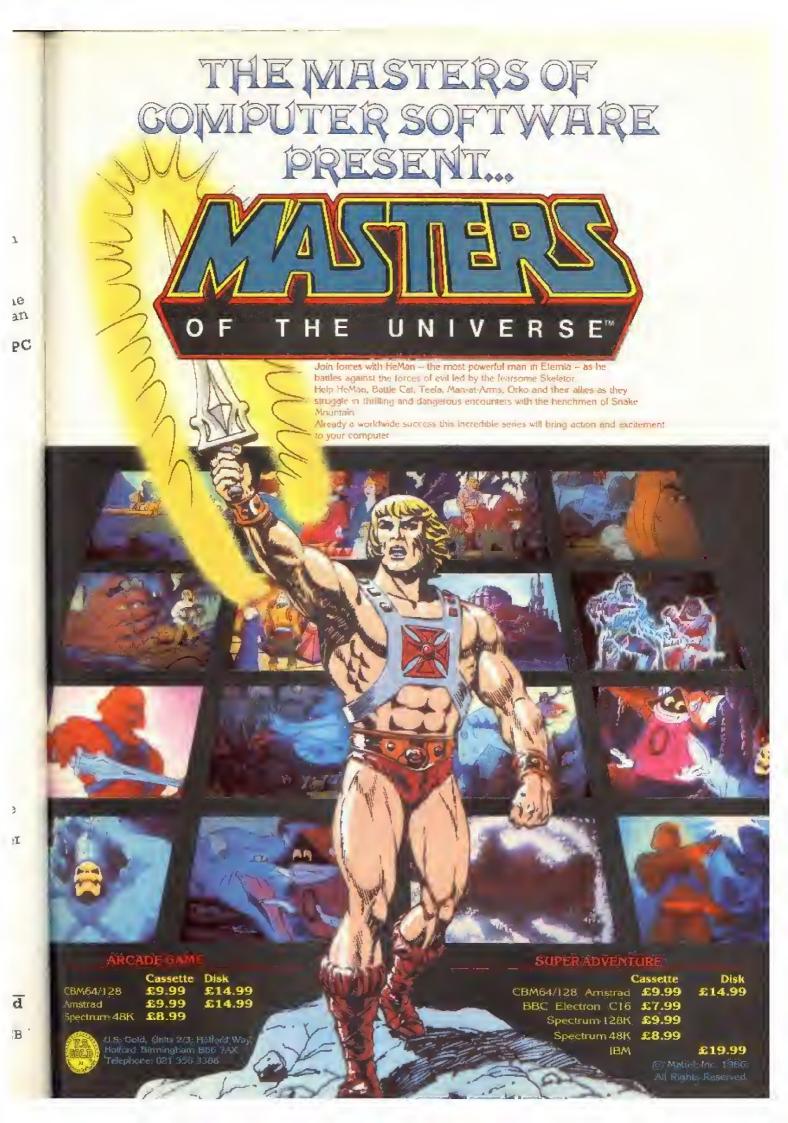

solve on the way.

□TECH□NICHE□TE

Simon Goodwin samples the CH...CH...
CHEETAH Sound Sampler, dispenses more hints for users of the Spectrum 128 and the new Plus Two, Drums On and continues finding ways to disable the BREAK key

Configuring a sound in the CHEETAH Sampler's edit section. . . , This is what "OY CAM" sounds like!

SAMPLING SOUNDS THE CHEETAH WAY

At last I have obtained a copy of CHETTAH'S new Sound Sampler. This is a music add-on for the Spectrum; like its predecessor, the SpecDrum, the new gadget promises to be great fun for non-musicians as well as budding pop stars.

Sound sampling is a simple idea. Like a cine camera taking pictures very quickly, a sound sampler tests the volume of a sound literally tens of thousands of times a second, and stores the result as a stream of numbers in computer memory. The numbers can later be 'played back' through an interface and loudspeaker, reproducing the original sound.

The faster you can read num-

bers, and the more accurately you can measure volume, the better the sound quality. Good compact disc players can recognise 65,536 volume levels about 40,000 times a second; if it wasn't for the limitations of the recording equipment — ultimately, the microphones and pickups — this would sound just like the real thing.

CHEETAH's sampler can discern 256 levels 35,000 times a second, so the sound quality is a little rough and distorted, but has quite a wide tonal range. The first pre-production unit I tested crackled badly, but cheetah have convinced me that this was a random fault on that hand-built prototype — the second unit worked fine. A similar

sampler, made-to-measure for musicians on a budget, would cost about £200 and you couldn't play games on it!

A sound sampler can do many things that a tape cannot, as anyone who has heard Paul Hardcastle's NuNuNuNineteen hit will realise. In fact that record only contains a tiny fraction of the repetoire of a good sampler. And it's easy. And it's fun, for anyone remotely interested in music.

THE PROSPECT

Almost everyone has musical ideas. Whether you hum, clap or tap biros on a desk you probably make your own music from time to time. But, until quite recently, you couldn't produce 'real' music that way. It took years of practice and training to be able to get 'musical' results out of the clumsy, tangled machines we call musical Instuments. It was boring, especially if you were forced to play other people's music while learning. Few people started to learn; most of them gave up. The world is full of people with musical ideas who can't express them. Yet.

There is a new revolution, happening in music. For the first time ordinary people are discovering that they can make music acceptable to themselves — and to many others — without having to master the techniques of music or of playing an instrument.

ing an instrument.
Once a sound has been stored in a computer it can be modified in a virtually infinite number of ways; all you need is appropriate software. Of course, older technology lets you after sounds too, but the computer allows changes to be recorded, replayed, tweaked, and tested in a

totally reliable, repeatable way.

Like other HiTech revolutions before it, the computer revolution in music will not create anything new, but it will give everyone access to an ability that previously was only available to a trained few.

The CHEETAH Sound Sampler is an Important step towards this new musical world. It's not a revolution in itself, but it is a sign of the times, which is why I have spent a few paragraphs explaining what is going on. This review will be from the point of view of a non-musician. Professional Muso Jon Bates will add his comments next month.

THE PRODUCT

£44.95 gets you a cardboard box containing a microphone, interface unit, tape and manual.

The microphone appears to have come from a cheap cassette recorder — there's even a tapestop switch, although the sampler makes no use of this. The quality of the microphone is adequate, but if you've got a better one, use if

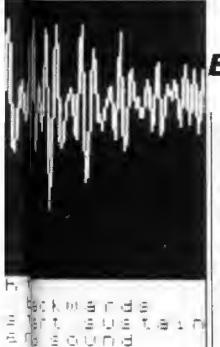

The interface plugs into the edge connector at the back of your computer. There's no through port, so you can't plug anything into the back of the sampler. Two control knobs point back towards the Spectrum; you'll need some kind of bus extender if you want to use this interface with a deep addon keyboard such as a FULLER FOS

There's a 3.5mm input socket on one side of the box and a trailing output lead, ending in a phone plug, on the other side. This plugs into your amplifier or Hiff, so that you can hear what you're doing.

The electronics look well

The box with two twiddly knobs, known to its f..f..friends as the CHEETAH Sound Sampler

designed, although some of the soldering was a bit dodgy on the prototypes I examined, CHESTAH have used standard Ferranti chips, with a metal 'ground plane' on the board to reduce interference from the computer. Port 127 is used for input and output. You must access port 191 — the strobe — at least seven microseconds before you read a sample, to trigger the read a sample, to trigger analogue to digital converter.

N.q∪it

EDTECHDNICHEDTECDTECHD.

The tape is the most important part of the package determines the power of any computer-controlled musical device. One side of the tape holds two programs - the Sampler and the Sound Utilities. On the other side you find Samples — data recordings of the sound of an organ, glass breaking, bells, a handclap, and speech. There are no back-up recordings on the tape, but fortunately the files are easily copied; they're useless without the interface, of course.

The manual is a twelve-page cassette-sized booklet. The blue type is very small, but readable. The text is interesting to read, but a little chaotic in organisation. There are a few Hints and Tips, but not enough. For more, read on!

SAMPLER

The sampler loads froms cassette in 2 minutes 40 seconds. After the first part loads you must stop the tape and indicate whether or not ou want to transfer everything to Microdrive. This gets imitating if you've only got tapes, although it is good to see that CHEETAH are supporting the Microdrive. The program also allows you to use the 128's extra memory to store sam-

Your first step should be to set the input level. I tested the sampler successfully with microphones, a guitar, synth, cassette and com-pact disk. In each case you connect the device to the small socket on the left of the sampler, select the 'Set Level' option, and play some music or make a noise. The graph of the sound appears on the screen. The display is re-drawn every second, and looks quite

You must adjust the input level the left hand knob — until the graph fills most of the display without running into the top or bottom edge. That indicates an overload which would cause a distorted recording.

Once you've set the level you can use the sample menu. A standard Spectrum can record about a second of good quality sound or two seconds at 'half speed', which gives a duller tone. Spec-trum 128 owners can record for up to six seconds - sampling uses up RAM at a prodigious rate.

Memory is divided into small

units and you can split these between named samples as you wish. It's a good idea to keep the sample names short, as the software asks you for them rather persistently. Beware: the program does not complain if you use the same name for more than one sample.

Once you've decided the length and speed of a sample you can start recording under manual or automatic control. Manual recordings begin when you press a key; automatic ones start as soon as the input signal reaches a fairly level. Immediately after recording you can hear what's stored by using the 'List Samples' option, which displays the name and length of stored sounds, playing them back as they are listed.

CONFIGURATION

To get full control you must use the 'Edit' sub-menu. This lets you combine, copy, reverse, or delete samples by name. Most impor-tantly, you can 'configure' a sound. This is a powerful but rather fiddly process. The idea is to put down four markers, which between them allow you to stretch sounds and get distinctive "NuNuNuNineteen" effects.

As you configure a sound, each unit of the recording is displayed as a graph on the screen. You can move to any point in the sound and position markers on the graph at

that point

The graph corresponds directly to the sound, so you can spot the key points by eye with a little practice. It takes a while to learn to do

ITECHONICHEDTECHONICHEDTECOTEC

this, but the final version of the software allows you to replay the sound up to and from the current point, which makes it easy to find your way around by ear,

The four markers must be arranged in order. The first one indicates the point where you want replay to begin. The sound is replay to begin, the sound preplayed from there, past the second marker, and up to the third. If the control key is still held down, the sound between the second and third markers is repeated. Otherwise the rest of the sound up to the last marker

up to the last marker — Is replayed, then the computer stops till you press another key.
For example, you might sample the word "OHEETAH", putting the first and last markers at either end of the word. If you put the second and third markers around the 'bee' part of the word, a long stab at the key would give the sound; "Chee-hee-hee-tah". If you put those markers nearer the end of the word, you might get "Cheeta-ta-

tah

There was no way to free the unused space at either end of a marked sound on the software I tested. The final version should allow this.

Of course, you're not stuck with speech. You can record screams, crashes, bleeps, creaks, or any other sound. If you can't attord a synthesiser you can borrow one and sample it, saving the result on tape or Microdrive for future use. CHEETAH Supply a few pre-recorded samples, but it's easy to record your own — I lost no time in blasting my neighbours with sampled drum sounds from Cameo's recent hit The word UP

The playback option is controlrie playback option is controlled by twelve keys, each corresponding to a different note in a plano-key arrangement. In conjunction with SHIFT you can replay a sample at any one of 24 different pitches, higher or lower than the original. The Art of Noise like to

do this sort of thing.
Unfortunately the speed of playback changes with the pitch, so it is hard to use musical samples containing more than one beat. Pure notes from other instruments usually sound okay, as you.

can fill them out by repeating a section.

The save and load options seemed to work fine; they allowed you to delete and catalogue Microdrive files, but there was no option to format a new cartridge.

The sampler may seem hard to use, and indeed the menu structure is a bit irritating at times, but it's not long before you can find your way around. From then on it's f...f...f...fabulous, whether you're just playing around or trying to get a specific effect.

SOUND UTILITIES

The Sound Sampler contains electronics to read sounds and replay - and it can do both at the same time, delaying or adjusting the levels to produce an incredible range of effects. The Sound Utilities are provided by a small machine-code program recorded after the Sampler. Tape loading time is about one minute.

The Utilities can process sounds in lots of different ways, and sometimes the names of the options don't really match up with the effect. Rather than try to analyse what the program is doing, I've chosen to describe the sound. Readers who are not famil-iar with BBC Science Fiction may find some of the analogies a bit

There's no level meter in this package so you must set the input level — the left hand knob — by listening for distortion. All of the effects produce results which you can hear at once, so this is not

much of a problem

The main menu lists six options an Echo Chamber, Reverb Unit, Pitch Shifter, Fuzz Box, Sound Chopper and 'Bubbleizer' Most options have one or two 'slider controls' associated with them. When an option is selected, the appropriate control keys are displayed until another key is pressed — a nice feature. You can't use a

mouse or a joystick, unfortunately. The Echo Chamber produces a good artificial echo effect, like a Kopykar tape echo machine, It is fun, and good prectice for public speaking, to wear headphones and try to talk while a recording of what you said half a second before is played back, full blast. The right hand knob on the interface comes play here, controlling the extent to which echoes are them-selves echoed. Setting this to maximum and using the longest echo you get three or four echoes of each sound, feding over about two seconds, with the last one very quiet and distorted.

The minimum echo setting produces the acoustics of a small toilet with a high ceiling. Prehistolic with a figh ceiling. Frens-toric pop-pickers will remember that the Korgis recorded their .Ne.13 hit if I had yoocoo in the loo to get just this sound — now it's built into your Spectrum! The Reverb Unit is meant to pro-

duce a more natural echo. In fact it produces a quite unreal effect. At low settings it adds echo and an interesting ituned Jew's Harp sound buzzing in time with your voice, fused the microphone with this effect, and the result sounded a bit like a Vogon Laurie Ander-

son (Oh SuperVogon?).
As you increase the setting, the sampler just seems to pick notes randomly from the input - speech remains inflected but is unintelligible once the control is about haif way across the scale. At the top setting you just get a pipelike fuzzy wailing tone in time with your voice.

The Pitch Shifter could be dedicated to Douglas Adams' Hitchikers Guide to the Galaxy since many of the voices from the series are here. The effect is to shift the pitch of the input in a rather unsteady way, up or downwards. At the top of the scale a voice sounds like a Magrathean Mouse. Lower down there are all sorts of voices: 'Toff', 'Brummie', 'TV-Voi-ceover', 'Marvin the Paranoid Android' and a good (?) 'Vogon'. Use the second control — the 'duty cycle' to search for each of the above as you reduce the pitch. There are lots of other effects ! can't describe.

The Fuzz Box is rather trivial. Whatever signal is put in, it limits the output to a fixed maximum level. Loud sounds are distorted the louder, the more distorted There's no control - just a 'quit'

key Quite
The Sound Chopper seems to be the favorite at CHEETAH, Throughout the PCW show, from their position on the balcony, they shouted in imitation Dalek tones as scuttled around talking to people. The sound chopper produces a very authentic Dalek voice from a human monotone. It works by chopping the sound up and only replaying alternate parts. Slightly slower settings work

well on synthesisers and guitars, especially if you use Stereo or mix in a bit of the un-chopped signal. The slowest settings are pretty useless, and the control moves very slowly — the longest chop time is about two thirds of a secorid, and the slider only moves a

small distance every chop.
The strangely-spelt Bubbleizer is a new effect invented by Bob Powell of SPEEDWELL SOFTWARE, Bob designed the Sound Sampler for CHEETAH, The Bubbleizer starts out sounding as if a Kazzoo band is playing along with your voice (or whatever else you're recording). Greater settings add a metallic rasp, and a kind of dripping hollow

echo, rising in pitch.

After a while the noise becomes abstract, and sounds like a sym-pathetic Sci-Fi whistling compu-ter; a collection of short, pure tones in time with the input. This gets slower and slower. If you hum, at the maximum setting, the result resembles some kind of alien police siren. The Depth control works painfully slowly here— it takes 40 seconds of 'auto-repeating' to move it across the

UTILITIES SOUND

I suspect that this program was included for musicians. has so many effects that it will probably produce music for anyone who can hum. Instruments who needs 'em?

I looked at two prototype versions of this sampler. The first was abnormally noisy and there were a few 'rough edges' in the software, but the problems were irritations rather than major flaws. I'm fairly sure that both hardware and software will be tidled up by the time you read this and CHEETAH are in mass production.

CHEETAH have two more products in the pipeline - a sequencer, which can automatically play tunes made up of sampled sounds, and a mega-clever bi-directional MIDI Interface. DATEL and RAM ELECTRONICS are

also addressing this musical mar-ket. It's good that they're taking Spectrum users with them!

DRUM **EDITOR**

I receive several programs to edit CHEETAHSpecDrum sounds every month. The lastest, from Christopher Bleakley, is the best yet; it is available for sale, and should appeal to any keen Spec-Drummer who has not already written one.

Christopher's *Drum Editor* develops the ideas featured in CRASH over the last year. It uses machine-code routines for all the fiddly bits, so it works quickly. You can load up to five drum files, each can load up to five drum files, each one of which corresponds to a single drum in the SpecDrum kit. You can use CHETAH's own Kit Editor to separate the individual sounds, or a simple splitter program supplied with the Drum Editor.

The program mimics the appearance of CHETAH's own software, with single-key controls.

appearance of CHETAM'S OWN software, with single-key controls for most functions. The main menu allows you to load, save or after drum files; the after option takes you to the function menu, which is the core of the program,

DRUM FUNCTIONS

You can change the name of a drum, or the type number that determines where in the kit the drum may appear. The 'View Waveform' option produces a compressed graph of the sound the file will produce. This is drawn very quickly indeed, you can print the graph with a single key-press, as long as your printer can handle the COPY command. Drawings in the documentation show the out-

ine of various types of sound.
You can edit the graph with the 'Draw Onto Waveform' option, which lets you change the sound by moving any part of the wave up or down. You can work from a random pattern or a sine-wave graph.
You can even design your own
sound, describing it (rather laboxiously) with a sequence of num-

Files can be copied, reversed, and combined. You can play back the edited sound through the SpecDrum hardware, without having to load the drumming program
— this is very usetul.
The *Drum Editor* is very good as

In a brum Editor is very good as far as it goes, but it is a pity that it will only handle five sounds — you can't load or save a whole kit. The documentation — four pages of densely-typed A4 paper — is competently and clearly written. Spec-Drum is spelt with a 'K' through-

Drum is spelt with a 'K' through-out, to avoid copyright problems, but cheetah's Bob Pierson has given the go ahead for Christopher to use the normal spelling. Christopher Bleakley's Drum Editor cassette costs £2.99 including postage. His address is 1, KIRKMOYLE VIEW, BAL-LYMONEY, COUNTY ANTRIM, BT53 5DH.

128 HINTS

Here are some more hints for users of the Spectrum 128 -Sinclair or Amstrad style. Jon Bates has still got our 128, so I've not been able to try these out, but I have printed all the contributors' names so you know who to blame . . . !

The 128's RENUMBER facility is pretty limited, but David Clark has found out how to change the start and step line numbers it uses. The initial line-number is stored at 23444 and 23445, with the step from one line to the next at 23446 and 23447. You can change these by POKEing new values; the second byte of each pair contains the number divided by 256, and the first holds the remainder after division, as usual in Spectrum mem-

David has also worked out how to change the colours of the editing screen, using the paging POKE I printed in June. First you must combine the INK, PAPER, FLASH and BRIGHT values into a single number, as follows:

NUMBER = INK+PAPER'8+8-RIGHT*64+FLASH*128

Then type this command, replacing ED with the combined value for the editing screen, and NE with the colour value you want when you're not editing:

CLEAR 49151:POKE 23388,23:POKE 60431,NE:POKE 60433,ED

David's last tip lets a program return to the 'main menu' when it has finished. This line does the

CLEAR 49151:POKE 23388,23:POKE 60430,1

128 NOTES

Last month's explanation of the 128 sound chip told you how to make noises, but didn't explain how to produce musical notes. An anonymous reader has sent in a table of note values for the sound chip. Twelve numbers correspond to each of the notes on an eventempered scale, giving reasonably accurate sharps and flats as well as 'white notes'. You can work out the values of notes in subsequent octaves by dividing the appropriate note number by two, and then four, then eight, and so on - ignore any remainder after division.

The tricky bit is splitting each value in two - the 128 uses two registers to control the pitch of each sound generator. This is the

sort of job that a computer can do the program listed under the table converts a note value (from the table) and an octave number (between 0 and 8) into two - the settings for the coarse and fine controls respec-tively. Thus, to play an 'F' in the third octave you would enter 2562 and 2. The program indicates a fine pitch of 128 and a coarse pitch of 2

My final tips for 128 users concern the function key pad, which I have mentioned twice before, T D Elcott has discovered that SYM-BOL SHIFT I will move the editing cursor down ten lines. EXTEND N is also useful, as lan Edwards has found - it recalls a program line after an accidental deletion!

SPECTRUM 128 SOUND CHIP

130 PRINT "Fine & coarse values: ",note-coarse*

256, coarse

140 STOP

A CLEAN BREAK

I'm still getting lots of corres-condence about how to disable the Spectrum's BREAK keyfrom within BASIC programs. Several people have mentioned the fact that you can save BASIC as CODE. This has three benefits: you can't break in by loading with MERGE; anti-break POKEs can be saved before the program so that it is protected as the BASIC loads and finally, you can save the loading screen and the program all as one file.

This is Ben Jones' advice. Put one or more of the anti-break POKEs featured in past issues into line 9998 of your program. Then add this line:

9999 LET STKEND=PEEK 23653+256*PEEK 23654: SAVE "<name> CODE 23652,STKEND-23500: RUN

Save an unprotected copy of the program — in case something goes wrong — then GO TO 9998 to save a protected CODE file.

This protection technique is hard to get around, but, like all others, it can be broken by a determined hacker who loads the code to an address above RAMTOP and then moves it down, correcting the protection POKEs. This is tricky if the file occupies all 48K of memory, although a clever hacker can split a file and process it piecemeal; to make things difficult, and save the display, user defined characters and machine-code all in one file, use this line:

9999 SAVE "<name>" CODE 16364,49152: RUN

The biggest snag of this is that files take a long time to save and load! You can't win, with protection techniques — the cleveraryou are the more you annoy legitimate users and the people who dupli-cate tapes for you, Unfortunately, while most people continue to copy software, expensivelydeveloped software must be protected.

COMING UP

In the December issue I hope to explain how you can use the CHEETANSampler and SpecDrum together; I'll also look at GENIE, a disassembler package for ROMANTIC ROBOT'S Multiface 1. If you've got an idea, please write to the usual address: TECH TIPS CRASH TOWERS 1-2 KING STREET, LUDLOW.

FOOTBALL MANAGEMENT STRATEGY GAMES from E & J SOFTWARE

3 quality feetball games for serious enthusiasts. Each game uses the full available memory of your Spectrum or Spectrum+ and is packed with genuine feetures.

PREMIER LEAGUE

OUR COMPREHENSIVE AND EXCITING LEAGUE GAME — FÉATURES INCLUDE: Training, Team Selection, Substitutes, Hell-Time Scores, Full Squad Details, Named Goal Scores, Team Styles, Save Game, Financial Problems, 5 Skill Levels, Transfer Market, Injudes, Continuing Seasons, Printer Option, PLUS MANY MORE!

EUROPEAN TROPHY

A SUPERB EUROPEAN COMPETITION STYLE GAME WITH THESE FEATURES: Home & Away Legs, Away Soals Count Double, 2 Substitutes Allowed, Extra Time, Penalty Shoot-Outs (with sudden death), Match Injuries, Injury Time, Match Penalties, 5 Skill Levels, Pre-Match Raports, Team Selection, Named Goel Scorers, Seve Game, Printer Option, PLUS MANY MORE!

CRASH MAIL ORDER, PO BOX 10, LUDLOW, SHROPSHIRE SY8 1DB

AGEWSON HAT-TRICK

With two recent CRASH Smashes, for Quazatron and Pyracurse, already under its collective belt, the folks at HEWSON are limbering up to deliver another three body blows to the software charts before Christmas. Hannah Smith and Bill Scolding have been looking at Firelord, Uridium and City Slicker, and they spoke to the brains behind the games . . .

SETTING THE TOWN ON FIRE

Steve Crow, author of the hugely successful Starquake and Wizard's Lair, is the latest top programmer to join the creative and prolific team at newson. His lirst game for them is the soon-to-be-released Firelord.

Fireford is set in the deceptively quaint medieval land of Torot. Ramshackle half-timbered dwellings line the cobbled streets, and fairy tale woods fringe the town. It's all a bit like Ludlow, really, without the traffic wardens and yellow binbags!

Steve based a lot of the buildings on houses in his home county of Kent, and points out that some of the dwellings have peculiar funnels protruding from the roof slates. 'Those are Kent cast houses, for the local hops. Which is why there are so many pubs in the village ...' In fact, the idea behind *Firelord* grew out of the graphics. Steve was doodling around on his screen and came up with a neat little rustic town house. He did a few more, and the scenery for *Firelord* was created. The plot came later.

BLAZING BREATH

And what of the plot? Well, all is not well in Forot. The Wicked Queen has tricked the local fire-breathing dragon into parting with the secret of his blazing breath, the Firestone. With this in her possession she begins to terrorise the inhabitants of Torot in a way that a dragon could only fantasise about.

Into this dangerous situation stumbles Sir Galaheart. Being a knight, and learless into the bargain, he has vowed to search the land for the four elements of the spell of eternal youth. Sir Galaheart knows a thing or two about Evil Queens and reckons that she will gladly trade the Firestone for this youth-giving spell.

However, when Sir Galaheart

However, when Sir Galaheart enters Torot he makes a macabre discovery. All the inhabitants have vanished. So frightened are they of the Queen and her dreaded Firestone — which she uses with great zest — that they refuse to come outside their houses. Torot is instead populated with frame ghosts who romp around the countryside creating all sorts of havoc.

The last thing the ghosts want is for the Firestone to be returned to its rightful owner. As soon as Sir Galaheart begins his quest they swarm all around him, draining his essential energy. These irritating ghosties can be destroyed, but Sir Knight must first find the enchanted crystal. Once he has this, he can fire bolts of power at his assailants and protect his energy levels.

KEEP A FULL TUM!

No knight has ever stayed tearless for very long on an empty stomach, so regular meals must be sought. Luckily for Sir Galaheart, the land of Torot is wellGalaheart, left, prepares for a confrontation with two fire ghosts. Easy to get hot and flustered in FIRELORD

Time for a bit of barler with the warty witch, if you've nothing to exchange, you can always by to steal something while her back is turned. You'd betier be good at the Guiltyometer if you're caught, though

Escape lies through the reliow archway. But what dangers lie within? And are you better off outside?

stocked with edibles, and nibblets can be picked up along the way. Every time Sir G stumbles across the odd foodstuff his energy goes up to maximum again and his appointment with the Grim Reaper is postponed once more.

is postponed once more.

Charms and grub apart, there are other useful objects lying around. These can be used for trading with the locals in return for even more useful things. Many houses around Torot have open doors. If Galaheart enters one of these he is faced with a choice of objects which he can barter for. If he's desperate, he can try stealing something when the occupier isn't tooking. However, if he is caught in the process the he must stand trial. An arrow alternates between innocent and guilty and you must stop it moving when it's pointing to 'innocent'. Otherwise the punish-

ment is death and our gallant knight loses one of his four lives.

Not one for making things too easy, Steve Crow has thrown in a few other hazards for good measure. Fireballs dropped by the Queen spring up in Galaheart's path and contact with them results in death, predictably enough.

There's a lot more to Firelord

There's a lot more to Fireland than all this, and quite a few things which are not explained in the instructions, as is fairly usual in Steve's games. Steve is putting the final touches to the game now—'a few more locations and the music'— and when it's complete, the game will have 512 screens of questin', kilin', eatin' and bartenin'. Enough to keep you occupied when the winter knights are drawing in. Look out for Fireland on or around October 29, it'll cost a paltry £8.95.

THE SPECTRUM GAME THEY SAID "COULDN'T BE DONE"

Hugely successful on the C64, Uridium is now being converted for the Spectrum by another newcomer at HEWSON, Dominic Robinson.

Originally designed and written by Andrew Braybrook, the Spectrum version of Uridium retains the same scenario; you are the pilot of a Manta fighter. Out in the depths of space, vast alien Dreadhaughts silently move into orbit around each planet in the sector, preparing to drain minerals from the planets' cores to feed their interstellar power drives.

Piloting the versatile little fighter, your task is to zoom over the hull of each Dreadnaught wiping out its ancillary craft and then crippling the mother ship. In all, there are fifteen of these space leviathans to disable, and they're not just going to sit there while you take potshots at them — fighter craft are out in force.

Although you're obviously outnumbered, the Manta has been equipped with the latest technology. A powerful laser is quite capable of destroying the alien fighters. And boy, do those little blighters shift, wave upon wave swooping in at varying horrendous speeds.

SHARP REACTIONS

Even if you're successful in breaking through the defensive screens of enemy craft, flying in over the Dreadnaught hulls will test your nerves and skill to the limit. The flanges and ducts of the ship bristle with transmitter masts and require some tricky sidestepping. Sheer walls and protrusions suddenly leap into your line of vision and it's sometimes necessary to veer off at right-angles to pass through tiny gaps.

through tiny gaps.
If you're still airbome and have been actively attacking the Dreadnaughts for several death-defying minutes, then the words 'Land Now!' flash up at the top of the screen. It's time to negotiate your way to the other end of the Dreadnaught and set the Manta down on the master landing strip. Then the vast bulk of the Dreadnaught can be destroyed and its shattered particles sent spiralling into the cosmos.

There's scarcely time for a breather before the Manta has to be sent screaming into the next wave of alien craft and Dreadnaught number two. Dominic Robinson is currently toying with the idea of putting in a bonus level between Dreadnaughts, awarding extra points for the waves of fighters which have been blasted, the destruction of the Dreadnaught itself, and number of Mantas you still have in reserve. Also,

the finished version should boast a two player option, with each player having three lives.

Points are awarded for knocking allen fighters out of the air, blasting apart surface features on the hull and destroying ships parked on the Dreadnaught. An extra Manta is given every ten thousand points.

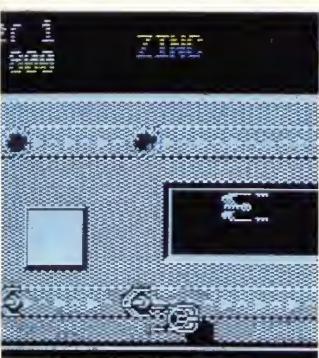

HEADACHE

Dominic reckons the biggest headache in converting *Uridium* has been getting the graphics systems to work at all, and then making it sufficiently fast: 'It's taken about ten different versions to get something which approaches a proper emulation of the Commodore game, and even then memory restrictions have meant we've had to sacrifice some of the Dreadnaught graphics which appeared in the original. Though each Dreadnaught will have a different design and layout, some of the chairs and twisted links, which connected parts of the ship in the C64 pame, have had to co."

C64 game, have had to go.'
When we spoke to Dominic, the game was about a month away from completion, with only the first few Dreadnaught mother ships in place. Hopefully, by the release date — October 28— Uridium will contain 15 Super-Dreadnaughts, as in the Commodore version. Each ship will be more difficult to get through than the one before. ... £8.95 should pay for a lot of fast and furious action!

You've dodged the pylons, but it looks like curtains as a glant

Shooting up some deck defences and dodging a fighter on tevel one — there's a lot of action shead if you survive the course . . .

Attacking fighters line up in wall formation as the end of level two is reached. They don't mess about, these Dreadnaught defenders

SLICKER PROGRAMMING

Slick tricks from Lincoln-based programming team, Steve Maraden and David Cooke . . .

While Messrs Crow and Robinson have been dreaming up past and future worlds, Steve Marsden and David Cooke have been feverishly beavering away on a game based around everyday life in London town. You know the kind of thing: Arab terrorists, football hooligans, bombs in the Houses of Parliament...

The game's called City Silcker, and the Marsden/Cooke partner-ship has so far taken the game through three versions, with the programming getting steadily, um, slicker and slicker. We're on version Mk It(a) right now.

The game originally teatured a number of London landmarks — yer Nelson's column, yer Post Office tower, yer actual Buck house — connected by grubby tube trains. Slick, the 'off beat tec', had to shuttle from one location to another, hot on the trail of the Arab terrorist, Abru Caddabra.

ALL CHANGE

Much of this has gone now. Instead of the finely detailed screens which we had a sneak look at when we visited Marsden and Cooke in mid-August — the extenor of the Houses of Parliament was spread across three screens, every window and orenellation present — City Slicker is now played out on platforms and levels inside four locations only: the Tower of London, the British Museum, the Houses of Parliament, and Buckingham Palace.

'The outdoor scenery didn't play very well, 'explains Steve.' It's very much a room game, like Technician Ted, with the difference that instead of abrupt screen changes, the program flips half of one room and half of the next, so there's a sort of inbetween screen as you

exit one room and enter another.'
Lost also are the animated characters of important personages - Mrs Thatcher himself, and those loony but lovable Royals. 'It was just too wasteful of memory, having specific sprites only required for certain locations. Animated characters which could roam from room to room had to go too; they're now tied to specific rooms.' All except Slick and Abru, that is.

But enough of what might have

been. City Slicker Mk It is still stuffed with action and delightful details. Take the opening screens, for Instance. As your Spectrum does a passable imitation of the clickerty-clack of a moving tube train, we see the profiles of Slick and Abru Ihrough the carriage window. Abru quickly sprays some graffit on the glass, and slides out of sight, while Slick vows to get

at the bottom of the screen. Colliding with unfriendly characters reduces energy; discovering foodsluffs increases it by the nutritional value of the food consumed. Pep pills replenish energy by 100 per cent, and you have three of these held in reserve. Use them wisely.

Objects can be picked up, stood on and dropped, and that includes some mobile thingies. If you can't operate a toggle switch to open a door, sometimes another character can be persuaded to do it for you. In one of the early locations, in the Tower of London, a disposal component is located beneath a closed trapdoor. Finding a ton weight, several rooms away, and taking it back to trapdoor allows you to smash your way through. Steve says 'there's a million and one strategies like that in the game',

game',

If the going gets tough, the
tough start looking for a cheat

mode. There is one in City Slicker, and it works like this: pause the game, and type in the code word. The screen will display a series of room numbers, and toggling lo left and right will allow you to select the location you want. Easy, ain't it? Except you've got to discover the code word...

KABOOMM!!!

If you run out of energy and pep pills, or if the clock strikes midnight, or if you run into Abru himself, then the game ends. You are then treated to a spectacular grand finale, as the bomb shatters the Seats of Government. It takes about 30 seconds, and the screen is full of exploding pixels. Almost worth dying for.

City Slicker will be out on November 25, just missing Guy Fawkes' Day by a week or three. It'll be priced at £8.95.

Our cool dude detective in the House of Commons. The Speaker's hammer has a life of its own, and Abru's bomb dangles behind. Judging from the stierdance, a debate on the EEC Agricultural Policy is in progress

GUNPOWDER, TREASON AND ...

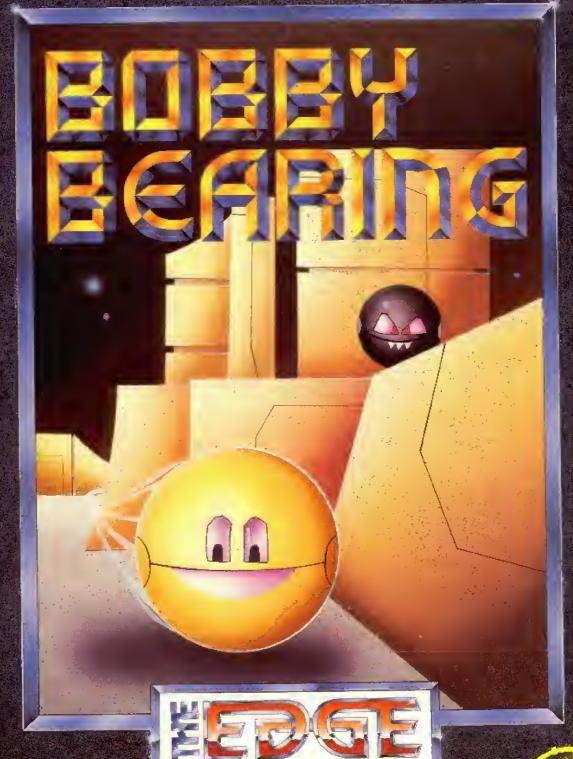

The plot is straightforward. The Arab terrorist has planted a bomb in the visitors' gallery of the House of Commons, set to detonate at midnight, and Slick must assemble the eight components of the defusing device and get it to the bomb in time, Eventhen you're not finished — Cooke and Marsden have added one more trial of skill which we won't reveal.

The bits and pieces of the disposal unit are, predictably, scattered all over the shop, often in places that can only be reached by shunting objects around from one room to another. Slick can leap acrobatically about, but his range depends on the energy level

Under the Seat of Government. That's part of the ACME bomb disposal kit amongst the plumbing. One MP has obviously loat his bottle

Let the good times roll!

"Bobby Bearing is very nearly perfect. This may sound a bit over the top but this game deserves a whole string of superlatives." ZX Computing August 1986.

Spectrum/Commodore 64/Amstrad

VIDEO POKER

Producer: Mastertronic Retail Price: £1.99 Author: Probe Software

his is a version of the game you'd see if you were in the arcade halls of the gambling capital of America. The idea is to get the highest hand of cards possible and win as much money as possible,

The screen shows what would be the front of an American Video Poker machine. The top window displays the cards, which can be turned over or changed. Below this are the hold buttons and the gambling section where you decide how many coins you are going to place as a bet.

As this is an All American game the money which you gamble with with twenty coins, whether you chose nickles, dimes, quarters or dollars. There are five skill levels, ranging from very easy - where predicting the cards is relatively straightforward -- through to the fifth, where it really is down to pot luck.

You begin with five cards, all face down. A decision must be made on how much money to place as a bet. Pressing Space releases one coin at a time from your 'bank' into the betting window. When you're happy with the stake, a press of the Enter key reveals all.

At this point you can have a completely new hand dealt or choose to hold certain cards, Pressing Enter activates the dealer. The screen will now either start flashing madly, signifying that you have won enormous loads of boodle, or it won't, meaning that you haven't. The game continues in this way until you're totally nickle-less Just like real life, really.

CRITICISM

" You can't win real money on this 'machine' so there doesn't really seem to be much point in playing it. Many games of this type are well presented and also offer a good simulation of the game. This is not the case with Video Poker. The graphics work well but it sometimes a bit hard to distinguish between the different suits. The way in which the cards turn over is fairly slick but it does take a while, which can be frustrating. The sound is a bit of a let down as there are no tunes and only a few effects, I'd keep well away from this game if I was you."

"Video Poker is one of the most boring poker games around. The game, as with most betting games, is good fun at first; but the parties, is good tan at itrist, but the pretty graphics and neat presentation don't hide what the game really consists of — not much. Video Poker is not really a game of skill at all. The whole game is based on luck — most of it bad! The different levels are a good idea and are structured well, and the idea of having a screen which gives you the odds is quite nice. but only superficial. The only real-ity in Video Poker is that you always lose in the end.

 "I wouldn't really play this sort of game anyway, whether it was on a computer or in a casino! Having said that, I did get about half an hour's fun out of Video Poker but after that the addictiveness began to wear off, it seemed that however craftily I played my hand the computer always ended up winning. The whole thing began to dis-solve into a game of luck and the skill involved in a real game of poker was lost. If I did pay out the £1.99 asking price I wouldn't be too fed up with my purchase, really."

COMMENTS

Control keys: ENTER to start, SPACE to select coins, ENTER for cards to be dealt, keys 1 to 5 to retain cards

BUMP SET SPIKE

Producer: Mastertronic Retail Price: £2.99 Author: Paul Ranson

olleyball comes to the Spectrum! The player controis two volleyball players on a court. The controls are the usual four directions, plus a fire button and two keys to select which player to control. When you are serving, hit the fire key, and a little cross moves away from the player presently under your con-trol. When the fire key is released, the ball travels through the air to wherever the cross was. The computer will then have a go at returning it.
If the ball comes back over the

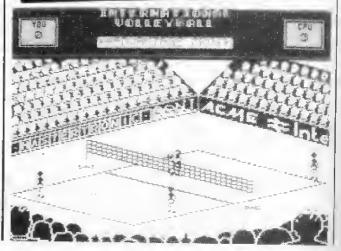

net, you've got to get a player to the point where the ball is going to land, indicated by the cross, and then press and hold the fire button. Once the ball is caught by the player, the cross starts moving away from the player in the direc-tion the player is facing. When the fire key is released, the ball hurtles

off to where the cross is . . . You can either bash the ball straight over the net, or if you're feeling fancy, pass it to the other player who then bumps it over. This is quite a useful tactic — if you only travels in the direction a player is facing, the ball merely gets returned to the opposing player who just hit it.

A good trick is to try to get close to the net and then just bump it

At first glance it looks as if you've held a pair of Jacke, but look again. The new cards are being turned over, Could be another

The little message box in the status area rubs it home that Cameron is being thrashed by the computer — 3-0 no less. Not

over, this usually wins the point. The computer opponent is no stouch: if you get in the lead, it suddenly starts to play a bit better, so just when you thought you had the hang of the game, things get a whole lot harder.

Scoring is simple, you only score a point if you win the point whilst serving, otherwise you just get to serve. The first team to score len points wins.

CRITICISM

• "Being an avid watcher of volleyball, Bump Set Spike aroused more than average interest in me. The monochrome graphics didn't exactly leap out of the screen at me, and the small, badly animated characters don't look particularly good. I hoped it would play better than it looks — it doesn't! Though it does pass as volleyball in the sense that you have to hit a ball over a net, in other aspects, it falls down on realism socoo much! The ball regularly flies through the net without hindrance, and if you're lucky, you can place the ball in front of the net without any problem. The whole game is pretty bad, even for £2.89."

- "Volleybail always seemed to me to be a very boring sport: the computer simulation is no different. Despite the lack of instructions the game was fairly easy to get into as there are only a limited number of things to do. Once you do figure out the instructions and actually get competent at playing fit took me two goes!] there doesn't really seem to be much point in playing it any more. The graphics although being run-of-the-mill work quite well. The sound on the other hand is awful; there are no tunes, and the effects are minimal. There isn't enough in this game to keep me playing for any length of time. I can't recommend it."
- Two man Volleyball? But then again never having seen another volleyball simulation, what's to be expected? Well I'll tell you: the graphics are Mr. Simple and the colour, well there isn't any. The playability is rather awkward to say the least as switching between two players can be very difficult. There is no guarantee, if you manage to get your player on the cross, or what you think is on the cross, that you actually stop the ball. Overall, poor by all standards. Not a very worthy game, even for a budget title. "

MIAMI DICE

Producer: Bug Byte Retail Price: £2.99 Author: Binary Design

ell, it's down to the old casino with the local low life: the game is craps, the stakes are high! Choose one of eight gamblers, take your money and make every roll count.

The game is all about rolling dice and betting on the outcome. However, being an American game, it naturally has a highly involved set of rules, in essence, it's rather like roulette without the wheel. The player who is 'shooter', throws the dice. A total of seven or eleven is a win, rolling two, three or twelve loses and any other total else means the shooter keeps rolling. If the first roll wasn't a winning or losing throw shooter has try to roll the same number again before rolling a seven. The shooter keeps rolling until a seven or the winning number comes up.

number comes up.
Players can bet either on the outcome of the shooter's efforts, or on a particular number coming up. Four punters and the croupier appear on the screen — the craps rollers are chosen from a list of eight including such dublous

On dearle me, it looks like Cemeron's lost. Didn't your Mummy tell you never to gamble, Cam?

characters as Sexy Sarah, Big Dick and Ahmed Arab. Each character takes it in turn to be the shooter. There is a short pause, and during a turn, any of the four players can hit their 'bet' button and then bet on the roll. A small window appears, and using the joystick controls, the amount staked can be set. Then the bet is laid. The window changes to show a portion of the table and the player can scroll around the table and decide where to place the bet.

Then the shooter shakes the dice with a bit of on screen animation, they roll around the table, and the total is shown on the screen. Players are then free to place bets again on the next roll, if a player has a successful session, when they decide to guit the game, they take a 'cheque' away with them—a code comes up which can be typed in at the beginning of another session to increase the kitty.

CRITICISM

- "There probably will never be a good gambling game, somehow staking tiny little sprites doesn't get the adrenalin pumping the way putting your shirt on the line does. I suppose if a bunch of four people were in a fairly 'happy' mood, loading this up could provide a few moments diversion, but that's about it. The animation is a bit crass, and the speech even crasser, which manages to break just about all bounds of good taste. I must admit, it never raised even a chuckle once. What a load of old craps.
- "Yes, the packaging is very nice, and the idea is a good one, as Craps has potential for a computer game, but the implementation is lacking a great deal. I started playing this, quite ready to give it a rave, after having read all about the speech and so on mentroned on the inlay, but now, I don't really think I want to look at Miami Dice again. The graphics, while being big, colourful and all that, aren't properly animated, and the speech is only just recognisable;

my general feeling of the game is that it works, but just doesn't seem to be worth loading.

"Crikey! What the heck have Bug Byte done here? After wading through the apalling instructions and finding out all the quirks of the game, I came to the conclusion that all the hassle was just not worth it. Goodness only knows what Miami has got to do with craps playing — surely it would have been more sensible to call it Las Vegas Dice? I found Miami Dice was very boring to play even if you're playing a four player game. A disappointing game,"

OLLI AND LISSA

Producer: Firebird Retail Price: £1.99 Author: Roger Danison

hose dawgawn Yankies are at it again. Trying to buy up our ancestral heritage and ship it back to their homeland to

give it a dollop o' culch.

This time they're after one of our lesser known historical monuments, Shilmore castle, Hidden amongst the craggy peaks of the highlands of Scotland the castle is home to no-one but a couple of strange creatures called Offi and Lissa - who kiss each other a lot and a crabby old ghost called Sir Humphrey.

As ghosts are destined always to haunt their own abode, the mig-ration to the US of Ameans that Si Humphrey will have to scoot off there too. How will be cope with the culture shock? No green and pleasant land over there, only a lot of smog, the odd mugger or two and plenty of noise in an LA sub-urb. Olli and Lissa are naturally worried about losing their spooky friend so they set about hatching a plan to scare off Eugene Port-Cullis III (Jor) away.

Sir Humphrey decides that people nowadays don't take ghosties and ghoulies very seriously. All that jangling of chains and going 'Whooo' is very old hat. What is needed is an unseen pre-sence to scare the living daylights out of Eugene P and dissuade him from buying the castle. Unfortu-nately, Sir Humphrey isn't one of those sophisticated ghosts who can materialise when and where he pleases. In order to make himself invisible he needs a special potion which must be simmered in a moderately hot cauldron for a couple of hours, So this is where Olli and Lissa come in.

Olli must scamper around Shilmore Castle collecting the vital ingredients while Sir Humphrey stirs the pot and shouts instructions and Lissa provides moral support — as well as the odd smackerooni for Olli. The only problem is that Shilmore Castle has more than one ghost. Sir Humphrey may be a grumpy old so-and-so, but he's a decent snake at heart. The other ghosts in the castle are a snooty crowd and are rather looking forward to a sojourn In sunny America for a while, out of the way of all those nasty Scotlish draughts. They set out to make Olli's task ever more difficult by appearing in his path and dazing the poor mite into losing precious time

There's a strict time limit for each object to be collected shown by a meter at the bottom of the screen. Olli must avoid the obstacles in his path and collect the required ingredient as Sir Hum-phrey demands. If Olli doesn't make it to the cauldron in time then the game is over and it's back to square one.

Each time a nasty ghosty makes contact with Oili he falls over and It takes him some time to recover, meanwhile the clock is being eaten away. However, once Olli manages to get the correct object and put it in Sir Humphrey's put then he gets a huge girlle kiss from Lissa (eugh!) and progresses to the next screen. There are eight objects in all and once these have

been added to Sir H's secret recipe he can down it in true Heeland style and become invisible. Then hopefully Eugene Port-Cullis III (Jnr) will take himself and his homid entourage back to the States, leaving Olli and Lissa to carry on doing yucky things to each other and Sir Humphrey to get on with some serious spook-

CRITICISM

"Yet another great budget title from FIREBIRD. What's hap-pening? At first it looks like a game for 'younger' people, as it contains cartoon-like charac-ters and the idea behind the game is simple. After a few goes I reckon that if this was given to me when I was younger I'd have been tearing out my hair and screaming with frustration. Gameplay is fast - you really ¬ you really have to get a move on to complete the first level - and it's incredibly tricky. Timing has to be exact if you're going to jump that nasty. It looks pretty, has excellent sound effects and is compelling and playable too.

 "Olli and Lissa is driving me mad. And what's more, I don't mind; its great fun! The music on the title screen is remarkable, but even this aural havoc pales into insignificance when compared to the game. The graphics are hordbly cute and the whole game reeks of being 'nice'. I really hated the so-called reward on the title screen; who wants a picture of Olli sneaking a sly one with Lissa while nobody's looking? Olli and Lissa is probably one of the best games I've seen from tirreling for a long time. (Hang on, that's not saying much, is it!) Well worth that awk-

BiRd ward two quid lying in the bottom of your pocket. Definitely one of the better budget games around.

 "Blimeyl FIREBIRD aren't half putting out a lot of budget games at the moment. I just hope that they are all as good as Oll and Lissa. The first thing that strikes you is the way that the screen is laid out. Each screen is either fully monochromatic or splits into monoc-hromatic bits. This gives you lots of colour on the screen but with no clashing. The game keeps very strictly to the storyline and this makes it all the more fun to play. found it hard to get started, but once I'd got the jumping sorted out the rest was plain sailing. Although the bubbling pot crying out for special items is borrowed from Knight Lore and the monochroma-the layout may be a bit old hat, Olli and Lissa is a perfectly acceptable budget game.

PRODIGY

Producer: Electric Dreams Retail Price: £7.99 Author: Mey Dinc

hé evil Wardlock is a genius.
Unfortunately, the
Wardlock's talents are misplaced and instead of using its
genetic experimentation capacity
for the good of mankind the
machine known as the Wardlock
done just the opposite — creating
horrendous genetic experiments

homendous genetic experiments. Two by-products of his dabbilings are Solo, a synthetic man, and Nejo, a baby. These two outcasts are doomed to wander the strange world of the Mechlabs forever, unless they can escape. But since the Mechlabs are infested with byproducts of the evil Wardlock's previous experiments, escape is far from easy. However, Solo has a plant if he can expose the evil workings of the Wardlock to the outside world, then the experiments will come to an end and the Wardlock will be destroyed.

Wardlock will be destroyed.

The Globjewels and Bloberites are uncomely creatures which wander around the Mechtabs terrorising everything that comes their way. As Solo and Nejo try to find a way out of the nightmarksh world in which they are imprisoned, they are constantly hassled by these inhuman beings. Fortunately, Solo is in possession of a nifty bubblegum gun which can be used to temporarily disable the nasties encountered.

The Mechlabs consist of three vast dimensional mazes. There are four sections altogether: the Ice zone, Fire Zone, Tech zone and Veggie Zone. These are distinguished by different colours, Solo must trek through the Mechlabs, searching for power crystals. Once found, these can be taken to a computer room and used to reprogram the computer causing it to open exits to the Outside World.

to open exits to the Outside World. Unfortunately, Solo has more to worry about than just the Globjewels and the Bloberites: tagging alongside him is the baby. Nejo. Lacking a natural mother, Nejo attaches himself to the rearest object, which happens to be Solo. Looking after a toddier is one thing, but trying to keep him in perlect health in a place as fundamenlally unhealthy as the Mechlabs is something else! Solo must watch out for nappy rash and make sure time, and the status area at the to monitors oxygen levels and the condition of the baby you're looking after.

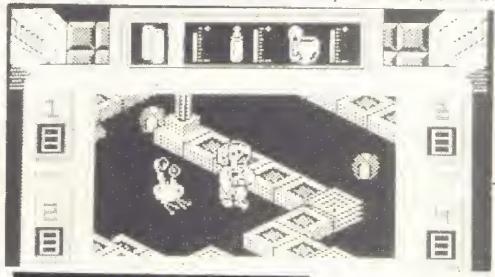

ing after.

For the first six minutes of a game, the nasties are fairly harmless but if you touch them during this period they get really heavy

CRITICISM

 "Well the graphics ARE quite pretty, and the sprites move the tricky side as the keys used are all in a line, but after lots of practice it gets better..."

"The first thing that struck me about Prodigy was the very smart way in which it is presented. The graphics are all very well drawn and very detailed. All of the characters are very well enimated and move about very smoothly. The sound at the beginning of the game is superb—even better than the Ping Pong music, it features loads of very realistic drum effects and synthesised sounds—that I presume are sampled, but still better.

A horrid bog-eyed Camoron look-slike follows synthi-man down a corridor! Youghn!

that the baby has clean dalpers every now and then. Babies must also be kept spanking clean, so water and bath facilities must be found and used along the way. Taking Nejo through the maze is quite a problem, since he often finds it difficult to move around obstacles, So, Solo has to guide him oute a bit.

A readout at the bottom of the screen provides hints from time to

quite well, but I don't really think that Prodigy is a very good game. The control keys remind me of the days when it was different to have control keys that fitted your finger patterns, but nowadays its more common to find a game with redefinable keys. Argh!! I reckon the music would be more aptly labelled noise, as it is absolutely awful. The game itself is almost playable, and therefore, quite addictive, but I don't think that It'll be a big success. 'Nuff seid?'"

"Who fancies a challenge then? You'll certainly get one if you buy this game because it is very, very hard. I grew more disappointed the more I played Prodigy, not due the game liself but more to do with my inability to play it successfully. The graphics are surprisingly good. The playing area scrolls smoothly and quickly and the characters are excellently animated and detailed. The various component parts of the playing area are also very pretly. The sound is brilliant: there is a wonderful tune on the title screen and the effects during the game are great. If you manage to work out what you have to do and then get past the nasties in the first six minutes then the game is a little easier to play, but if you mess that part up then you've had it. Controlling your synthi-man is a little on

out of the Spectrum speaker at a fair old wattage. I felt that the game was quite unplayable to start with, as the small screen and consistent dying made it very hard to get used to. Once mastered, the game is exciting to play and quite addictive. If you can get over the limited play area and awkward key positions then you'll find quite a good game, one definitely worth a look at.

DEACTIVATORS

Producer: Ariolasoft Retail Price: £8.95

Author: System Software/Tigress

t's the graveyard shift in the security room of a highly secret office complex. All the security guards are happily slumbering, unaware of the terrible fale that has overcome the building.

has overcome the building.
Suddenly, the smoke detectors go off, and as the guards rub the sleep out of their eyes, the full horror of the situation slowly dawns on them. The buildings have been attacked by highly sophisticated terrorists. Bombs have been planted all over the place, set with time fuses. The time limit to the game is set by the fuses on the bombs.

Normally, the security services can cope with this sort of everyday occurrence, and would just send in the security droids to sort things out and bang a few heads together. But things are getting out of hand. The terrorists have got into the central data banks, reprogrammed the security droids and then wrecked the computer.

So there's nothing for it, but to call in the Deactivators. These little chaps are a dedicated team of super droids controlled via an icon system in the lower display area, below the view of a pair of rooms. Pressing the fire key brings up four icons: select a droid, throw, scan, and return to the game. In scan mode, a cursor can be moved around a small plan of the building displaying the contents of rooms.

In detail. Select a drold allows the cursor to be moved around the plan screen, and a droid selected. This droid can then be moved around from room to room. The main display reveals the room the droid is in and an adjacent room.

droid is in, and an adjacent room. Each of the five levels of the game is progressively harder. The first level is a simple four by four grid in which there are three bombs to be destroyed. Rooms are linked and many of them have several exits, although some have windows, transporters, or poles which allow vertical travel. Circuit boards can be found in some locations. The circuits have differing effects when they are moved to the computer room and plugged in: force fields are deactivated; transporters initialised and lights turned on in dark rooms for instance.

Reprogrammed security droids are out to get the unarmed Deactivators. The only way to kill a security droid is to get it to follow the Deactivators around and fall through the floor a few times. Usually, getting a bomb out of the building requires team work. The bomb gets picked up by one-droid, and then thrown through a window to another droid. You should make sure that the other droid is ready to catch the bomb when it is thrown, as bouncing a bomb around tends to make it explode!

icon, and then chucking the bomb, circuit board or whatever when the indicator reaches the angle desired. However, adjacent rooms tend to have different gravities, or even totally different orientations—presented on screen upside down, or sideways.

Should a bomb explode, then

question of selecting the throw

0

Should a bomb explode, then both the room and the clumsy droid are eliminated — which could mean the game becomes impossible to complete.

CRITICISM

O"No way can this be described as an easy game. Even the first level takes a lot of getting used to but, as long as you can master that, you'll really get into it. Some of the problems are neat and totally mindblowing on the later levels, with the rooms at all angles, and some dark. The icon driven system can be another sticking point, but at least it means a complicated game can be controlled from a joystick. The graphics are

well drawn, and there are some jolly visual effects like the bombs going off, It's rare to see a strategy game with so much care taken over presentation."

ick, throw it out the exit!

• Games like this have never really appealed to me as they involve too much brain and pencil work. Graphically, Deactivators is unique — I have never seen a game quite like it be. The droids are detailed and well animated and the rooms are drawn in neat perspective. The sound is disappointing; there are no tunes and the effects are limp. The game is very difficult to play even on the first level, though if you do persevere it gets very rewarding when you finish a building. Very playable if you stick with it."

Now and again it's nice to see a game that does not involve shooting things. Deactivators is something of a strategy game as you must plan all your moves perfectly beforehand. Just one slip could have explosive consequences! The graphics are simple and uncomplicated as is the game play, although lobbing the bombs around does take a little practice. The explosions are well done, with the screen shaking vlolently, but unfortunately the room in which the explosion take place is totally devastated, making it practically impossible to complete that level. An ingenious game - and a welcome change.

Caught with a bomb by a baddle. The room on the right.

ASTERIX AND THE MAGIC CAULDRON

Producer: Melbourne House

Retail Price: £8.95

Author: William Tang, Andrew Pierson, Frank Oldham

ack in 50 BC much of Gaul is under Roman rule except one village where Asterix and Obelix live. Asterix, made famous in cartoon strips and books, is the cunning fighter always confronting impossible situations, helped by his eternally hungry and

rotund friend, Obelix.
The people of Asterix's village are not fighters but they do have magic on their side. Getafix, the wise village Druid, developed a mystical herbal recipe which, when drunk, gives the drinker powerful super-human strengths.

When Obelix was a baby he fell into Getafix's cauldron and virtually overdosed on the elixir. The

There are fifty screens in the game depicting scenes from the village, the surrounding countryside, and the Roman encamp-ments. Obelix will follow Asterix anywhere but there are limits and he has to be bribed with his favourite food; wild boar harns. Asterix starts his journey with five of these hams and one disappears each time Asterix and Obelix feel a little peckish. If the stock gets too low then Asterix has to fight a boar the fight sequences in the game take place in windows that zoom out of the main playscreen. Stamina bars for each combatant appear on the side of the window and the winner is the one who biff

The pieces of the cauldron are shown at the top of the screen when they have been pocketed. Keys can also be picked up to get Asterix and Obelix into previously unexplored areas of the game.

CRITICISM

"When I was small I used to read the books, and they still raise a few laughs. So does the game, but in an entirely different sense: probably in that I looked forward to reading the books, but I certainly would avoid play-ing the game if I possibly could.

extremely well drawn. Colour is well used and the game avoids clashes with the use of big black outlines on all of the buildings basic but effective. The sound in the game is practically non-existent, but the game doesn't suffer too much without it. All the characters are very recognisable and fun to walk around with — which adds to the whole image of the game. I like the way the windows open when Asterix gets into trouble. Even though all these good bits may attract you to the game, I must warn you that the game contains little for the game player to do bar wander round and have the odd scrap.

Come on guys I've been waiting for this game for ages and when it finally arrives it's awful. I expected better of MELBOURNE HOUSE. I was very surprised at the unprofessional way this game had been presented and at the general 'unfinishedness' of it — it seems that Asterix has just been thrown together to meet a deadline. The graphics are about the only thing that Asterix can boast about — the characters are well detailed and nicely animated and the playing area is colourful and full of detail The sound is a little on the poor side: there are no tunes and the effects are minimal. The annoying bit is the way you can get stuck in a tree or wedged between Obelix and a building, fortunately there is a game abort option but it does get very frustrating if you have to abort a game when you have five pieces.

Asterix and Obelix admire the scenery in the Gaulish village. The status area reveals four hams in stock. They haven't used the potion yet...

never worked off and sometimes he forgets his mighty strength. Naughty Obellx tries to get a top up during a brewing ses-sion, but Getafix stemly turns him away. Obelix is not amused and aims a gentle kick at the cauldron it shatters into seven pieces that scatter throughout Gaul. Vitscatter throughout Gaul. Vit-alstatistix, the chief of the tribe, is not amused. Asterix and Obelix offer to hunt for the pieces so the elexir can be brewed again to save the village from the marauding Romans

the other into submission first. Defeating the boar turns it into a baked ham that is added to the scoff chart. If Asterix loses a fight, the boar kicks him out of the window and he loses a life. The window system is also used when fighting with the Roman soldiers and when Asterix picks up useful objects along the way. Asterix starts with five lives and

a phial of the elixir which was salvaged from the broken cauldron. This can only be used once in the game in time of extreme trouble.

The graphics and the loading screen are very pretty, but the game, as far as playability is concerned, is just amazingly bug ridden. In the course of playing Asterixl had to reload it no less than six times. If I had been unfortunate enough to buy this, I would be well cheesed off by now, but thank heaven I'll probably never have to play it again. Very pretty, but not much

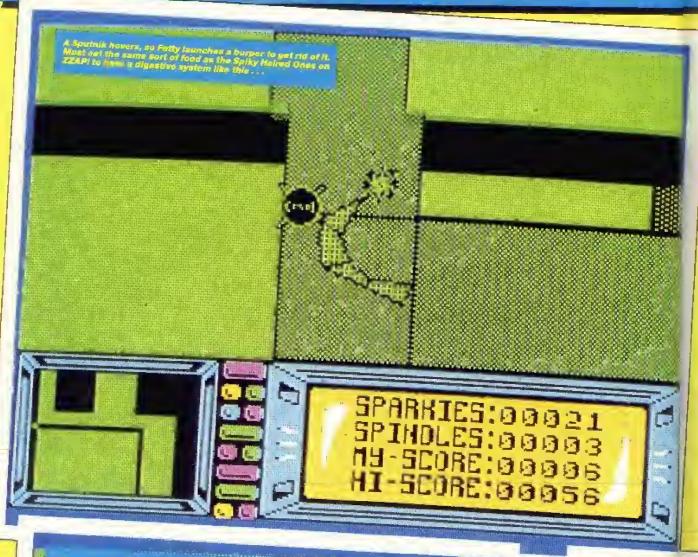

"Asterix is a strange sort of game that contains its good bits and its fair share of bad bits. The game consists of some excellent graphics that are very big and

et's face it, just about the dumbest habitat for your average worm is the inside of a Spectrum. But, things being the way they are in computer games, that's exactly where this particular worm resides.

Ol' Fatty, the world's most dense worm, has clearly hit upon the theory that this is the place where he is least likely to be hassled by blackbirds, robins and the like.

blackbirds, robins and the like.
Just as he is settling down to the easy life, he suddenly realises that things aren't so wonderful after all. Contrary to popular opinion, the inside of the average Spectrum is absolutely crawling with life. Creeper bugs buzz around in Sputniks, swooping low over the main PCB. The Sputniks, if not dealt with, transform into Crawlies which try to attach themselves to Fatty. Just to add to the problems, termite-like Crawlies sometimes erupt from the surface of the PCB and chase him around.

Fatty's eventual aim in life is the very natural urge to pass on his genes to another generation. Considering the limited intelligence he has displayed up to date, this seems a thoroughly dubious goal. To reproduce, Fatty needs to collect 50 spindles lying around on the PCB. Then he's got to find the disk drive, get all his data copied and clone himself.

The microscopic world of Fatty is a world of bewildering height and depth. What might seem a silver of silver conductor to you or me is an insurmountable obstacle

to him. To get around, he has to be carefully steered up convenient ramps and slid along data buses suspended at dizzying heights above the PCB. All the various bits and blocks scattered around the place are given true perspective, so that, when they are at the centre of the screen, they appear flat. As Fatty moves, and the object approaches the edge of the screen, the sides of the object come into view giving an impression of height not unlike flying over

CRITICISM

"Wow! This game has got graphics which look so amazing that I don't think I can comment on them fairly. The title is unusus!, if nothing else, but hardly prepares you for the stunning originality of the game, Playability and addictiveness are of the highest standard, but as for the graphics — well, what can I say? As far as animation and solid 3D goes, this is probably the best I have ever seen, though the colour accolade must still go to Lightforce. Now, if oursell teamed up with Fit., I would probably be reduced to a manning.

speechless moror. But then, what's new?!"

CRITICISM

" Not exactly a run-of-themill title for a computer game but then this isn't realty a run-of-the-mill Stomping around game. the inside of a computer has been done many times before but pureu, has certainly done it well, and diffe rently. Fat Worm, graphi-cally, is as revolutionary as 3D Ant Attack was in its day; the 3D effect is ASTOUND-ING. The only thing that spoils the graphics for me is the use of colour. After a while the bright green really does affect your eyes, though you can always turn down the colour control on your TV. Soundwise I have no arumbles - there are many effects during the game and a really good tune on the title screen. Controlling your fet Worm is a mite difficult but given little practice you will soon be turning on a six-pence. It isn't often that I feel that I have to add a new game to my relatively small collection, but this one's a must. Go and buy it now. your life will be incomplete without it! "

a Lilliputian version of New York.

Fatty's fate is sealed if he picks up more than four Crawlies, but there are handy debuggers scattered around, and by crawling into them, he can shed any Crawlies picked up. He can also fight back against the Crawlies by using blaster sparkies fired horizontally straight from the nose, and by laying burper sparkies which wait until a Sputnik is flying overhead and then rise up to eliminate it. Very high-flying Sputniks are, unfortunately, immune. Burpers are also useful for changing direction, and can take out any Crawlies which happen to bump into them.

Extra sparkies are awarded for picking up spindles, and can also be picked up when zipping along the thin data buses. Furthermore,

Producer: Durell Retail Price: £9.95 Author: Julian Todd misfired burper sparkies which end up lying on the PCB can be consumed and regurgitated later. Mapping is an essential feature to find Fatty's way around the immense circuit, and to help, the game has a small firser trimap showing some of the nearby obstacles, spindles, and a rough indication of Fatty's present position.

Fat Worm Blows a Sparky originally started life as Killer DOS, a

CRITICISM

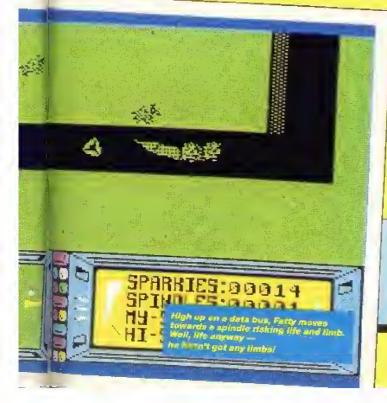

"So the worm turns. Not only that, he writhes and wriggles. You just won't believe the sort of graphics in this game. The perspective and sense of height are so realistic I got vertigo! Not just content with awesome graphics, the game play is terrific. Trying to steer the worm around with the Sputniks buzzing overhead, and all the time keeping In mind where you're going, is some game. It's so good to see something this original. It's just like nothing else. This is going to set a new standard for solid 3D."

mucho macho serious simulation of software worms invading computer systems, cloning themselves and corrupting all the disks. But purell decided that it was all getting slightly silly, and instead chose to release a game which had absolutely no relevance to anything whatsoever. And thus was Fatty created.

CONQUESTADOR

Producer: Melbourne House Retail Price: £7.95

Author: Javier Cano, Emilio Martinez, Jose Manuel Munoz

ack in the days when life was cheap and baddies were numerous, Battle Hero Redhan faced an awesome task: he volunteered to rescue Taleria from the hands of his deadliest enemies. His quest will take him deep through the dark lands into territory unfamiliar to him, and his power will be challenged by many evil beings: Glauring the fire dragon, Kulwoor the magician's Lord, and Zwolthan the Lord of the Circle of the Blazing Spheres.

In order to release Taleria, Redhan must find three 'star stones', concealed in three of the many chests scattered throughout this strange land. The chests are opened automatically when Redhan walks into them and release a mystical swirling vapour. Extra lives or a new arsenal of arrows might be added to Redhan's inventory of objects, but some of the chests release strange

tive as he embarks on his mission, but he does have a few weapons to help him out. Six arrows rest in his quiver and can be shot at the guardians if they get too close. Redhan can also perform a superhigh jump or a running long jump very handy for bridging any perilous gaps.

The guardians manifest themselves in various forms, such as master archers, manic lancers, and knights wielding huge swords, and all of them can be killed by shooting at or stomping on them.— If Redhan jumps from a reasonable height onto a character's head, then they disappear in a puff of white smoke.

On the lower levels of the mountain citadel, an even greater threat is encountered... huge tarantulas scuttle along the ground at a faster pace than Redhan, and must be destroyed as quickly as possible. Some of the spiders are more

Better than having an elephant's foot — why not have a whole elephant as an ornament. Squaring up to a couple of archer; in CONQUESTADOR

nasty teeth, but if Redhan walks into one, he is magically transported to another part of the mystical citadel to face yet more perils on the rescue mission.

CRITICISM

O" Although Conquestador isn't one of the worst games I've played, it certainly isn't one of the best. The graphics are reasonable, but the game is only mildly playable and addictive, Letting your man change into an aardvark Is an interesting experience, and the game, though facking an original format, plays differently to a lot of similar-looking games. This is

about a new one. At first sight Conquestador looks as though it could be a really good game. Further play reveals that it doesn't go into much depth, so it isn't really much fun to play. There are only a few types of location, so once you have seen them all there isn't anything to spur you on to complete the game. The graphics are very Underwurdesque; large colourful characters and pretty backgrounds. The sound is lacking, but the spot effects are adequate. On the whole I don't recommend this game as it becomes monotonous after a short time."

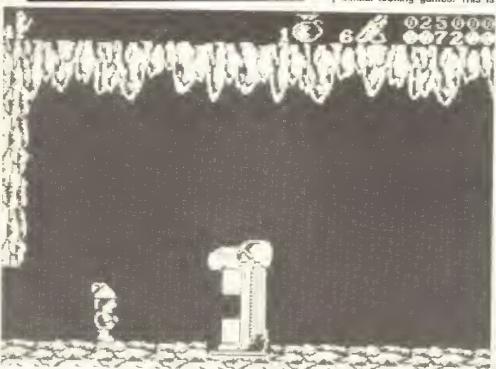

• "MELBOUANE HOUSE seem to have got out of the 'fighting' games rut and have, via ERBE SOFT, almost come up with a good game. The basic look of the game is very similar to all the other arcade adventures of this Ilk, eg. Rabat Messiah. Conquestador strikes me as being very simple to play and it contains very little to keep the player contented for very long. The graphics are large and colourful, but a lot of flicker occurs when two characters pass over each other. This happens often on any one screen, and I found the game very slow and unplayable. Conquestador represents nothing new on the software market, and is lacking in many areas."

THRUST

Producer: Firebird Retail Price: £1.99 Author: Jeremy Smith. Conversion by D Lowe

he Resistance movement is about to launch a huge offensive against a tyrannical Intergalactic Empire.

In preparation for this mammoth and probably suicidal assault, the Resistance has captured several battle-grade starships, only to discover that they are largely useless in war, as they are lacking the necessary Klystron pods which provide power. The catch is that these pods are only to be found on Empire-owned planets.

A volunteer must be found to steal enough Klystron pods for the mission to go ahead. As you yes, sonny, you - are one of the most skilled pilots in the Resistance, just guess who the lucky blighter's going to be. Using all your skills, you must fly to each planet in turn and steal a pod, then drag it out of orbit to where it can be picked up by the Resistance

Each planet is defended by a battery of limpet guns which are powered by a nuclear plant, and shooting at the plant puts the guns temporarily out of action. The more direct hits scored on the power plant, the longer it takes the limpet guns to recharge. But if too many shots are rained down upon the plant it becomes unstable, and you then have a mere ten seconds in which to grab a pod and pull back before the entire planet selfdestructs. If you've got away with the pod, then destroying the l

planet picks up a sizeable reward. Failure to retrieve the pod results In instant mission termination.

Your craft possesses only an upwards thrust, and downwards movements are controlled by gravity. You must constantly thrust away from the planet's powerful gravitational field which drags your craft towards the ground and ultimate destruction. the

After each pod has been safely captured you automatically pro-ceed to the next planet, each having its own pecullar characteristics. You will have to contend with reversed gravity and invisible landscapes before the game loops around and starts all over again.

And so, once more, the fate of the galaxy is in your trembling hands. Good luck, and good pod hunting!

After a lot of sweat and cursing I can honestly say that Thrust is the most compelling budget game I've played in months. At first it looks extremely primitive, with vector graphics that resemble the arcade classic Gravitar, limited use of colour and a front and that you can only access once. The levels are very hard to master, so remembering the layouts of the caverns is essential if you SCORE:

Cameron's just collected the pod doobrie in THRUST — all he's go to do is make his way to the planet's surface

wish to do well. Controlling your ship is similar to all other Gravitar variants and takes a bit of getting used to and an awful lot of practice. I strongly recommend this one as a very good game at a very silly price!"

" I would have thought that the Spectrum would have been the perfect computer for Thrust; surely the programmers would be able to give it lots of speed and keep it one of the most playable games around. Unfortunately, as with most conversions, it has lost some of its sparkte in the transition from 6502 to Z80. There's no doubt that Thrust is fast - too fast at times but it seems to have been poorly

Cam's getting dangerously close to that defence emplace-ment. Mind you, he's near the fuel dumps . . .

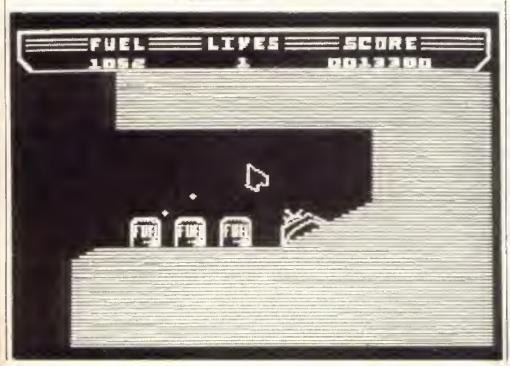

programmed. The borders for scrolling are all in the wrong place, programmed. and it fails to scroll sufficiently which results in a very jerky screen when travelling at speed. The game lacks the sound that the original had and instead just replaces it with a stupid flashing border every time you hit anything. Thrust has lost most of the appeal of the original, and you're left with only the basics of the game.

" This was an extremely playable game on other machines. The Spectrum version is, to me, just as good, Unfortunately, as is so often the case, the sound has lost out on the conversion, but otherwise, Thrust is still very good value for money. The scrolling is poor, and the graphics are tiny, but, credit where it's due, FIREBIRD has a very playable game in Thrust, I like it a

TRAILBLAZER

Producer: Gremlin Graphics

Retail Price: £7.95

bouncy balt, hero of GREMun's latest game, has to blaze a trail that others may follow.

The trouble is, the trail through space has rather strange properties. Instead of being a nice flat road old Mr Bouncy can just steam down, it's a bit full of holes. It's a bit like the 'Yellow Brick Road' with the Shropshire District Council doing the one-way system, full of holes, bumps and all sorts of hideous hazards

Before Bouncy's work is done, he's got fourteen different courses to blaze a trail down, so he's really got his work cut out. Each course has to be done in around forty seconds, so no slacking or back slid-

For trainee bouncies, there's a practice mode which allows the player to practise any three courses in an attempt to get the course time down. In practice mode, the time limit is 100 seconds, but, if you fancy your chances in the main game, it's got to be around 40 seconds.

the controls are simple, forward to accelerate, back to brake, left and right to move from side to side on the belt. straight over them. Diagonally striped squares speed you up. Not much of a problem here, you are normally going flat out to make the time limit anyway. Next in awfulness comes the solid white squares. These jump you in to space. At full lick, this will catapuit of bouncy forward just over three segments.

segments.
Then comes the real nasty ones. The horizontally lined segements have roughly the same effect as bouncy hitting a treacle-filled lake, they kind of stick to you. Only a lot of heaving forward on the joystick will get you through these ones. Then there are the spotty squares. These totally freak poor little bouncy out by reversing the left and right controls. This unfortunate state of affairs is only corrected by steaming over another spotty bit.

Then of course there are the black segments, like there's no ground man, some cat's taken the ground away. Old bouncy ends up falling down quite a lew of these.

After crashing, he gets thrown back on the belt, but without momentum, a situation leading to further disasters on the gaping bits. Once the rhythm's gone, old bouncy's In for a hard time, and the clock is still ticking away. On average, every crash costs about two seconds of precious trailblazing time.

Blazing a trail through the cosmos. Solid squares give you that extra bounce

The course is like an out of control flattened escalator like those ones that never work at Heathrow—it's thundering down the screen towards you, and you are trying to leg it up the other way. But this is no ordinary escalator. For a start it's suspended in space, and there are bits missing. On some screens, there's more missing than there are bits! The belt is five segments wide and comes in a variety of shades. Shaded squares are easy to handle you just roll.

To help on each course, the player gets four extra bounces (hit fire). This allows some of the really nasty bits to be avoided, or if the player forgets the course, and suddenly finds himself heading towards a yawning abyss, it comes in handy. The main use of the extra bounces is to get over the horizontally lined bits, or as a shortcut round a zig-zag. As these cost time, up to five seconds, it's almost preferable to crash! But the best method is to press fire just

Things are getting difficult — look out for that nasty patch ahead: It'll slow you down!

before hitting them and go sailing straight over.

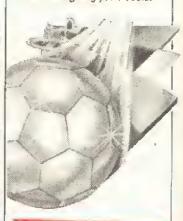

CRITICISM

• "I must be the only person in the office not to have played this on either the Amstrad or the Commodore so It took me a long while to really enjoy playing it. I'm a little surprised that there wasn't a really involved scenario on the iniay as the game really does lend itself to one. The graphics are very very fast, and well defined too. Golour is a little suspect on some screens but you can always turn down the colour on your TV if things get too garish. The sound is a bit disappointing as the tune is primitive and the effects aren't really up to much. Once you become competent at Trail Blazer it's quite hard to leave it alone as it is extremely playable and addictive."

"I was quite surprised at this game coming onto the Spectrum because I couldn't imagine it without all the colour, which plays an integral part in other versions. GREMLIN Seem to have come up with an effective compromise, using excellent shading, which makes up for the defficiency quite well. The tune on the title screen is pretty ancient stuff, but the game, as in the original, plays superbly, and that's the major point in its favour. I think Traibilazer is a very good conversion, and one that's well getting it it's playability you want and not graphics."

This is obviously a game that doesn't rest easily on the Spectrum without the colour that played such an important part in the other versions. The shading works okay, but I think it affects the gameplay—it's far easier to see the colour of a square rapidly scrolling towards you than it is to see shading. Despite all that, it's a fast,

addictive original game that'll soon have you hooked. The practice mode is a real plus and means you can seriously concentrate on the screens giving you trouble."

STARTLING ACTION · INNOVATIVE GAME PLAY · STATE OF THE ART 3-D GRAPHICS

DRAGON'S LAIR

Producer: Software Projects

Retail Price: £9.95

Author: Paul Hodgson and Andy Walker

emember the first interactive video machine from the arcades? Well, here's the game, adapted for the Spectrum.

Singe, the dragon with bad breath, has been a naughty boy again. He wants a piece of the action in good King Aethelred's patch—in fact he wants the whole pie. Naturally the king, and all his subjects over whom he rules with peace and enlightenment, are not too keen on big old Bad Breath moving in. but Dragon's aren't brought up to understand the word 'no': their mummies always spoil them. And so they develop antisocial habits, like making off with the king's daughter should anyone annoy them.

Singe has picked a bad place for a fight, for the King's daughter happens to be betrothed to the local macho dimbo. Dirk the Darng. Dirk, the King's champion, is always dashing around doing val-iant things. Now whilst you or I

might just nip down the 'local,' on hearing the news that your other half is about to become a late night dragon snack, old Dirk straps on his sword and trudges off to Singe's lair to do battle with the horrors that await him.

There are nine screens to the game, and each has to be loaded from cassette in turn — an Opus drive version is also available for a little extra money. If you run out of lives, then the tape has to be rewound and things start back on level one. Each level takes about 30 seconds to load from tape.

Section one features Dirk descending into the dank depths on a falling disk. Singe's Air Genles try to blow Dirk off so he plunges to his doom. Dirk must quickly react to which direction the Genie is blowing from and run into the

Next comes the hallway. Timing is everything here, dainty footwork and nifty swordplay are the only

Oh dear. Dirk's done it now, Falling off the edge of his platform, he does the piumetting this time!

way to avoid the bats and the clutching hands.

Next come the flaming ropes. Leaping from platform to rope to rope, timing the jumps to catch the ropes. But speed is a must or the ropes burn away before Dirk has done his stuff. Then comes the weapons room. Again it's a ques-tion of well timed moves. After this comes the attack of the Giddy Goons. An extra key has to come in to play, as Dirk needs to jump from step to step and despatch the Goons at the same time.

Next comes the tentacle room where some of Singe's early mis-takes in meanle making still hang out. Once again, timing is the key. The right move has to be made at precisely the right time. Then it's fälling disk time again. Once more it's a question of reacting to the odd meanie breaking wind

Now things get really tricky. A battle to the death with Singe's evil Lieutenant, the phantom knight on a checkerboard suspended in space. Each time the knight appears, he turns more of the checkerboard into a deadly trap

After all that, Dirk finally makes it to the Dragon's lair, and then has to dodge from rock to rock, hiding from Singe's flaming breath, while helping himself to the odd bit of treasure he finds. By edging along a thin precipice, Dirk picks up a magic sword and slays the dragon, and frees Princess Daphne. Or that's the theory

gon's Lair, has gone 'rave, rave, rave' about it at some time. The Spectrum version, while remaining true to the arcade on lots of

counts, still lacks an element of playability, which makes it unad-dictive. I suppose the difficulty level is one of the game's prime factors, as a game like this with such a high price tag has to justify that by the length of time spent playing, which, I must contess, in my case, wasn't very long.

"If you were an avid Dragon's.

Lair player in the arcades then stay

well away from this as it bears little

resemblance to the original. Hav-ing sald that, for your first few goes

the game looks quite promising. In

fact I finished the first level (and what a hard slog it was too!) then I discovered the Multiload which

took all the fun out of playing the

game. The graphics are on the whole very good — lovely large characters that move around

characters that move around smoothly and some very nice scenery. Soundwise this offers less than many of MASTERTRONIC budget titles with only a mere sprinkling of spot effects. I can't really recommend this as I didn't really have any fun playing it. "

"Everyone I know, who has played the arcade version of Dra-

Dirk the Daring dences on an plumetting platform while the bad guy tries to blow him away, literally

CRITICISM

 Well, this is quite a faithful adaptation of the arcade game, and thus suffers from most of its and thus suffers from most of its weaknesses — sadly it retains few of the original's strengths. The graphics, whilst good, are hardly video disk quelity, but the single screen format of the game means there's very little actual gameplay, most of it is just very accurate positioning and incredibly accurate timing. it is frustrating without being addictive. That, coupled with having to load every screen from tape makes this a game I'll not be coming back to regularly.

PUB GAMES

Producer: Alligata Retail Price: £9.95

Author: Richard Stevenson

ub games seem to be dying out in nowadays — fruit machines and pints of extremely fizzy lager seem to be more popular forms of entertainment. But now, courtesy of ALLIGATA, there's the chance to resuscitate some of these age old games in the comfort of your home. This compilation pack is designed to be played by two players, starting from side one and working through all seven games. There's also a practice option to help you get into the swing of things.

The first event is darts, in which both players try to work their way down to zero from either 301 or 501 in the best of three games. Three darts are provided, and a little character on the left of the boards throws with a press of the space bar once you've aligned the dart to your satisfaction, moving up, down, left and right. Just to make things a little bit harder the computer has a spot of the shakes, so perfect timing is necessary to

get an accurate shot.

Next, comes bar billiards. This is played with eight balls on a special table with holes in the surface. The object is to score as many points as possible by potting the balls, avoiding penalty mushrooms situated at inconvenient points around the table. There are seven white balls and one red. Each hole has a different points value when a ball falls into it and the red ball doubles that value.

A foul is recorded if you fail to hit a ball or accidentally knock over a white mushroom or if any ball returns over the baulk line. Knocking over the black mushroom reduces your score in the game to zero. You have ten minutes of play after which potted balls are not returned to you.

Dominoes is next with both players trying to get rid of all of their dominoes by adding them to the dominies on the 'table' according to the usual rules —

best of three games again. The second side of the cassette

contains table football, pontoon and poker. In table football you are presented with a plan view of a football table with the opposing sides rapresented by their appropriate colours. Just like real table football, the players can be moved from side to side. Pressing the FIRE key kicks the ball. Only nine balls are provided per game, so the first player to score five goals wins.

In Pontoon, the aim is to get a hand of cards with a combined face value of twenty-one, or as close to twenty-one as possible. Starting with two cards which you can twist (have an other card given to you which the other player sees), buy (get another card which only you see) or stick (keep the cards you already have). You can 'burn' an entire hand after the deal—hand it in and get a new set of cards. Ten hands are played, and the overall winner gets to pocket the whole kitty.

After a game of Pontoon what could be better than a spicy game of poker? Keys 1 through to 5 control the five cards dealt and these can be thrown away or kept depending on how good the hand is. Usual poker rules apply, as detailed in the Inlay.

Skittles is the final challenge:

Skittles is the final challenge: after lining up your ball, pressing a key sends it racing down the ally, hopefully resulting in a strike. There are ten bowls per game and five separate games in all.

"Pub Games is a very good compilation. Each of the games is a very definite individual game, quite different from the rest. I doubt that reviewing them separately, I'd give them all more than 70% apiece. But in the compilation, they all join up to give a real nights entertainment. My only major complaint is that there is no quit option to allow you to leave one game and go onto the next in the full pub run. Pub Games has a lot to it, and if you're into the simple, but not too easy sort of games, then this might just be what you're looking for."

• "ALIGATA have really put their minds to this one and come up with a first class simulation. All of the games are very well done, and contain a decent mixture of graphics and fun, adding up to the perfect pub package. Every game is faithfully reproduced and great fun can be had if you get a decent enough opponent. Some may frown on the idea of a two-player game only, but I don't think a one player game "would have been much fun. I didn't find the multi-load a problem, as you can load each game individually — you just don't get your scores carried across from the last game. All in all, I found Pub Games great fun to play and well worth the asking price."

CRITICISM

"What a lovely idea this is! Sadly, ALLIGATA seemed to have missed out the most important bit of going down the pub — but they probably ran out of space at the end of the tape! On the whole, this is presented quite whole, this is presented quite well with graphics of a fairly high quality used throughout, a few well placed spot effects, and even the occasional tune. The seven events are quite good fun to play, although I can't really see them keeping me occupied for very long. Generally this isn't a bad set of games for the asking price, but I didn't find them all that compelling."

DIFFICULT DELIVERY

Here's a curious little number from A'N'F. Wibstars follows the antics of a computer distribution company, as it goes about its day-to-day business of collecting hardware and software, and delivering the goods to the various emporta along the High Street, If you've ever wondered why

If you've ever wondered why your Spectrum occasionally throws a wobbly, then this game explains all. Driving your delivery van across town is hazardous in itself, with rival tradesmen scattering lin tacks over the asphalt—but that's nothing compared to the manic maybem in the shops.

Wibstars will be out any day now

Wibstars will be out any day now delivery men permitting! — and costs £9.95. Any resemblance with any real distribution companies, living or dead, is of course entirely coincidental.

A typical scene at your local computer store, as found in WIESTARS, programmed by the A'N'F team

DOWN THESE MEAN STRE

Sam, cruisin' around on the wrong side of town as he makes his way through MICAOSPHEAE's new offering

Cue: soulful saxophone music, Pull camera back to reveal a beaten-up shamus sitting behind his beaten-up desk, bottle of Old Turkey in his beaten-up hand. 'Hi, my name's Sam Cruise. Occupation, private dick. Occupa-

tion at the moment, just showing the folks at CRASH around this fair city. When I first rented this office, it was on the wrong side of town, and it's been going down ever

since - you get a wonderful view

of the garbage tip from here.

'It's not a bad neighbourhood, though most folks have left. Either that or there's been some new concrete statues in the river. We get the odd tourists, mostly attending the hoodlum conven-tions at the Hotel Royale.

MICROSPHERE'S eagerly-awaited colourful film noir, Contact Sam Cruise, is now only days from

Sam shows us what's a broad . . .

completion, and programmer David Reidy's still not giving much away. What we do know, from the delightful demo that arrived, is that it features an atmospheric in-period scrolling play area, much larger than that of Skool Daze, and includes many buildings, com-plete with brownstones and blinds. Microsphere reckon that it's the first game which has solid locations that completely obscure

your character as he explores them. Sam can open blinds, look out of windows, switch off lights, and make telephone calls. The game should be out by mid-November and the price has yet to be fixed. Reidy's also dropping heavy hints about a sequel to Skool Daze, also due out before Xmas. Keep a space on your Chrissie stacking list....

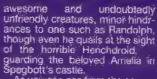

.... You have no object to use!

Randy meets a denizen of the SS Rustbucket who looks slightly the worse for wear

A little extra programming effort has forced Footballer of the Year into extra time, so we thought we'd give you a longer look at two other cremun games that are about to see the light of day.

Future Knight is a jolly little arcade quest featuring that knight in shining spacesuit, Randolph, in his chivalrous mission to rescue the winsome Amelia from the greasy grasp of Spegbott the Terrible, Amelia's vintage spacecraft

the SS Rustbucket — has crashlanded somewhere in the Zragg planetary system, and Randolph's search begins here. There are 20 levels in the wrecked ship itself and once Randolph has battled through these, summarily despatching ghosts; floating skulls, the odd robot or two, and the very unpleasant Berzerka Security Droids, there's the inhospitable planet surface to inhospitable planet surface to traverse. Here dwell mystical

TREASURE

1

As you can see from the screen shots here, the graphics are detailed and chunky, with an effective cross-hatched shadow

effect. Animation is sm. th and humorous, brave Randolph shak-ing his head to clear it after particu-larly sudden falls, and obviously

enjoying sliding down inclines. Necessary spells and objects are scattered around the ship,

are scattered around the ship, ranging from keys, security passes and bombs, to the more esoteric sceptres, for killing the semi-indestructable robots. Gloves enable Randy to carry the release spell without getting bumt.

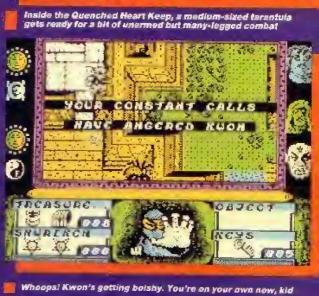

Avenger, or Way of the Tiger It, was previewed in September's CRASH. We've since seen an all-singing, all-dancing pre-production copy.

As you probably know by now, the story tells of how your foster father Naijishu has been killed by the maleyolent Yaemon, Grandmaster of Flame, who has stolen the Scrolls of Kettsuin from the temple of the god Kwon. You have sworn to avenge Naijishu, and get

temple of the god Kwon. You have sworn to avenge Naijishu, and get back into Kwon's good books by retrieving the scroils from Yaemon's fortress, the poetically named Quench Heart Keep.

The playing area is vast — 300. scrolling screens split over the six levels of the Keep — with trapis, grills, wells, and 'living floors'! There are more than enough nasties to precitise your martial arts on, and the three guarmartial arts on, and the three guar-dians of the keep must be killed in a specific order. If all that wasn't a specific order. If all that wasn't enough, of Kwon occasionally throws a wobbly and retuses to help you, which is a bit ungrateful considering it's his rotten scrolls that you're trying to find.

Avenger and Future Knight should be hitting the streets on November 24, with price tags of £9.95 and £7.95 respectively.

RAMJAM INVOLVED IN HIGH ELECTRICAL ACTIVITY!

DANDY SET TO SWAGGER OUT!

Many eons ago John Palevich, at that time a college student, wrote a game called Dandy on the Atari as part of his thesis. The game remerged in the arcades as the hugely popular Gauntlet. Now ELECTRIC DREAMS have taken the original concept of Dandy and working with Mr Palevich and RAM JAM have produced a game for the Spectrum which should be on its way to the shops any day now.

An extensive dungeons and dra-

gon type game, the basic idea follows the scenario of the original Dandy. Controlling one of two characters, Thor or Sheba (depending on your sexual preference) you must penetrate as far as possible into a dungeon maze. Your character can be sustained during the game by picking up various tasty tidbits of food which conveniently litter the floor.

The rooms in this dungeon harbour valuable prizes. By hunting Part of the multi-lavel playing eras that features in the ELEC-TRIC DREAMS version of DANDY, a classic game that inspired a host of clones

carefully, Thor and Sheba can collect various bits of treasure which could make them rich and famous. Or so they hope. The treasure can be stuffed into their spacious swag bags. However, this treasure isn't just there for the taking. That would just be too easy... The dungeons are possessively guarded by all manner of horrible nasties ranging from large and dangerous spiders, to wicked wizards and demons. These dangerous characters guard their treasure for all their worth, defending themselves by firing laser botts which, if they reach their target, can prematurely curtail your aspirations to being grossly rich.

Each level consists of twenty

Each level consists of twenty screens which flick from one location to another. Thor and Sheba have to battle their way through each of these levels collecting as much treasure as possible and hacking up the opposition at the same time. Once each level has been completed, escape down the staircase to the next level is the order of the day.

The action is viewed from

The action is viewed from above. A two player option allows you and a friend can take on the characters of Thor and Sheba. Alternatively, if you're feeling particularly brave and fearless you can go solo and take on the terrors of the dungeons on your own.

At the end of the game you have

At the end of the game you have two scores — one shows how much energy you have left and another indicates how much of the valuable treasure has been picked up. And they're only asking £7.95 for all this fun. . . .

TIME FOR SOME

There you are, peacefully enjoying your Cryogenic sleep as you zoom towards your destination on a far and distant planet when you're awakened with a jolt. Something has gone horribly wrong, Your ship has gone way off course and has dropped right through a time warp onto a previously uncharted and marketed planet. With all main unexplored planet. With all main systems on the ship failing you are forced to glide the stricken craft in for a crash landing. Vital components of your ship are stripped away during re-entry, and strewn across the planet's surface.

So. One moment it was comfy kip time and now you're stuck on a planet which you know nothing about, miles from your destination and with an unifyable ship. There's only one thing to do, Luckily, you have been equipped with a jet pack and can tour around the planet trying to locate and collect

the missing pieces of the ship. When all the pieces have been tound it might be possible to leave the planet and get back on course. There's one slight problem how-ever. This planet is huge. With a theoretically infinite number of locations to visit, you're going to have a vast job on your hands trying to find those missing compo-

The planet surface covered in vast jungles. Flying over the planet's surface the first task is to look for a clearing to set down in. Once on the ground the search may be continued on foot. The graphics show highly detailed jurgle vegetation and the action scrolls in an Interesting way — when you're walking in a certain direction you can zoom in to where you want to go and your surround-ings get larger accordingly. This planet isn't uninhabited: the

Rather like the Editor's back garden, this planet. Romping round an almost infinitely huge planet in search of bits of spacecraft, this is the kind of scenery you'll have to cope with

natives are a pasty bunch and must be shot on sight as they tend to foul up the proceedings. A few beacon markers are available to help you navigate your way around and they can be dropped in the ground at strategic points along

the way and then homed in on later using a bleeper which gets louder the nearer you are to the beacon.

Another nam Jamgame, this one should be available any day now,

THERE'S A MUTANT CYBERNETIC THIEF ABOUT

Yet another software house prepares to do battle in the ever growing and increasingly victous arena of budget software. Newly tormed conemasters are just putting the finishing touches to Phan-tomas, one of the four £1.99 cheapies they're releasing for the Spectrum in the next few weeks. Phantomas is a mutant cybernetic anti-hero who has escaped from the scientific base of Gurnar, in the Andromeda galaxy, and taken to a life of intergalactic crime

Phantomas has learnt of the existence of an incredible fortune amassed by the millionaire miser Goldter in his fortified retreat on the clone-planet Earth-Gamma. The mansion is guarded by a base packed with air and spacecraft

collected from different time zones, and once inside the building there are numerous traps and nasties between Phantomas and the miser's gold.

Breaking into the strongbox involves throwing 36 levers secreted somewhere in the mansion, but Phantomas is also lured by the Jewels hidden in the crypts where Goldter imprisons his associates. Some nifty riddle-solving is needed to get in and out of the armour-plated chamber.

And Just when Phantomas thinks he's got away with the mega spondulicks, code masters have got a surprise sting in the tail. Look out for Phantomas in the shops now, and in detail in the December

A FISTFUL OF GAMES

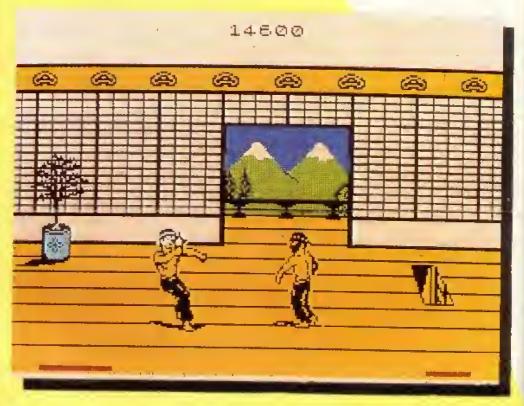

MELBOVARE HOUSE is gearing up for a mammoth onslaught on the games charts with an army of streetfighters, tough cops, wellknown cartoon characters from films and TV with a bit of marble mayham thrown in for good mea-

Oue in any day now is Dodgy Geezers. First previewed in the September CRASH, this is the latest tongue-in-cheek adventure from the dublous partnership of Lever and Jones, who were to blame for such earlier assaults on commonsense and decency as Hampstead and Terrormolinos. Set in the docklands of east London, it follows the attempts of a pair of ex-constorecruit a team of trustworthy crooks and pull off The Big Job before they get their wrists stapped by the Italian mob.

pain of except to treat a treat of trustworthy crooks and pull of The Big Job before they get their wrists stapped by the Italian mob.

Fist II: The Legend Continues is also soon to be knocking at the door of CRASH Towers. Three months late, it takes you, as novice fist warrior, out into the jungle-bound villages and underground mazes which surround the volcano strenghold of an evil Warriord. It's not all exploding fists, however. Your quest involves frequent stopovers at shrines and temples for a spot of meditation, which does wonders for your health and improves your fighting skills no end. Fistil will set you back £8.95.

The exploits of the misunderstood superhere Redhawk and his after egg. Kevin continue in KWAH, the sequel to the scrolling comic strip adventure which met. source released earlier this year.

Our novice Fist Warrior frozen at an awkward moment. If he moves, we'll review it. . . .

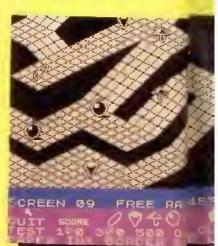

RESIDENCE SOVERMAN ESSANDE FLOW STOP BEECH S

The return of Redeparrow. Er..., Greenfinch, Hang on ..., Biuetit. Umm... Redhawk. That's it. KWAHI, the sequel from MELBOURNE HOUSE KWAH takes off where Redhawk ended, with Kevin still attempting to solve the mystery of his lost memory and Redhawk's origins. He returns to the Lee Rest and Rehabilitation Centre to interrogate the sinister Dr Lee and bring him to justice. Metacunne House say that gameplay has been enhanced, with spund effects, detailed backgrounds, and recognition of standard adventure commands.

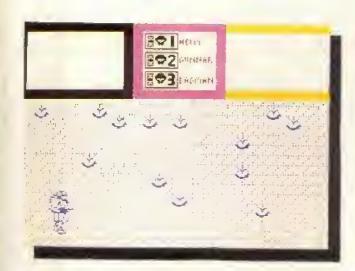

Are you feeling fucky, punks? Lucky enough to take on the padded shoulders and leser pistol of the meanest lawman of them ail? Judge Dredd has his work cut out ridding the city of murderers, burglars, litter bugs, dealers in old comics and alien seeds, and those stinking tobacco smokers. It's up to you to guide him to the perps, avoiding mutant commie robots, garbage grinders, sewer dwellers and innocent bystanders. Then you must decide whether the perp should be reprimended or simply terminated. All good, clean, victious cartoon fun in Melbourne'S game based around the cult hero of 2000AB, Watch out for it before Christmas.

The official version of Marble Madness will be rolling your way soon, in Marble Medness - The Construction Set, which includes practice courses and DIY mode. Now you'll be able to design your own arenas, stuffed with all the authentic and diabolic MM nasties — green worms, acid slime, capults and vacuum cleaners. Due out end of October, it'll cost £8.95.

Do it Yourself Marbia Madness. Seware of imitations . . .

ROGUE PIRANHA!

Salah | actor ©2 byranes

While Judge Dredd is cleaning up the streets of Mega-City One, his fellow 2000AD stalwart. Rogue Trooper, is setting out on quest for vengeance in a new game release from elease.

Written by Wookle, a member of the DESIGN DESIGN team, Rogue Traoper takes place in the post-holocaust shambles of Nu Earth, familiar to all devotees of the comic strip. Rogue is the last of the Genetic Infantrymen, programmed soldiers fighting against the Norts. He finds himself alone amongst his dealers and compared to the comp from their bodies to his own equiping the traitor who betrayed the

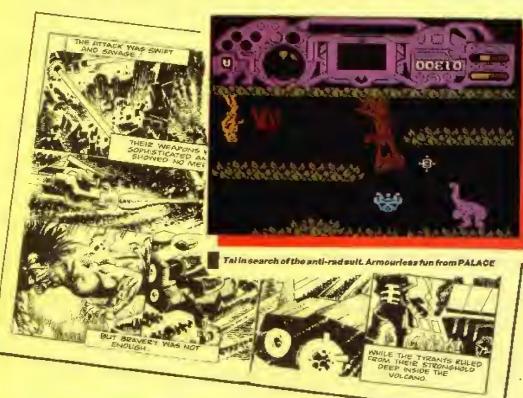

Southerners' cause.
The main screen area depicts
Rogue and his immediate surroundings in 3D perspective, while above is the Battle Computer disolay, and the Icons of the three Bio-Chips — Gunnar, Heim and Bagman, Messages generated by these three, slightly eccentric chip comrades appear in speech bubbles to the right of the icons.

in exploring the Glass Zones, the Scum Sea, the Ozart Mountains and the other wasted areas Rogue amongst the ruins. The Battle Computer display and speech bubbles have yet to be added, but you can see the Bio-Chip icons, centre top

ANTIRIAD APPROACHES

From the people who brought you Cauldron and Cauldron II comes Return of the Cauldron—cops, sorry—comes The Sacred Armour of Antiriad. PALAGE SOFTWARE has for some months now been working on an animated arcade adventure centred around the search by a barbarian race for the legendary sacred armour which has been lost amidst the horrors of the Evil Forest. The armour is in fact an anti-radiation combat suit developed in the 21st century by the superpowers in readiness for an all-out nuclear war. Tal, the lead character in the game, was chosen by the ruling elders to go on the quest—they believe the mythical armour will save them from the marauding aliens which have invaded this primitive post-hotocaust world.

We first gave you a sneak preview of Antiriad in September. Since then we've seen a working version which moved very nicely but still needed some tweaking and debugging — it wasn't quite ready for review. The finished game, together with the accompanying mini-comic which sets out the scenario is due out on October 23, priced £8.99. Meanwhile, here are some screens and a page form the comic created by Dan Malone, the artist behind the whole project, to whet your appendiew.

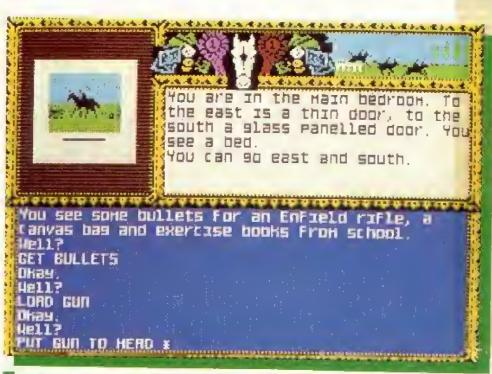

ONCE BITTEN...

The bestselling thrillers by Dick Francis are excellent material for computer adaptations, and Mosaic is first past the post with Twice Shy, a text adventure with graphic locations programmed by the RAM JAM team which wrote the still popular Valkyrie 17.

You take the part of Jonathan

You take the part of Jonathan Derry, down-at-heel physics teacher, who accidentally acquires some computer data tapes. In attempting to return the cassettes to their rightful owner, you run foul of a racetrack malla who aren't about to let a weedy school master stand in the way of their netarlous plans.

Twice Shy is unusual in that it comes with a racing simulation on side two which can be played as a game in its own right, as well as being an integral part of the text adventure, enabling Jonathan to accumulate some sorely needed greenbacks. It'll be interesting to see what Derek Brewster makes of that

Isaac Asimov's

SCIENCE FICTION MAGAZINE PRESENTS

KAYLETH

SHEET STATES

KAYLETH

The Zýroneans were an advanced, pacifistic civilisation, until the arrival of Kayleth and his obsessional craving for Chromazin, a rare mineral found in small quantities on the planet Zyron.

Now, Kayleth rules the Zyron skies with amesome power, using an Atomic Bisembler system to send down his powerful army of androids to enslave the Zyroneans and force them to daw-out the subterranean rocks to extract the precious ore.

What is Kayleth? Why are particular Zyroneans transported to the orbiting nerve centre of his domain, never to return?

How can this tyrant be eliminated?

Have you got the iron nerve and curning required to defeat him before he completes the total destruction of your home planet?

You, a loyal Zyronean, have avoided capture long enough to set into motion a plan to fiberate your beloved planet. However, as you are about to discover, certain events have overtaken your well laid schemes!!!
